A

ABC classification, gastroduodenal diseases 179, 180
abdomen
  acute 52
  aortic aneurysm 128, *128*
  pain 50, *51*
  sonography 175
abscess 7, *8*
acanthosis nigricans *40*
acromegaly 231, *232*
acute abdomen 52
acute liver failure 195–196
acute pulmonary failure 163
acute renal failure 209
adaptation reactions 4–5
adenoma, liver 196
adrenal cortex, diseases 238–241
adrenocortical insufficiency 241
adrenocorticotropic hormone (ACTH) 229
AIDS 283–284
allergies 27–30
American College of Rheumatology (ACR)
  rheumatoid arthritis criteria 258
  SLE criteria 262, 263
amyloidosis 210
analgesic nephropathy 210
androgens 239
anemia 246–247
aneurysms *127,* 127–129, *128*
angina pectoris *99,* 100
angiography, peripheral arterial disease (PAD) 121, *122*
angiology 121–136
angiopathy, diabetic 217
ankle edema *46*
anterior pituitary lobe (APL) insufficiency *232,* 232–233
antidiuretic hormone (ADH) 230
anus praeter 186, *187*
aorta, coarctation 116, *116*
aortic aneurysm, abdominal 128, *128*
aortic dissection 128–129
appendicitis 185, *185*
arrhythmias, cardiac 103–110
arterial diseases 123–129
  occlusion 126, *126*
  peripheral (PAD) 121, *122,* 123–125, *124, 125*
arterial hypertension 117–119, *119*
arterial hypotension 119–120
arteriosclerosis *31,* 31–33, *32*
arteritis, temporal 267, *267*
arthritis
  psoriatic 261, *261*
  reactive 260
  rheumatoid *246,* 256–259, *257*
aspiration, bone marrow 245–246
asthma, bronchial 153–155
atelectasis 142–143, *143*
atrial fibrillation 107–108
atrial septal defect 116, *116*
atrioventricular conduction disorders 107
atrophy 5
auscultation 90, 121, *122*
  pulmonology 144
autoimmune diseases *29,* 29–30
autonomic nervous system, medications affecting 75, *76*
autosomal dominant inheritance 14, *14*
autosomal recessive inheritance 14–15, *15*

B

babesiosis 280
bacteria 21–23
  diarrheal diseases 271
  growth curve *23*
  reproduction 22–23
  shapes, typical *22*
  structure *21*
  vs. viruses 21
balloon dilatation
  coronary artery 100, *101*
  peripheral arterial disease 125, *125*
B cell defects 30–31
Bechterew disease 260
bed position, cardiac 97, *97*
bile ducts *170,* 171
  diseases 197–198
  tumors 198
bilirubin metabolism 44, *45*
bleeding, gastrointestinal 172–173
bleeding tendency 46, *46*
blood
  composition 242
  formation 242, *243*
  pH 138, *138*
blood count 245
blood gas, analysis 147
blood pressure
  measurement 91
  regulation 85
  systolic 85, 87
blood sugar, fasting 214
blood tests, nephrology 206
blue bloater 150, *150*
bone
  metabolism, disorders 224–229
  structure 224–229
bone marrow
  studies, in hematology 245–246
  transplantation 249–250
Borrelia burgdorferi 279
borreliosis 279–281, *281*
brain death 10
breast cancer 37
breathing, regulation 139
  see also lungs; pulmonary; respiratory
bronchial asthma 153–155
  grades 154
bronchial carcinoma 157–160, *158, 159*

bronchiectasis *143,* 143–144
bronchitis
  acute 148
  chronic 148–149, *149*
bronchoscopy
  bronchial carcinoma *158*
  transnasal 147, *148*
bypass, peripheral arterial disease 125, *125*

