Index

Note: Since the major subjects of this book are ‚abdominal transplantation' and ‚ultrasound,' entries under these terms have been kept to a minimum. Readers are advised to seek more specific entries.

A

Abscess
  liver transplant complication 101, 102, 107, 108
  renal transplant complication 35, 56–57
Acquired polycystic kidney disease 13, 14, 15
Acute tubular necrosis (ATN) 31
  pediatric 49
Adrenal infarction, liver transplant complication 101
Alcohol abuse, transplant failure 20
Alcohol-related liver diseases 63, 112
  cirrhosis 63
  transplant guidelines 63
Anastomoses
  liver transplant 71–72, 90, 120
    biliary strictures 109
    pediatric 72
  portal vein, color Doppler ultrasound 98
  small bowel transplant 132
  ureteric, in renal transplant 25, 28
  vascular, in renal transplant 25
  see also individual transplants
Anemia 18, 43
Angiography
  hepatic artery 92, 94, 105
    pseudoaneurysm 95
  historical aspects 7, 8
  pediatric renal vasculature 47
  renal artery stenosis 58–59
  renal biopsy 56
  transjugular intrahepatic portosystemic shunt (TIPSS) 118
Angioplasty *see* Balloon angioplasty
Angiotensin converting enzyme (ACE) antagonists 16, 18
Animal models 3
Antibiotics 133
  prophylactic 55
Antibody therapy 28
Antiviral prophylaxis 133
Aortoportography 67, 120
Arteriocalyceal fistula 56
Arteriography
  first imaged kidney 4
  hepatic artery stenosis 99
  hepatic artery thrombosis 94
Arterioportal fistula 80
Arteriovenous fistula 38–39
  renal biopsy 56
  ultrasound appearance 39
Atherosclerotic vascular disease 127
Autoimmune hepatitis (AIH) 63–64
  recurrence 111
Auxiliary liver transplantation 74–75
Avascular necrosis 8–9
Azathioprine (Imuran) 6

B

Bacterial infection, postoperative 50
Balloon angioplasty 10
  hepatic artery 121
  hepatic venous outflow 121
  renal artery 60
Balloon dilatation
  biliary complications (liver transplant) 109, 121–122
  renal obstruction 57
  ureteric 58
Banff criteria for rejection 50
Barium studies 135, 136
Bile duct
  dilatation, detection 100–101, 109
  filling defects 122
  strictures 100–101, 109, 121
Biliary abscess 107
Biliary anastomosis 72
Biliary atresia, pediatric liver transplants 66, 87
Biliary complications, liver transplant
  balloon dilatation 109, 121–122
  metal stents 122
  ultrasound 100–101, 101, 109, 121–122
Biliary drainage, liver transplantation 72
Biliary leak 100–101, 121
  liver–small bowel grafts 135
Biliary strictures, dilatation 122
Bilirubin, primary biliary cirrhosis 62
Biopsy
  hepatic artery pseudoaneurysm 96
  percutaneous needle 96
  renal *see* Renal biopsy
  ultrasound guidance 41, 50, 55
Bladder, ultrasound 47
Blood group compatibility, history 7
B mode imaging
  4-MHz and 7-MHz 28
  hepatic artery
    pseudoaneurysm 96
    thrombosis 92
  mesocaval shunt 86
  mild hydronephrosis 28–29
  portal vein 97–98
    stenosis 98
    thrombosis 81
  role in delayed renal function 32
  transjugular intrahepatic portosystemic shunt 85
  transplanted kidney 28–29
  see also individual structures/complications
Brain death, impact on transplantation 7–8
British Transplantation Society, donor guidelines 20
Budd–Chiari syndrome 82, 83
  Doppler ultrasound 83
  mesocaval shunt 86
  recurrence 112
  transjugular intrahepatic portosystemic shunt 118

