Index

A

AB toxins 15, 16
ABO blood system 111 – 112
Abscess
  cerebral 646
  epidural 646
  intraperitoneal 643
  liver 502, 503, 642
  pancreatic 641
  pulmonary 634
  splenic 642
Absidia spp. 354, 367
  see also Mucormycoses
Acanthamoeba (acanthamebosis) 507
  culbertsoni 507
  cultivation 623
  diagnosis 646
    eye infections 656, 657
Acid fastness 262
Acinetobacter 278, 643
  baumanii 223, 278
  calcoaceticus 223, 278
  nosocomial infection 343
Acquired immune deficiency syndrome *see* AIDS
Acrodermatitis chronic atrophicans 327
Actinobacillus actinomycetemcomitans 304
Actinomadura madurae 652
Actinomyces 221, 258 – 260
  clinical picture 259
  diagnosis 259
    cardiovascular system 647
    eye infections 656, 657
  epidemiology 260
  israelii 221, 258
  naeslundii 258
  pathogenesis 259
  pyogenes 261
  sulfur granules 258
  therapy 260
  see also Actinomycoses
Actinomycetes 254 – 255, 258
  culture 259
  morphology 258 – 259
  occurrence 258
  see also Actinomycoses
Actinomycetomas 273
Actinomycoses 258
  abdominal 259
  cervicofacial 259
  genital 259
  thoracic 259
  see also Actinomyces
Acute necrotic ulcerous gingivostomatitis 631
Acute retroviral syndrome 451
Acute rheumatic fever 238
Acycloguanosine 404
Acyclovir 404
Acylureidopenicillins 193
Adamantanamin 404
Adenocarcinoma, gastric 638
Adenophoria 545
Adenoviruses 382, 416 – 418
  clinical picture 416 – 417
  diagnosis 417
    cardiovascular system 647
    eye infections 655, 656
    gastrointestinal tract 638
    nervous system 645
    respiratory tract 630, 631, 632
  epidemiology 417 – 418
  pathogenesis 416
  pathogens 416
Adhesins 7, 11
Adhesion 11 – 12
Adhesion factors
  Bordetella pertussis 315
  Enterobacteriaceae 282
Adjuvant 139
  Freund's (FA) 141
Aedes aegypti 616
  see also Mosquitoes
Aerobes 163
Aeromonas spp. 224, 300
Affinity 139
  maturation 139
Afipia felis 335
  diagnosis 649
Aflatoxins 353
African eyeworm 593
Agar diffusion test 204
Agglutination reaction 123 – 125
Aggressins 7, 8, 11
AIDS 448
clinical categories 452
  diagnosis 448
    AIDS-defining diseases 452, 453
  immunopathology and 106
  mycobacterial infection 271
  prevention 448
  see also Human immunodeficiency virus (HIV); Opportunistic pathogens
AIDS encephalopathy 451
Alastrim 427, 429
Alcaligenes faecalis 305
Alcohol disinfection 39
Aldehydes 39
Allele 139
Allelic exclusion 67
Allergy 43 – 44, 139
  IgE-triggered anaphylaxis 108 – 109
  mycogenic 352 – 353
Allogeneic transplants 116, 139
Alloreactivity 133 – 134