C

cachexia 41
calcium metabolism 224–225
cancer
  breast 37
  in children 36
  colon 37
  colorectal (CRC) 185–187, *187*
  epithelial vs. nonepithelial 35
  esophageal 178–179
  kidney 213
  in men 35
  oncological therapy 66–69
  stomach 181–182
  types 35–36
  in women 36
  see also carcinoma; tumors
caput medusae 194, *195*
carbohydrate metabolism, disorders *214,* 214–220
carbon dioxide, partial pressure 138, *138,* 139, *139*
carcinogens 37
carcinoma, bronchial 157–160, *158, 159*
  see also cancer; tumors
cardiac arrhythmias 103–110
  classification 105
cardiac-circulatory arrest 108–110
cardiac output 84–85
cardiac pacemakers, physiological 83
cardinal symptoms 43–57
  angiological 121
  cardiological 87–90
  gastroenterological 172–175
  hematological 244–245
  inflammation 6, *7*
  pulmonary 140
  renal 204–205
cardiology 83–120
  cardinal symptoms 87–90
  diagnosis 90–96
  physiological basis 83–87
  therapeutic principles 96–98
  see also heart
cardiomyopathies 113–114, *114*
cardioversion 106
case studies
  atrial fibrillation 104
  chronic kidney disease 211
  COPD 157
  metabolic syndrome 224
  myocardial infarction 108
  osteoporosis 228
  valvular heart disease 111
cat cry syndrome 13
catheter ablation 105
catheterization
  heart *95,* 95–96, 100, *101*
  peripheral arterial disease 125, *125*
cerebral arteries, occlusive disease 126–127, *127*
Chapel Hill classification, vasculitis 265, 266
chemotherapy 68–69
chest pain 50, 51
chest radiography 94
  bronchial carcinoma *158*
  tuberculosis 270
chest surgery, bronchial carcinoma 159, *159*
chickenpox 276, *276*
children, and cancer 36
cholesterol 220, 221
chromosomal aberrations
  numerical 11–12
  structural 12–13
chronic inflammatory intestinal diseases (CID) 183–185, *184*
chronic obstructive pulmonary diseases (COPD) 148–152, *151*
chronic venous insufficiency (CVI) *135,* 135–136
circulation
  collateral 33
  high-pressure and low-pressure 85
  pulmonary 85, *85*
  systemic 85, *85*
circulatory diseases 117–120
cirrhosis, liver 192–195, *194, 195*
clearance measurements, nephrology 206
Clostridium tetani 278
clotting 242–245, *244*
  disorders 252–255
  disseminated intravascular 255
clotting status 245
coagulation *see* clotting
coagulopathy, consumptive 255
coarctation, aorta 116, *116*
colitis, ulcerative 184, *184*
collagenosis 261–265
colon, irritable 188
colonoscopy *187*
Colorado tick fever 280
colorectal cancer (CRC) 185–187, *187*
colorectal polyps *189,* 189–190
coma, diabetic 217
compliance, lungs 146
computed tomography (CT) 61–62, *62*
conduction, heart 83, *83*
congenital heart disease, in adults 115–117, *118*
Conn syndrome 240–241
consciousness, altered states 55–56
constipation 173–174
consumptive coagulopathy 255
contact allergy 29, *29*
contraindications 66
contrast radiography 61
coronary artery bypass grafting (CABG) 101, *101*
coronary artery disease (CAD) 98–101, *99*
cor pulmonale 142, 164
Corynebacterium diphtheriae 270
coughing 140
creatinine, normal serum values 206
Crohn disease 183–184, *184*
curative therapy 66
Cushing syndrome 239–240, *240*
Cushing threshold dose 78
cutaneous paraneoplasia 40, *40*
cyanosis 43, 44
cystoscopy 207
cytomegalovirus (CMV) 278

D

death 9–10
deep vein thrombosis (DVT) 132, 134, 135
defibrillation 106
dermatomyositis *264*, 264–265
dermatophytes 25
diabetes insipidus 233
diabetes mellitus 215–216
  complications 218
  oral medication 219
diabetic foot 218, *218*
diagnostic procedures 58–65
dialysis 207, *207*
diarrhea 174–175
  infectious 271–272
diastole 84, *84*, 85
differential diagnoses
  chest pain 51
  constipation 174
  diarrhea 175
  dysphagia 172
  dyspnea 49
  hemorrhagic diathesis 46
  irritable bowel syndrome 188
  skin color 43
  syncope 56
  vomiting 50
diffusion 138, 141
Di George syndrome 13
digestive tract
  organs 169, *169*
  sections 171
  wall structure *170*
  see also gastro-
dilated cardiomyopathy 113, 114, *114*
diphtheria 270–271
diseases
  causes of 4, *5*
  circulatory 117–120
  diarrheal 271–272
  genetic 11–16
  infectious *see* infection
  metabolic 214–241
  progression of 9–10
  protozoan 284–286
  streptococcal 273–275
  types of 11–42
  see also bacteria; viruses; specific organs and sites
dissection, aortic 128–129
disseminated intravascular clotting 255
disseminated lupus erythematosus 261
diuresis, disorders 204
diverticulitis 190
diverticulosis 190
Down syndrome 12
drugs *see* medications
ductus arteriosus, patent 116, *116*
Dukes classification, colorectal cancer 187
duodenum, diseases 179–182
dyslipidemia 220–221
dysphagia 172
dyspnea 49