C

Calculus disease, renal 56
Calne, Roy 6
Calorie intake, pediatric renal failure 43
Cancer 20
  see also Hepatocellular carcinoma (HCC)
Cardiovascular disease 19, 20
  renal transplant complication 40
Carrel, Alexis 2
Carrel patch 59–60
Catheter
  biliary manipulation 58
  pigtail 56–57
Chemotherapy, hepatocellular carcinoma 119
Cholangiocarcinoma 63, 79
  liver cirrhosis 77
  recurrence 110–111
  ultrasound 80
Cholangitis, primary sclerosing *see* Primary sclerosing cholangitis
Chronic active hepatitis, recurrence 111
Chronic liver diseases *see* Liver diseases
Chronic renal failure *see* Renal failure, chronic
Cincinnati Transplant Tumor Registry 51
Cirrhosis of liver 76–77
  alcoholic 63
  hepatic vein appearance 84
  hepatocellular carcinoma 77, 80, 84
  macronodular 76
  parenchymal imaging 76–77
  pediatric 87
  portal vein involvement 80–81
  ultrasound 76, 77
Colonoscopy 67
Color Doppler ultrasound 29–31
  arteriovenous fistula 39
  Budd–Chiari syndrome 83
  diastolic flow measurement 30–31
  hepatic artery 84, 90, 93, 105
    pseudoaneurysm 96
    thrombosis 91–94, 102
  hepatic veins 84, 99
  hepatocellular carcinoma 79, 110
  hydronephrosis 29
  inferior vena cava 99, 108
  mesocaval shunt 86
  microbubble contrast *see* Microbubble contrast ultrasound
  pancreas transplant 127
  portal vein 90, 92
    anastomoses 98
    occlusion 80
    stenosis 98, 107
    thrombosis 80, 82, 97–98
  post-transplant lymphoproliferative disorder 113
  renal artery stenosis 37–38
  renal failure 16
  renal rejection 32–34, 39–40, 49, 99–100
  renal thrombosis 34
  renal transplant 30
    delayed function 32–33
    dysfunction measurement 29–31
  transjugular intrahepatic portosystemic shunt 85
Computed tomography
  focal nodular hyperplasia 78
  hepatic artery thrombosis 92
  hepatic malignancy detection 77
  historical aspects 11
  post-transplant lymphoproliferative disorder 113
Contralateral renal transplantation, procedure 23–24
Corticosteroid therapy 127–128
Couinaud classification 69
C-peptide 128–129
Creatinine measurement
  kidney graft dysfunction 49
  renal failure 13, 19
Crigler–Najjar syndrome 74
Cyclosporine 28
  historical aspects 9–10
  pancreas transplant 128
  toxicity 35, 39, 49
Cystogram 47
Cysts, renal *see* Renal cysts
Cytomegalovirus (CMV) 51

D

Diabetes Control and Complications Trial (DCCT) 125, 127
  pancreatic islet cell transplant 129
Diabetes mellitus
  pancreas transplantation 125, 127
  renal failure 17
  renal ultrasound 17
Dialysis
  historical aspects 4
  peritoneal, pediatric renal transplant 43
  suitability assessment 18–19
  see also Hemodialysis
Diaphragmatic paralysis 103
Diastolic flow, renal transplantation
  color Doppler ultrasound 30–31
  spectral Doppler analysis 31
Diet, renal failure 18
Diuretics 18
Donor supply *see* Organ supply
Doppler ultrasound
  acute liver failure 86
  color Doppler *see* Color Doppler ultrasound
  hepatic artery
    resistance index (HARI) 86
    stenosis 94–95
    thrombosis 92–93
  hepatic vein 82
  hepatic venous outflow obstruction 121
  normal renal vessels 16
  pediatric renal transplant 48
  pediatric renal vasculature investigation 47
  power Doppler ultrasound *see* Power Doppler ultrasound
  renal artery 31
    thrombosis 33–34, 48
  renal failure 16
  renal transplantation 16, 23, 29–31
    postoperative management 48
  renal vein thrombosis 33–34, 35, 48
  spectral Doppler analysis *see* Spectral Doppler analysis
  see also individual structures/complications

E

Embolization, trans-catheter, in renal biopsy 56
Endoscopic retrograde cholangiopancreatography 80, 121–122
Endoscopy 133–134
Enteric leak 134
Epithelioid hemangioendothelioma 111
Epstein–Barr virus 51
Ethical concerns, historical aspects 2