Allotransplant 139
Allotype 56, 139
Allylamines 357
Alpha toxin 16, 231
Alphavirus 440 – 441
Alternaria spp. 354, 369
Alveolata 477
Alveolitis, allergic 353, 365
Amandibulata 606
Amantadine 404
Ambisense genome 463
Amebiasis *see* Amebosis
Amebosis 499 – 506
  clinical manifestations 502 – 503
  diagnosis 503 – 506, 625, 639
    antibody assay 506
    coproantigen detection 506, 622
    coproscopic diagnosis 503
    differential diagnosis 504 – 506
  epidemiology 502
  extraintestinal 502, 503, 506
  immunity 503
  intestinal 503 – 506
    asymptomatic 500 – 502
    symptomatic 500, 503
  prevention 506
  therapy 506
  see also Entamoeba
Amikacin 189
Aminocyclitol antibiotics 189
Aminoglycosides 189, 195
  mechanism of action 198
  resistance mechanisms 202
Aminopenicillins 193
4-Aminoquinolines 533
8-Aminoquinolines 533
Amodiaquine 533
Amoebozoa 477
Amoxicillin 193
Amphotericin B 356
Ampicillin 193
Amplification culture 408
Amplification techniques 216 – 217
Anabolic reactions 160 – 161, 163
Anaerobes
  aerotolerant 163
  facultative 163
  obligate 163
  see also specific pathogens
Anaerobic cellulitis 246 – 248
  clinical picture 247
  diagnosis 248, 651, 653
  pathogen spectrum 246
  pathogenesis 247
  therapy 248
  toxins 246 – 247
Anaphylatoxin 113, 139
Anaphylaxis 108 – 109, 139
  passive cutaneous (PCA) 143
Anaplasma phagocytophilum 227, 333
Ancylostoma (ancylostomosis) 544, 580 – 582
  braziliense 602
  caninum 580, 602
  clinical manifestations 582
  control 582
  diagnosis 582, 640, 652
  duodenale 580
  life cycle 580 – 582
  morphology 580
  occurrence 580
  therapy 582
Ancylostomosis *see Ancylostoma* (ancylostomosis); *Necator* (ancylostomosis)
Anemia
  aplastic crises 412
  in malaria 529
Anergy 44
Angiostrongylus (angiostrongyliosis) 604
  cantonensis 604
  costaricensis 604
Animal testing, in diagnostic bacteriology 217
Anisakis (anisakiosis) 604
  diagnosis 626
Anopheles 616
  control 537
  see also Mosquitoes
Anoplura 606, 612 – 615
  biology 613
  medical significance 613
  morphology 613
  see also specific parasites
Anthrax 220, 244 – 245
  dermal 245, 651
  diagnosis 245, 651
  epidemiology 245
  inhalational 245
  intestinal 245
  prophylaxis 245
  therapy 245
  see also Bacillus anthracis
Anthropogenic evolution 203
Anthroponoses 26
Antibiotic resistance 24, 201 – 205
  definitions 201
  evolution of 203
  genetic variability 201
  mechanisms 202 – 203
  multiple resistance 201
  problematic bacteria 201
  resistance plasmids 167, 168, 176, 177
  selection 201 – 202
  tests 204 – 205
  see also specific bacteria
Antibiotic therapy 187 – 202
  chemoprophylaxis 206 – 207
  combination therapy 205 – 206
  definitions 187 – 188
  efficacy 196 – 197
  mechanisms of action 197 – 199
  pharmacokinetics 200
  side effects 200
  spectrum of action 196
  see also Antibiotic resistance; *specific infections*
Antibiotic-associated colitis 251
Antibodies 44, 45 – 46, 100, 139
  antinuclear (ANA) 139
  antiviral protection 402
  autoantibody responses 110 – 111
  combining site 140
  Fab 52, 140 – 141
  Fc fragment 53, 140
  monoclonal 69, 70
  toxic 120
  see also Immunoglobulins
Antibody assays 121 – 129
  agglutination reaction 123 – 125
  amebosis 506
  complement fixation test (CFT) 125
  enzyme immunoassay

