Contents

Section 1: Introduction

Historical Introduction: The Impact of Imaging on Organ Transplantation 1
D. Hamilton

Ancient Times 1
Skin Grafting: Flaps and Other Methods 1
The Middle Ages 1
Plastic Surgery Revives 2
Vascular Surgery 2
The Hesitant 1920s and 1930s 2
Sense Returns 3
Organ Assessment and Imaging Commence 3
Understanding the Rejection Mechanism 4
Experimental Kidney Transplants 4
Boston and Paris 4
Back to the Laboratory 5
The Twins 5
Radiation and Immunosuppression 6
Chemical Immunosuppression 6
Dialysis Back-Up 7
Tissue Typing 7
The Heart Transplants and After 7
The 1970s 8
Cyclosporine 9
The 1990s 10
Organ Supply 11
Xenografting 11
References 12

Section 2: Renal Transplantation

Chronic Renal Failure and Pretransplantation Assessment 13
R.S.C. Rodger and G.M. Baxter

Presentation and Investigation of Renal Failure . 13
Treatment of Chronic Renal Failure 18
Assessment for Renal Replacement Therapy 18
Assessment for Cadaveric Renal Transplantation . 19
Assessment for Live Donor Transplantation 20
Assessment of the Live Kidney Donor 20
References 22

Renal Transplant Surgery 23
B.C. Jaques

Introduction 23
Donor Kidney 23
Transplant Procedure 23
Postoperative Considerations 26
References 26

Ultrasound Imaging in Renal Transplantation 27
G.M. Baxter

Indications and Contraindications 27
Donor Supply 27
Histocompatibility Testing 27
Preoperative Management 28
Surgery 28
Immunosuppression 28
Imaging the Transplant Kidney 28
Early Complications 31
Late Complications 36
Long-Term Complications 40
Summary 41
References 41

Pediatric Renal Transplantation 43
H. Maxwell

Etiology of Chronic Renal Failure 43
Management of Chronic Renal Failure 43
References 52

Interventional Radiology and the Transplant Kidney 55
J.G. Moss and R. Edwards

Patient Preparation 55
Biopsy 55
Calculus Disease 56
Fluid Collections and Abscesses 56
Renal Obstruction 57
Nephrostomy 57
Ureteric Balloon Dilatation and Stenting 58
Renal Artery Stenosis 58
Renal Artery Angioplasty 60
References 60

Section 3: Liver Transplantation

Indications and Assessment for Liver Transplantation 61
S. Norris

Introduction 61
Chronic Liver Diseases 61
Acute Liver Failure 65
Pediatric Liver Transplantation 66
Preoperative Evaluation 66
References 68

Liver Transplantation: Surgical Techniques ... 69
M. Bowles and M. Rela

Introduction 69
Liver Anatomy 69
Standard Orthotopic Cadaveric Liver Transplantation 71
Variations in Standard Technique 71
Pediatric Liver Transplantation 72
Auxiliary Liver Transplantation 74
References 75

Ultrasound Assessment of the Liver Transplant Candidate 76
A. Shaw and P.S. Sidhu

Introduction 76
Chronic Liver Disease 76
Fibrolamellar Hepatocellular Carcinoma 86
Acute Liver Failure 86
Pediatric Liver Transplantation 86
Assessment of Living Related Donors 87
Liver Volume Assessment 87
References 87

Early Postoperative Liver Transplant Ultrasound 90
S.M. Ryan and P.S. Sidhu

Introduction 90
Vascular Complications 90
Nonvascular Complications 99
Pediatric Liver Transplantation 102
References 103

Long-Term Ultrasound Follow-Up of Liver Transplantation 105
R.C. Beese and P.S. Sidhu

Introduction 105
Vascular Complications 105
Nonvascular Complications 108
Disease Recurrence 110
Post-Transplant Lymphoproliferative Disease ... 113
References 114

Interventional Radiology in Liver Transplantation 117
S. Babar and J. Tibballs

Introduction 117
Interventional Radiology Before Transplantation 117
Interventional Radiology After Liver Transplantation 119
Conclusion 123
References 123

Section 4: Multivisceral Transplantation

Pancreas Transplantation 125
A. Khanna, N.H. Patel, Z. Song, and R.M. Jindal

Introduction 125
Patient Selection 125
Technical Aspects of Pancreas Transplantation 125
Long-Term Outcome After Pancreas Transplantation 126
Complications 126
Specific Immunosuppression for Pancreas Transplantation 127
Pancreatic Islet Cell Transplantation 128
Future Directions 129
References 129
Suggested Further Reading 130

Small Bowel and Multivisceral Transplantation 131
A. Khanna and R.M. Jindal

Introduction 131
Indications 131
Patient Selection 131
Technical Aspects 132
Immunosuppression 132
Postoperative Care 132
Monitoring of Small Bowel Grafts 133
Early Complications 134
Late Complications 135
Future Directions 135
