Anatomy, identification of **16**
Anesthesia **80**
Anesthesia protocols
– arthrospine duo interlaminar decompression **282**
– arthrospine duo technique endoscopic diskectomy **150**
– arthrospine duo technique for posterior cervical laminoforaminotomy **666**
– Arthrospine UBE-assisted lumbar endoscopic fusion **376**
– biportal endoscopic cervical multilevel decompression **650**
– biportal endoscopic contralateral sublaminar approach **127**
– biportal endoscopic far-lateral extraforaminal lumbar interbody fusion **349**
– biportal endoscopic lumbar facet cyst resection **274**
– biportal endoscopic lumbar interbody fusion, heuristic guidance for the real practice **338**
– biportal endoscopic thoracic diskectomy **514**
– biportal endoscopic unilateral laminotomy with bilateral decompression **520**
– calcified thoracic ligamentum flavum, biportal endoscopic resection of **526**
– cervical diskectomy and fusion, full-endoscopic anterior **562**
– cervical diskectomy, anterior endoscopic **540**
– cervical diskectomy, percutaneous anterior endoscopic **549**
– cervical endoscopic cervical multilevel decompression, full-endoscopic **607**
– cervical posterior diskectomy, full-endoscopic **595**
– cervical posterior laminoforaminotomy, full-endoscopic **586**
– cervical spine, bilateral decompression of **642**
– cervical stenotic myelopathy, spinous process–preserving laminectomy for **614**
– chronic lower back pain, endoscopic radiofrequency denervation for **404**
– chronic sacroiliac joint pain, endoscopic radiofrequency denervation for **414**
– deformity correction, thoracoscopic approaches to **466**
– endoscopic anterior cervical diskectomy and fusion (eACDF) **555**
– endoscopic diskectomy and deformity correction **461**
– far-out syndrome, biportal endoscopic decompression for **266**
– foraminal stenosis (L2–L5), full-endoscopic transforaminal approach for **156**
– foraminal stenosis (L5–S1), full-endoscopic transforaminal approach for **163**
– giant calcified thoracic disk herniation, transforaminal approach to **485**
– interlaminar lumbar diskectomy, full-endoscopic **79**
– junctional herniated disk from prior lumbar fusion, full-endoscopic approach to **94**
– lateral recess decompression, full-endoscopic **224**
– lumbar disk herniation, full-endoscopic outside-in technique for **111**
– lumbar diskectomy, full-endoscopic, extraforaminal approach **49**
– lumbar diskectomy, full-endoscopic, for migrated lumbar disk herniation **57**
– lumbar epiduroscopic procedures/sacral hiatus approach **382**
– lumbar facet cyst resection, full-endoscopic **241**
– lumbar foraminal stenosis, biportal endoscopic paraspinal approach to **204**
– lumbar foraminal stenosis, biportal endoscopic sublaminar approach to **198**
– lumbar foraminal stenosis, full-endoscopic contralateral approach to: channel in channel technique **191**
– lumbar foraminal stenosis, full-endoscopic paraspinal approach to **171**
– lumbar interbody fusion, posterolateral transforaminal **747**
– lumbar interbody fusion, universal interbody cage inserter for **288**
– lumbar multilevel decompression, full-endoscopic spine surgery for **230**
– lumbar stenosis, unilateral biportal endoscopic decompression for **248**
– lumbar transforaminal diskectomy, full-endoscopic, with foraminoplasty at L5–S1 **65**
– multilevel lumbar stenosis, biportal endoscopic decompression for **257**
– navigation-guided cervical endoscopic surgery **738**
– navigation-guided thoracic endoscopic surgery **730**
– oblique lumbar interbody fusion (OLIF), full-endoscopy-assisted **318**
– posterior endoscopic-assisted instrumentation **672**
– recurrent lumbar disk herniation, full-endoscopic approaches to **88**
– robotic-assisted lumbar endoscopic surgery **742**
– thoracic and thoracolumbar junction, thoracoscopic decompression and fixation for **454**
– thoracic stenosis, full-endoscopic decompression for **493**
– thoracoscopic diskectomy **432**

Unilateral biportal endoscopy (UBE) *139*, *378*
Unilateral laminotomy for bilateral decompression (ULBD) *180*, **200**, *238*
Unilateral laminotomy, full-endoscopic, for bilateral decompression **216**
– anesthesia **217**
– classification **216**
– complications **220**
– contraindications **216**
– definition **216**
– diagnostic evaluation **216**
– disease profile **216**
– indications **216**
– literature **221**
–– discussion **221**
– personnel and equipment **217**
– special populations **220**
–– low-grade spondylolisthesis **220**
–– obese patients **220**
–– sagittally oriented facet tropism **220**
– surgical technique **217**
Unilateral laminotomy, full-endoscopic, with bilateral decompression **506**
– anesthesia **507**
– case illustrations **510**
– classification **506**
–– advantages **506**
–– disadvantages **506**
– complications **510**
– contraindications **507**
– definition **506**
– disease profile **506**
– indications **507**
– outcomes **510**
– personnel and equipment **508**
– postoperative management **510**
– risks and patient education **507**
– surgical technique **508**
–– approach and docking point **509**
–– intraoperative **510**
–– level identification and entry point marking **508**
–– soft tissue dissection **509**
–– spinolaminar junction, starting at **509**
–– "V" point, starting at **509**
Uniportal full-endoscopic transforaminal lumbar interbody fusion **295**
– anatomy **298**
– case illustrations **305**, **307**
– classification **296**
– complications **305**
–– intraoperative **305**
–– postoperative **305**
– contraindications **297**
– definition **296**
– diagnostic evaluation **297**
– disease profile **295**
– indications **297**
– outcomes **305**
–– isthmic spondylolisthesis (Grade 2) **305**
–– multilevel degenerative spondylolisthesis **307**
– personnel and equipment **298**
– postoperative management **305**
– risks and patient education **297**
– surgical technique **299**
–– additional incision for large cage and screw insertion **301**
–– bonework and cutting plane **299**
–– cage choice **301**
–– cage insertion and transverse lying **301**
–– diskectomy and endplate preparation **301**
–– drain and closure **305**
–– patient position and skin incision **299**
–– screw insertion via one small incision **304**
–– working tube insertion and cutting guide **299**
– updates **295**