(EIA) 128 – 129
HIV antibody detection 453
immunofluorescence 125 – 128
direct 125 – 126, 127
indirect 127 – 128
immunoprecipitation in liquids and gels 121 – 123
double diffusion technique 121 – 122, 141
immunoelectrophoresis 122 – 123, 124
immunoprecipitate 121
nephelometry 122
radial immunodiffusion technique 122, 123
Western blotting 123, 125
leptospirosis 329 – 330
malaria 531
radioimmunoassay (RIA) 128 – 129
syphilis 321 – 322
antilipoidal antibodies 321 – 322
antitreponema antibodies 322
Antibody-dependent cellular cytotoxicity (ADCC) 85, 139
Anticodon 179
Antigen assays 121 – 129, 217, 409
agglutination reaction 123 – 125
amebosis 506
complement fixation test (CFT) 125
coproantigen detection 506, 622
enzyme immunoassay (EIA) 128 – 129
fungal infections 356
HIV antigen detection 453
immunofluorescence 125 – 128
direct 125 – 126, 127
indirect 127 – 128
immunoprecipitation in liquids and gels 121 – 123
double diffusion technique 121 – 122, 141
immunoelectrophoresis 122 – 123, 124
immunoprecipitate 121
nephelometry 122
radial immunodiffusion technique 122, 123
Western blotting 123, 125
malaria 531
radioimmunoassay (RIA) 128 – 129
Antigen presentation 60 – 62, 65
Antigen presenting cells (APC) 62 – 63, 65, 74, 76, 78, 92
distribution 48
Antigen recognition 52
Antigen-binding sites (ABS) 44, 53, 139
Antigenic shift 460
Antigenic variation 14 – 15, 489
Antigens 44 – 45, 67 – 68, 139
epitopes 68
self antigens 92
superantigens 14, 17, 72
T help-dependent 68,144
type 1 T-independent (TI1) 68
type 2 T-independent (TI2) 68
see also Antigen assays
Antiglobulin tests 124 – 125
Antilipoidal antibodies 321 – 322
Antimalarial drugs 533 – 534
drug combinations 534
resistance to 532
Antiphagocytosis 13
Antiseptic measures 35
Antitreponema antibodies 322
Apalcillin 193
Apicomplexa 477
Apicoplast 509
Apoptosis 392, 393
Arachnida 606, 607 – 612
see also specific parasites
Arboviruses 442
Arcanobacterium hemolyticum 261
Archaea 5
killing of 35
Archaeopsylla erinacei 618
Arenaviruses 383, 462 – 464
clinical picture 463
diagnosis 464, 644, 645, 650
epidemiology 464
pathogenesis 463
pathogens 463
prevention 464
Artemether 533, 534
Artemisinin 533
Artesunates 533
Arthritis
Lyme disease 326, 327
polyarthritis 115
septic 654
Arthropods 7, 606 – 607
classification 606
zoonoses 29, 30
see also specific parasites
Arthrospores 351
Arthus reaction 114
Arylaminoalcohols 533
Ascaridida 545
Ascaris lumbricoides (ascariosis) 544, 577 – 579
clinical manifestations 578 – 579
control 579
diagnosis 579, 626, 634, 640
epidemiology 578
life cycle 577, 578
morphology 577
occurrence 577
pathogenesis 578 – 579
intestinal phase 579
larval migration 578 – 579
therapy 579
Ascospores 352
Aseptic measures 35
Aspergilloma 365
Aspergillus (aspergillosis) 354, 364 – 366, 372
cerebral 365
clinical pictures 365
culture 364
diagnosis 365
cardiovascular system 647
cutaneous infection 652
ear infection 658
eye infections 656, 657

nervous system 645, 646
respiratory tract 633, 634
flavus 364
fumigatus 354, 364, 365
morphology 364
pathogenesis 364
respiratory tract infection 365
therapy 366
Asthma 353
Astigmata 606, 612
Astroviruses 383, 438, 439
clinical picture 439
diagnosis 439, 638
epidemiology 439
pathogenesis 439
Athlete's foot 374
Atopia 109, 139
Atovaquone 533, 534, 535
Attachment pili 158
Autoantibody responses 110 – 111
Autoimmune disease 113
see also Immunopathology
Autoimmunity 43 – 44, 110 – 111
mechanisms 111
Autologous 139
Autosomes 139
Avidity 139
Axostylata 477
Azithromycin 191
Azlocillin 193
Azoles 356
Aztreonam 192