F

Fibrolamellar hepatocellular carcinoma 86
  recurrence 110
  ultrasound assessment 86, 87
Fine-needle aspiration 120
  pancreas transplant 129
Fluid collection, ultrasound
  liver transplant 101, 102
    drainage 120
  renal transplants 35, 56–57
    drainage 56–57
Focal nodular hyperplasia 78
Fungal infections 51

G

Gallbladder, liver transplantation 71, 72
Gallbladder conduit technique 72
Gastrointestinal bleeding 134
Glomerular filtration rate, pediatric renal transplant outcome 52
Glomerulonephritis 17
  recurrent, post-renal transplant 40
Glomerulosclerosis
  focal segmental 50
  membranoproliferative 50
Gorer, Peter 3
Graft-*versus*-host-disease
  liver transplantation 108
  small bowel grafts 135

H

Heart transplants 7–8
Hematoma formation, liver transplant complication 101
Hemodialysis
  historical aspects 7
  pediatric renal failure 43
  see also Dialysis
Hemolytic uremic syndrome (atypical), pediatric 50
Hemorrhage
  liver transplant complication 101
  pancreas transplant complication 126
  renal transplant complication 35
    pediatric 48
  small bowel/multivisceral transplant 134
Hepatectomy, partial 77
Hepatic abscess 101, 102, 107, 108
Hepatic arterial anastomosis 72
Hepatic artery 69–70
  angiography 92, 94, 105
  balloon angioplasty 121
  color Doppler ultrasound 84, 90, 93, 105
    normal 90
  imaging 82–83
  liver transplantation complications
    early postoperative 90–91
    long-term 105–106
  normal anatomy and variations 69–70
  normal Doppler waveform 90, 93
  preoperative interventional radiology 117
  spectral Doppler 90, 93, 93 106, 96, 105
  transarterial therapy of HCC 119
Hepatic artery pseudoaneurysm 95–97, 121
  angiography 95
  percutaneous needle biopsy 96
  ultrasound 95, 96
Hepatic artery resistance index (HARI) 86
Hepatic artery stenosis 105–106, 120–121
  arteriography 99
  Doppler ultrasound 94–95
Hepatic artery thrombosis 91–94, 102, 120–121
  B mode imaging 92
  collateral formation 91
  computed tomographic arteriography 94
  computed tomography 92
  Doppler ultrasound 92–94, 102
  microbubble contrast 91, 92
  pediatric 102
  spectral Doppler analysis 91–93
Hepaticojejunostomy 72
Hepatic veins 69, 82, 84, 99
  cirrhosis 84
  color Doppler 84, 99
  Doppler ultrasound 82
  thrombosis, spectral Doppler analysis 99
Hepatic venous outflow 69
  obstruction/stenosis 121
Hepatitis 20
Hepatitis B 64–65
  immune clearance phase 65
  immunotolerant phase 64
  liver transplantation 65
  reinfection and management 65
Hepatitis B virus (HBV), carriers 20
Hepatitis C 64
  cirrhosis 64
  diagnosis 64
  liver transplantation 64
Hepatitis C virus (HCV), carriers 20
Hepatoblastoma 87
  pediatric 112
Hepatocellular carcinoma (HCC) 76–77, 79–80
  chemotherapy 119
  cirrhosis and 77, 80, 84
  color Doppler ultrasound 79, 110
  interventional radiology 119
  lipiodol angiography 119
  microbubble contrast 79
  pediatric 87, 110
  recurrence 110, 112
  temporary control (preoperative) 119
  ultrasound appearances 77
Herpes simplex infection 51
Histocompatibility genes, historical research 3
Histocompatibility testing, renal transplantation 27
Historical aspects, transplantation 1–12
  1920s and 1930s 2–3
  1970s 8–9
  1990s 10–11
  ancient times 1
  chemical immunosuppression 4, 6–7
  cyclosporine 9–10
  dialysis 7
  experimental kidney transplants 4–5
  heart transplants 7–8
  middle ages 1–2
  multivisceral transplantation 131
  organ assessment and imaging 3–4
  organ supply 11
  pancreas transplant 125
  plastic surgery 1, 2
  radiation effects 4, 6
  rejection mechanism 4
  skin grafting 1, 2
  tissue typing 7
  twin studies 5, 6
  vascular surgery 2
  xenografting 11
HIV-infection, liver transplantation 67, 68
HLA antigens
  antibodies, pediatric 46
  renal graft acceptance 27
Human Organ Transplant Act (1989) 21
Hunter, John, transplant research 2–3
Hydronephrosis 9, 28–29, 35
  first urogram image 7
  ultrasound 14, 28–29
Hyperacute rejection 7
Hypertension 40
  pediatric 52
  portal 81, 87, 98
  renal failure 18