E

echocardiography *93*, 93–94
edema 46, *46*, *47*
effusion 49
ehrlichiosis 280
ejection fraction 84
electrocardiography (ECG) 91–93, *91*, *92*
  in cardiac arrhythmias 107, *107*
  and heart action *86*
  in myocardial infarction 101, *102*
electrophysiological study, heart 96
embolism, pulmonary 163–165
embryonic development 16, *17*
embryopathies 17–18, *19*
emphysema, pulmonary 149–150, *151*
empyema 7, *8*, 168
encephalopathy, hepatic 195
endocarditis 110–111
endocardium, diseases 110–112
endocrine function 172
endocrinology 214–241
endoscopic procedures 64–65
  gastroenterological 175–177
  in nephrology 207
  pulmonary 147–148, *148*
endoscopic retrograde cholangiopancreatography (ERCP) 176–177, *177*
enteral administration 72
enteropathy, gluten-sensitive 182–183, *183*
epidemiology 3–4
Epstein–Barr virus 38, 276, 277
erysipelas 274, *274*
erythema migrans *281*
erythrocytes 242
esophageal cancer 178–179
esophageal diverticula 190
esophagitis 177–178
esophagus, diseases 177–179, *179*
etiology 4, *5*
examination, physical 58, 59
excitation, heart 83, *83*
excretory function, kidneys 203, 210
exercise stress testing 92
exocrine function 171
expectoration 140
exudation 6

F

Fallot tetralogy 116, *116*
familial adenomatous polyposis (FAP) 37
farmer's lung *161*
Felty syndrome 257
fetal development 16, *17*
fetopathies 18–19, *19*
fever 52–53
fibrillation, atrial 107–108
fibrinolysis 244, *244*
flank pain 205
fluid, accumulation 46–49
focal nodal hyperplasia 196
follicle-stimulating hormone (FSH) 229
foot, diabetic 218, *218*
fragile X syndrome 12
Frank–Starling mechanism 84
function tests 63–64
  pancreatic 200
  pulmonary 144–146, 151
  see also laboratory studies
fungi 24–26, *26*, 271

G

gallbladder *170*, 171
  diseases 197–198
gallstones 197–198
gastrectomy 182, *182*

gastrinoma 201
gastroduodenal diseases 179–182
gastroenteritis, salmonella 272
gastroenterology 169–201
  cardinal symptoms 172–175
  diagnostic procedures 175–177
gastrointestinal bleeding 172–173
genetic diseases 11–16
genetic factors, and tumors 37
genital warts *38*
giant-cell arteritis 266–267
gigantism, pituitary 231
Glasgow Coma Scale 55–56
glomerular filtration rate (GFR) 206
glomerulonephritis 210
glossary of terminology 290–306
glucagon 215
glucagonoma 201
glucocorticoids 238–239
glucocorticosteroids 77–78
gluten-sensitive enteropathy 182–183, *183*
glycogenolysis 214
goiter *234*, 234–235
gonorrhea 282
gout 222, *222*

H

health–illness continuum 3, *3*
heart
  action, and ECG *86*
  cardiac arrhythmias 103–110
  cardiac bed position 97, *97*
  catheterization *95*, 95–96
  congenital disease 115–117, *118*
  diagnosis 90–96
  failure *see* heart failure
  functional disease 120
  ischemic diseases 98–104
  myocardial infarction 101–104, *102*
  therapeutic principles 96–98
  valves 112, *112*
  see also cardiac; cardio-; myocardial
heartburn 177
heart failure 87–90
  clinical severity 90
  global 89
  left-sided 88
  right-sided 88–89
  therapy 96–97
heart sounds 90, *90*
heart transplantation 97–98
hemangioma, liver 196
hematogenous metastasis 39–40
hematology 242–255
  cardinal symptoms 244–245
  diagnosis 245–246
hemodialysis *207*, 207–208
hemofiltration 208
hemolytic streptococci 275
hemophilia 16, 253–254
hemorrhagic diathesis 46, *46*
hemostasis 242–244
  disorders 252–255
  medications affecting 73–74, *74*
hepatic circulation *171*
hepatic encephalopathy 195
hepatic skin signs 193, *194*
hepatitis 192, 193
hepatorenal syndrome 195
hernias 190–191, *191*
herpesvirus diseases 38, 275–277
herpes zoster 277, *277*
hiatal hernia 191, *192*
histocompatibility antigens 72
history, medical 58
HIV infection 283–284
Hodgkin disease 250–251
hormone disorders
  and cirrhosis 193
  thyroid 234
hormone regulation 229, *230*
hormones, and bone metabolism 225
hormone therapy 69
hyperaldosteronism, primary 240–241
hypercholesterolemia 221
hypercortisolism 239
hyperglycemia 216–217
hyperosmolar coma 217
hyperparathyroidism 228–229
hyperplasia 5
hypersensitivity reactions 27
hypertension
  arterial 117–119, *119*
  portal 194, *195*
  pulmonary 142
hyperthyroidism *235*, 235–236
hypertriglyceridemia 221
hypertrophic cardiomyopathy 113, 114, *114*
hypertrophy 4
hyperuricemia 222
hypoglycemia 217
hyposensitization 28
hypotension, arterial 119–120
hypothyroidism 236–237, *237*