B

B cells 45 – 46, 67 – 71
antigen presentation 63
antigen recognition 52
clonal selection theory 67
interactions 72 – 75
maturation 47
memory 94 – 96
proliferation 69 – 69
T-independent responses 69 – 71
tolerance 93 – 94
B-cell attractant (BCA-1) 83
B-cell lymphoma 69
B-cell receptor 45 – 46, 48 – 50
genetic rearrangement 55
Babesia (babesiosis) 538
diagnosis 649
divergens 538
microti 538
Bacillary angiomatosis 334, 649
Bacillus
anthracis 220, 244 – 245
culture 245
diagnosis 651
morphology 245
pathogenesis 245
see also Anthrax
cereus 638
eye infections 656, 657
Bacitracin 194
mechanism of action 198
Bacteremia, transitory 10
Bacteria 5 – 6
adhesion 11 – 12
classification 218 – 219
culture *see* Bacterial culture
diagnosis *see* Laboratory diagnosis
fine structure 148 – 160
forms 146 – 148, 149
L-forms 156 – 157, 196
genetic variability 170 – 179
antibiotic resistance 201
intercellular mechanisms 174 – 179
molecular mechanisms 171 – 173
gram-negative 222 – 226
attachment pili 158
cell wall 154 – 157
virulence protein secretion 17
gram-positive 220 – 222
cell wall 152 – 154
growth 165
host immunity evasion 7 – 8, 12 – 15, 102
nonspecific immunity 12 – 13
specific immunity 13 – 15
identification of 214 – 218
bacterial antigen detection 217
chemical characteristics 215
diagnostic animal tests 217
molecular methods 216 – 217
morphological characteristics 214, 215
physiological characteristics 214, 215
see also Laboratory diagnosis
invasion and spread 12
killing of
kinetics 35 – 36
phagocytosis 23
metabolism 160 – 164
anabolic reactions 163
catabolic reactions 161 – 163
metabolic regulation 164
types of 160 – 161
molecular genetics 166 – 170
morphology 146 – 148
nomenclature 228
normal flora 24 – 25
nosocomial infections 343, 344
pathogenicity 7 – 11
genetics of 20 – 21
problem bacteria 24, 201
spores 159 – 160
taxonomy 218 – 219
toxins 15, 16 – 17
typing 186
virulence 7 – 11
regulation of 18 – 20
zoonoses 28, 29
see also specific bacteria
Bacterial culture 164, 212 – 214
bacterial mass 166
cell count 165 – 166
conditions required for growth 214
growth curve 165
nutrient media 164, 212, 213
proliferation forms 212 – 214
see also specific bacteria
Bacterial peliosis hepatis/splenica 334
Bactericidal activity 196
Bacteriophages 175, 182 – 186