I

Imaging
  historical aspects 3–11
  see also individual imaging techniques
Immunological aspects
  histocompatibility testing 27
  historical research 2, 5
Immunological screening tests, renal failure 17–18
Immunosuppression 28
  historical aspects 4, 6–7, 10–11
  long-term treatment risks 20
  pancreas transplant 127–128
  pediatric 48
  renal transplantation 28
  small bowel transplant 132
Infection, postoperative complication
  liver transplant 108–109, 120
  pancreas transplant 126
  pediatric 50
  renal transplant 35–36, 40, 48
  small bowel/ multivisceral transplant 135
Inferior vena cava
  anastomosis 71–72, 73
  color Doppler ultrasound 99, 108
  thrombosis/stenosis 108
Informed consent, interventional radiology 55
International Islet Transplant registry 128
Interventional radiology
  historical aspects 7, 9
  liver transplant 117–124
    postoperative 119–123
    preoperative 117–119
  renal transplant 55–60
    biopsy 41, 50, 55–56
      see also Renal biopsy
    calculus disease 56
    fluid collections/abcesses 56–57
    nephrostomy 57–58
    obstruction 57
    patient preparation 55
    renal artery angioplasty 60
    renal artery stenosis 58–60
    techniques 55
    ureteric balloon dilatation 58
    ureteric stenting 58
  transjugular intrahepatic portosystemic shunt 117–119
Intravenous urogram (IVU), historical aspects 5, 6
Isolateral renal transplantation, procedure 23–24
Isotope scanning 10, 51
  historical aspects 8

K

Kidney
  liver transplant complications 108
  normal ultrasound 13, 16
  polycystic disease 13, 14, 15
  see also entries beginning Renal
King's College criteria, liver transplant in acute liver failure 65–66

L

Lipiodol angiography, hepatocellular carcinoma (HCC) 119
Lipiodol-iodine-131 therapy 119
Liver
  abscess 101, 102, 107, 108
  anatomy 69–70
  blood supply 69
  cirrhosis *see* Cirrhosis of liver
  parenchymal imaging 76–80
  volume assessment 87
Liver diseases, chronic 61–65
  alcohol-related 63
  autoimmune hepatitis 63–64
  liver transplant, preoperative ultrasound 76–86
  primary biliary cirrhosis (PBC) 61–62, 77
  primary sclerosing cholangitis 62–63
  viral hepatitis 64–65
  see also individual diseases
Liver failure, acute 65–66
  auxiliary liver transplant 74
  criteria for transplant 65–66
  liver transplant, ultrasound assessment 86
Liver nodules, ultrasound 76–80
  cirrhotic 76
  malignant 77–80
  microbubble contrast medium 77–79
Liver–small bowel transplantation 131
Liver transplantation
  acute liver failure 65–66
  chronic liver disease 61–65
    see also Liver diseases, chronic
  complications
    biliary 100–101, 109, 121–122
    infectious 120
    nonvascular 99–102, 108–114
    pediatric 102–103
    renal 108
    vascular 90–99, 105–108, 120–121
  contraindications 68, 87
  goals 61
  indications 61, 62
  interventional radiology 117–124
  long-term ultrasound follow-up 105–116
  malignancy after 122
  pediatric *see* Pediatric liver transplantation
  postoperative ultrasound (early) 90–104
  preoperative evaluation 66–68
    goals 67
  preoperative ultrasound assessment 67, 76–89
    acute liver failure 86
    chronic liver disease 76–86
    fibrolamellar hepatocellular carcinoma 86
    liver volume assessment 87
    living related donors 87
    pediatric 86–87
  rejection 99–100, 108
    color Doppler ultrasound 99–100
    interventional radiology 120
  surgical techniques 69–75
    anastomoses *see* Anastomoses
    auxiliary 74–75
    living related transplant 74
    pediatric *see* Pediatric liver transplantation
    reduced transplant 73
    split liver *see* Split liver transplantation
    standard technique 71, 90, 117
    variations 71–72
Liver tumors
  computed tomography 77
  metastatic 79, 111
  microbubble contrast 78
  ultrasound 79–80, 111–113
  see also Hepatocellular carcinoma (HCC)
Lymphoceles 35, 51, 56–57
  urological obstruction 51
Lymphocytes cross-match test 27
Lymphocytic antigens (HLA) *see* HLA antigens
Lymphoma 51