I

icterus 44–45
ileus 187–188
illness 3, 4, *5*
  see also diseases
imaging 59
  angiology 121
  gastroenterological 175
  nephrology 206–207
  noninvasive, pulmonary 147
  see also magnetic resonance; radiographic; sonography
immune deficiency syndromes 30–31
immune reactions, disturbed 26–31
immunotherapy 69
incretory function, kidneys 203, 210–211
indication, absolute vs. relative 66
infarction, pulmonary 164
infectiology 268–286
infection/infectious diseases 19–26
  chain of 19–20
  chronic 7
  course 20
  definition 19
  and pneumonia 155
  prenatal 18
  purulent 7, *8*
  spread 20
  transmission 20
  urinary tract 211–212
infectious mononucleosis 277–278
inflammation 5–7, *8*
  cardinal symptoms 6, 7
  forms 7, *8*

mediators 6
triggers 6
influenza 268
infusion 72, *73*
inguinal hernia 191
inheritance, autosomal 14–15, *15*
see also chromosomal; genetic diseases
injection 72, *73*
insulin 214–215, *215*
therapy 219–220
insulinoma 201
internal medicine 81–286
study questions 287–289
interstitial pulmonary diseases 160, *161*
intestinal diseases 182–189
chronic inflammatory 183–185, *184*
obstruction 187
iron deficiency anemia 247
irritable bowel syndrome 188–189
ischemic heart diseases 98–104

J

jaundice *see* icterus
juvenile rheumatoid arthritis (JRA) 257–258

K

Kaposi sarcoma herpes virus 38, 276
Karnofsky index 41
karyogram *11*
keratoconjunctivitis sicca 265
ketoacidotic coma 217
kidney cell cancer 213
kidneys
anatomy *202,* 202–203, *203*
cardinal symptoms 204–205
chronic disease 209–211
dialysis 207–209
excretory function 203
failure, acute 209
incretory function 203
transplantation 209
see also nephro-
kidney stones 212–213
Klinefelter syndrome 12

L

laboratory studies/tests/values 59, 60
adrenocortical insufficiency 241
anemia 246
clotting status 245
Conn syndrome 241
in COPD 151
Cushing syndrome 239–240
in deep vein thrombosis 134
diabetes 218
icterus 45
inflammation 7
liver 192, 195, 196
in myocardial infarction 103
nephrology 205–206

percutaneous transluminal coronary angioplasty (PTCA) 100, *101*
perfusion 137, 138, 140
pericarditis 115
peripheral arterial disease (PAD) 121, *122*, 123–125, *124*, *125*
  angiography 121, *122*
peripheral arterial occlusive disease 126–127, *127*
peritoneal dialysis 208, *208*
pernicious anemia 247
phlebothrombosis *132*, 132–135, *134*
phosphate metabolism 225
physical examination 58, 59
pink puffer 150, *150*
pituitary gigantism 231
pituitary gland
  anterior lobe insufficiency *232*, 232–233
  diseases 229–233
  posterior lobe insufficiency 233
  tumors 230–231
pituitary hormones 229–230
plasmacytoma 252, *252*
plasmodia infection 285–286
platelet formation, decreased 252–253
plethysmography, whole-body 145–146
pleural diseases 166–168
  effusion 167–168, *168*
  empyema 168
  tumors 168
pleuritis 167–168
pneumonia *155*, 155–157
pneumothorax 166–167, *167*
podagra 222, *222*
polymyositis 264–265
polyps *189*, 189–190
portal hypertension 194, *195*
prenatal development, disrupted 16–18
prenatal infections 18
pressor receptor reflex 87
principles
  basic, pathology 3–10
  therapy 66–78
progression, of disease 9–10
prolactinoma 230–231
prothrombin time 245
protozoa 26
  diarrheal diseases 271
  malaria 285–286
  toxoplasmosis 284–285
psoriatic arthritis 261, *261*
pulmonary circulation 85, *85*
pulmonary diseases
  classification 139–140
  interstitial 160, *161*
  see also lungs
pulmonary embolism 163–165
pulmonary failure, acute 163
pulmonary fibrosis 160, *161*
pulmonary function 137, *137*
pulmonary hypertension 142
pulmonary symptoms, cardinal 140
pulmonology 137–168
  diagnosis 144–148
purine metabolism, disorders 222–224
pyelonephritis 212