M

Magnetic resonance angiography 21
  hepatic artery thrombosis 94
  pediatric renal vasculature 47
  renal investigation 21
Magnetic resonance imaging
  fibrolamellar hepatocellular carcinoma 86
  renal failure 17
Magnetic resonance venography 67
  portal vein 81
Mayo model
  primary biliary cirrhosis 62
  primary sclerosing cholangitis 63
Medawar, Peter 4–5
Merrill, John 6
Mesocaval shunt 86
Metabolic acidosis 126
Methylprednisolone 132
Microbubble contrast ultrasound
  hepatic artery
    pseudoaneurysm 96
    stenosis 94–95
    thrombosis 91, 92, 93
  hepatic vein 82
  hepatocellular carcinoma 79
  liver nodules 77–79
  liver tumors 78, 79
  portal vein thrombosis 81
Multivisceral transplantation 131–138
  donor operation 132
  postoperative care 132–133
  recipient operation 132
  rejection 134, 135, 136
Murray, Joseph 6

N

Nephrectomy, pediatric 47
Nephrography, historical aspects 3–4
Nephrolithotomy, percutaneous 56
Nephrostomy
  drainage, renal obstruction 34
  procedure 57–58
Neuroendocrine tumors 111
Nitrogen mustard 6
Non-Hodgkin lymphomas 122

O

Obesity 19
OKT3 127–128
Organ supply 27, 74
  historical aspects 11
Oxalosis 20
  pediatric 50

P

Pancreas after kidney transplant (PAKT) 126
Pancreas enlargement, after liver transplant 101
Pancreas transplantation 125–130
  color Doppler ultrasound 127
  complications 126–128
    early 126–127
    late 127
  in diabetes mellitus 125, 127
  future directions 129
  immunosuppression 127–128
  indications 125
  islet cell transplant 128–129
  long-term outcomes 126
  patient selection 125
  rejection 126
  spectral Doppler analysis 127
  technical aspects 125–126
Pancreatic islet cell transplantation 128–129
  criteria for success 129
Parvus tardus arterial waveform
  hepatic artery stenosis 94, 95
  renal venous thrombosis 35
Pediatric liver transplantation 66
  complications 102–103
  contraindications 87
  disease recurrence after 110, 112
  indications/contraindications 66, 67
  surgical techniques 72–73
  ultrasound assessment 86–87
Pediatric renal transplantation 43–54
  acute rejection, diagnosis 49
  complications 48–52
  contraindications 46
  graft biopsy 49–50
  graft dysfunction 49
  graft function 52
  graft loss 52
    causes 45
  growth chart 44
  hemodialysis 43
  living related donor 44
  outcomes 52
  peritoneal dialysis 43
  postoperative management 48
  preemptive transplant 44–45
  pretransplant investigations 46–47
  renal failure, chronic 43
  surgery 48
  survival rates 52
    Kaplan–Meier survival plots 45, 46
  ultrasound investigation 47–48, 49, 51
  young recipient 45–46
Percutaneous ethanol injection (PEI) 119
Percutaneous needle biopsy, hepatic artery pseudoaneurysm 96
Peritoneal dialysis, pediatric 43
Piggy-back technique, liver transplantation 71–72, 73
Plastic surgery, historical aspects 1, 2
Pleural effusions, liver transplant complication 101–102
Polycystic kidney disease 13, 14, 15
Portal hypertension 81, 87, 98
Portal vein 69, 74, 80–82, 106
  anastomoses, color Doppler ultrasound 98
  B mode imaging 97–98
  color Doppler 90, 92
  gas 99
  imaging 80–82
  interventional radiology 117, 121
  liver cirrhosis 80–81
  long-term liver transplant complications 106
  normal color Doppler 90
  occlusion 80, 97–98, 106, 107
  venous flow assessment 81–82
Portal vein stenosis 97–98, 107, 121
  pediatric 106
  ultrasound 98, 107
Portal vein thrombosis 80–82, 98, 117
  B mode imaging 81
  color Doppler 80, 82, 97–98
  interventional radiology 117, 121
  liver cirrhosis 80
  microbubble contrast 81
  transjugular intrahepatic portosystemic shunt 119
Positron emission tomography (PET) scanning 67
Postoperative complications *see specific transplantations*
Post-transplant lymphoproliferative disorder 113–114, 122
  recurrence, liver transplant 113–114
  renal transplant complication 51
  small bowel/ multivisceral transplant 135
Power Doppler ultrasound
  liver tumors 78
  renal artery stenosis 37
Primary biliary cirrhosis (PBC) 61–62, 77
  prognostic variables 62
  recurrence 111
Primary sclerosing cholangitis 62–63
  radiology role 63
  recurrence 63, 109
Pseudoaneurysm
  hepatic artery *see* Hepatic artery pseudoaneurysm
  renal transplant 56
Pulsatility index (PI), Doppler ultrasound 30
Pyelonephritis, chronic 17

R

Radiation, historical aspects 4, 6
Radiofrequency thermal ablation 119
Radiology, interventional *see* Interventional radiology
Rejection
  historical research 4
  see also individual transplantations
Renal artery
  aneurysm 10
  angioplasty 10, 60

Renal obstruction
  interventional radiology 57
  postoperative complication 34–35, 57
Renal pelvis, dilatation, ultrasound 49
Renal rejection
  acute 32, 39
    pediatric 49
  chronic 39, 40
  color Doppler ultrasound 32–34, 39–40, 49
  spectral Doppler analysis 39, 49
Renal replacement therapy
  assessment 18–19
  see also Dialysis; Renal transplantation
Renal transplantation
  abscess 35, 56–57
  assessment for 19–20
  cadaveric 19–20, 27
    allocation of organs 19
    assessment 19–20
    contraindications 19–20
    noncompliance risk 20
  complications
    early 31–36, 56–57
    late 36–41
    long term 40–41
    postoperative 20–21, 31–41
    see also Renal rejection
  delay in function 26
  donor kidney 23
  histocompatibility testing 27
  historical research
    experimental transplants 4
    first transplant 3
    rejection mechanisms 4
    twin studies 5
  immunosuppression 28
  indications and contraindications 27
  interventional radiology 55–60
    see also Interventional radiology
  life expectancy of transplant kidney 27
  live donor 20–22, 27
    guidelines 20–21
    pediatric transplants 44
    recipient assessment 20
  live donor assessment 20–21
    contraindications 21
    exclusion criteria 21–22
    imaging techniques 21
    unrelated donor 21
  pediatric *see* Pediatric renal transplantation
  postoperative considerations 26, 28
  preoperative management 28
  rejection *see* Renal rejection
  surgery 23–26, 28
  transplant procedure 23–26
    anastomoses *see* Anastomoses
    contralateral renal transplant 23–24
    intraperitoneal approach 28, 48
    isolateral renal transplant 23–24
    retroperitoneal iliac approach 28
    typical incisions 24
    wound closure 25–26
  ultrasound 8, 29
    B mode imaging 28–29
    color Doppler 29–31
    Doppler 16
    role in delayed function 32, 33
Renal vein thrombosis 10, 33–34
  diagnostic criteria 34
  pediatric transplant complication 48
  spectral Doppler analysis 35
  transplantation complication 32, 48
  ultrasound appearance 34, 35
  waveforms 34, 35
Renovascular disease 16
Resistive index (RI) 30, 33
  hepatic artery 86, 93
  hepatic artery stenosis 94
  hepatic artery thrombosis 93
  portal vein thrombosis 98
Retrograde pyelograms, historical aspects 3, 5
Retroperitoneal hematoma 24
Roux-en-Y-loop 105–106, 111
  choledochojejunostomy 102–103