Q

quality of life, tumor patients 41
questions *see* study questions

Quick value 245
Quincke edema *28*

R

radiation therapy 67–68
radiographic procedures
59–62, *61*
chest 94
with contrast 61
digital 61–62
gastroenterological 175, *176*
nephrology 206–207
see also computed tomography; imaging
radioiodine therapy, goiter 235
raspberry tongue *275*
Ratschow position test 124, *124*
Raynaud syndrome *43,* 262
reactions, adaptation 4–5
reactive arthritis 260
reflux disease 177–178
Reiter syndrome 260–261
relapsing fever 280
renal cell cancer 213
renal failure, acute 209
renin–angiotensin–aldosterone system 87, *87*
respiratory disorders, sleep-related 164–166
respiratory gases 138
respiratory insufficiency 140–142
restrictive cardiomyopathy 113, 114, *114*
resuscitation, cardiopulmonary 108–110, *109*
resuscitation time 9, *10*
retinopathy, diabetic 217
Rett syndrome 16
rheumatic fever 110
rheumatoid arthritis *246,* 256–259, *257*
diagnostic criteria 258
juvenile (JRA) 257–258
rheumatology 256–267
risk factors, vascular 32
Rocky Mountain spotted fever 280

S

Salmonella infections 272–273
salutogenesis 3
sarcoidosis, and lungs 162–163
scarlet fever 275, *275*
scintigraphy 63, *63*
myocardial imaging 94
sclerosis, progressive systemic (PSS) 262
sexually transmitted diseases (STDs) 281–284
Sharp syndrome 265
shingles 277, *277*
shock *55,* 55–56
shock index 55
shunt, cardiac 115, 116, 117
sicca syndrome 265
Sjögren syndrome 265
skin color
changed 41–45
differential diagnosis 43
skin signs
hepatic 193, *194*
in SLE 262, *263*
sleep, and respiratory disorders 164–166
sonography 62, *62*
abdominal 175

  prognosis 41
  staging 40
  therapy 41
  thyroid 237–238
  see also cancer; carcinoma
Turner syndrome 12
type I reaction 27–28, *28*
type IV reaction *29*, 29–30
typhoid fever 273

U

ulcerative colitis 184, *184*
ulcer disease, gastroduodenal 180–181, *181*
ultrasound 62, *62*, 175, 206
urea, normal serum values 206
ureteropyeloscopy 207
urethritis 212
urinary tract
  anatomy *202*, 202–203
  infections 211–212
  laboratory studies/tests 205–206, 211
urine, visible changes 204
urolithiasis 212

V

valvular heart disease 111–112, *112*
varicella zoster virus 276–277
varicose veins 129–132, *130*, 131
vascular medicine 121–136
vascular risk factors 32
vasculitis 265–267
veins, diseases 129–136
venous insufficiency, chronic (CVI) *135*, 135–136
venous return 85, *86*
ventilation 137, 138, 139, 140, 146–147
ventricular septal defect 116, *116*
Verner–Morrison syndrome 201
vertigo 57
vessels, arteriosclerotic changes *31*, *32*
vicious spiral, compensatory 89
VIPoma 201
viral hepatitis 192
Virchow's triad 132
virion, structure *24*
viruses 23–24
  diarrheal diseases 271
  replication *25*
  and tumors 37–38
  vs. bacteria 21
vomiting 49–50
von Willebrand syndrome 254–255

W

warts, genital *38*
Wegener granulomatosis 266
weight, excess 223–224
whole-body plethysmography 145–146

X

xerostomia 265
X-linked dominant inheritance 16
X-linked recessive inheritance *15*, 15–16

Y

yeasts 25

Z

Zollinger–Ellison syndrome 201
Zubrod scale 41