S

Sarcoidosis 112
Sedation, for interventional radiology 55
Seldinger technique 120
Sepsis
  liver transplant 120
  urinary 57
Short gut syndrome 131, 136
Simultaneous kidney and pancreatic transplantation (SKPT) 125–126
  survival rate 126
Skeletal surveys 8–9
Skin grafting, historical aspects 1, 2
Small bowel transplantation 131–138
  anastomosis 132
  complications
    early 134–135
    late 135
  donor operation 132
  future directions 135
  immunosuppression 132
  indications 131
  monitoring 133–134
  patient selection 131–132
  postoperative care 132–133
  recipient operation 132
  rejection 134, 135, 136
    acute 134
    chronic 135, 136
Solumedrol 132
Spectral Doppler analysis 37–38
  arteriovenous fistula 39
  biliary complications 101
  Budd–Chiari syndrome 83
  delayed renal function 32, 33
  diastolic flow, renal 31
  hepatic artery 90, 93 105, 106
    stenosis 94–95
    thrombosis 91–93
  hepatic vein 84
    thrombosis 99
  hydronephrosis 29
  pancreas transplant 127
  portal vein 81–82
    stenosis 107
    thrombosis 82
  renal artery stenosis 37–38
  renal rejection 39, 49
  renal venous thrombosis 35
Spiral computed tomography 121, 122, 123
Split liver transplantation 73
  complications 102
  historical aspects 11
Staphylococcus aureus 36
Starzl, T.E. 5, 6
Stenting, renal transplant 58–59
Steroids 48, 127–128
  historical aspects 6
  resistance 49
Stimulated acoustic emission (SAE) techniques 77, 78, 79

T

Tacrolimus
  pancreas transplant 128
  pediatric 48
  small bowel and multivisceral transplants 132
  toxicity 35, 39, 49
Thrombosis
  pancreas transplant 126
  renal transplant complication 19, 33–34
    pediatric 48
  small bowel/multivisceral transplant 134
  see also individual arteries/veins
Tissue typing, historical aspects 7
Tracker system, renal biopsy 56
Transcatheter embolization, renal biopsy 56
Transhepatic intrajugular portosystemic shunting 67
Transjugular intrahepatic portosystemic shunt (TIPSS) 83, 85–86
  angiogram 118
  B mode imaging 85
  Budd–Chiari syndrome 118
  color Doppler 85
  flow characteristics 85
  before liver transplantation 117–119
  portal vein thrombosis 119
Twin studies, historical aspects 5, 6

U

UK Renal Association, donor guidelines 20
Ultrasound
  early use 8, 9
  historical aspects 8, 9–10
  see also individual modes and transplantations
Unrelated Live Transplant Regulatory Authority 21
Urea measurement, renal failure 13
Ureteral stenosis 52
Ureteric anastomosis 25, 28
Ureteric balloon dilatation, renal transplant 58
Ureteric stenting 58–59
Urinary infection 39, 57
  pancreas transplant 126
Urinary leak, renal transplant complication 35
Urinary tract, pediatric renal transplant work-up 46–47
Urinoma 35
Urogram image, first kidney transplant 7
Urological complications, renal transplant
  urinary leak 9, 41, 51
  urinary obstruction 9, 51
Ursodeoxycholic acid (UDCA) 62

V

Varicella 51
Vascular anastomoses, renal transplant 25
Vascular investigation, pediatric, renal 47
Vascular surgery, historical aspects 2
Vascular thrombosis *see* Thrombosis
Viral infection
  postoperative complication 50–51
  recurrence after liver transplant 110
  screening 46

X

Xenografting 11

Z

Zoom videoendoscopy 133–134