burst size 185
composition 183
definition 182
importance of 186
latency period 185
lysogeny 186
morphology 182 – 183
release from host cell 185
reproduction 184 – 185
Bacteriostasis 196
Bacteroidaceae 24, 225, 317 – 319
classification 317
clinical pictures 318
culture 317
diagnosis 318
epidemiology 319
morphology 317
occurrence 317
pathogenesis 317 – 318
prevention 319
therapy 318
Bacteroides spp. 225, 317, 319
Balamuthia (balamuthiosis) 507
mandrillaris 507
Balantidium coli (balantidosis) 542
Bang's disease *see Brucella* (brucellosis)
Bartonella 227, 334 – 335
bacilliformis 227, 334
diagnosis 649
claridgeia 227, 334, 649
classification 334
clinical pictures 334
culture 334
diagnosis 335
epidemiology 335
henselae 227, 334, 649
morphology 334
quintana 227, 334, 613
therapy 335
Basal body 158
Basidiospores 352
BCG vaccine 268
Beard ringworm 374
Bedbug 616
Bence-Jones proteins 69, 139
Benzyl penicillin 193
Betalactam antibiotics 187, 189 – 193
chemical structures 195
mechanisms of action 198, 199
resistance mechanisms 202
Biguanides 533
Bilharziosis *see Schistosoma* (schistosomosis)
Bioburden 35
Biofilm 158 – 159, 234
Biopsies 624
Bipolaris spp. 354, 369
BK virus 415 – 416
clinical picture 415 – 416
diagnosis 416
pathogenesis 415 – 416
Blastocystis hominis 504 – 505
diagnosis 639
Blastomyces
brasiliensis 361
dermatitidis 354, 361
diagnosis 657
Blastomycoses
North American 354, 361
diagnosis 361
therapy 361
South American 354, 361
diagnosis 361
therapy 361
see also Blastomyces
Blastospores 351
Blood flukes *see Schistosoma*
Blood sampling 210, 622
Boeck's sarcoid, diagnostic test 99
Bone infections 653 – 654
Bone marrow 62
B cell maturation 47
dendritic cells 62
transplantation 116
Bordetella 313, 315 – 316
bronchiseptica 315
parapertussis 315
pertussis 225, 313, 315
culture 315
diagnosis 316, 632
morphology 315
pathogenesis 315
virulence regulation 19, 315
see also Whooping cough
Bornholm disease 653
Borrelia 324 – 328
afzelii 226
burgdorferi 28, 226, 324, 326 – 328
classification 326
culture 326
diagnosis 327, 645, 651
morphology 326
pathogenesis 326 – 327
see also Lyme disease
clinical picture 325
culture 325
diagnosis 325, 649
duttonii 226, 324 – 326, 649
epidemiology 325 – 326
garinii 226
hermsii 226, 324 – 326
morphology 324
pathogenesis 325
prevention 325 – 326
recurrentis 226, 324 – 326, 613, 649
relapsing fevers 324 – 326
significance 324
taxonomy 324
therapy 325
Botulinum neurotoxin 250
Botulism 246, 250
clinical picture 250
diagnosis 250, 646
epidemiology 250
infant botulism 250
prevention 250
therapy 250
wound botulism 250
see also Clostridium botulinum
Brachycera 606, 616 – 617
bite reactions 616
myiasis 617
role as vectors 616
Brazilian purpuric fever 303
Brill-Zinseer disease 332
BRO penicillinases 278
Bronchiolitis 467, 632
Bronchitis 632
Bronchoalveolar lavage (BAL) 209
Bronchopneumonia 240
Bronchus-associated lymphoid tissue (BALT) 48
Brucella (brucellosis) 28, 225, 313 – 314
abortus 225, 313, 648
canis 225
classification 313
clinical picture 314

culture 313
diagnosis 314, 645, 648
epidemiology 314
transmission 28
melitensis 225, 313, 648
morphology 313
occurrence 313
pathogenesis 314
prevention 314
suis 225, 313, 648
therapy 314
Brucellosis *see Brucella* (brucellosis)
Brugia 588 – 593
clinical manifestations 588 – 590
acute symptomatic infection 588
asymptomatic infection 588
chronic symptomatic infection 590
tropical, pulmonary eosinophilia 590
control 590 – 593
diagnosis 590, 649
epidemiology 588
life cycle 588
malayi 588, 589, 592, 649
occurrence 588
pathogenesis 588
therapy 590
timori 589
Bubonic plague 290
see also Plague
Bugs 606, 616
bedbug 616
swallow bug 616
Bullous impetigo 233
Bunyaviruses 383, 460 – 462
clinical picture 461
diagnosis 462, 644, 645, 650
epidemiology 462
pathogenesis 461
pathogens 461
prevention 462
Burkholderia
cepacia 224, 310
mallei 224, 310 – 311
diagnosis 648
pseudomallei 224, 311
diagnosis 648
Burkitt lymphoma 424
Bursa fabricii 139

C

C3b inactivator 139
C domain 139
Cachexin 82
Caliciviruses 383, 438, 439 – 440
clinical picture 439
diagnosis 440, 638
epidemiology 440
California encephalitis 461
Calymmatobacterium granulomatis 223, 305
diagnosis 637
Campylobacter 306 – 307
classification 306
clinical pictures 306
culture 306, 307
fetus 226
jejuni 226, 306 – 307
diagnosis 307, 638
epidemiology 307
pathogenesis 306
morphology 306
therapy 307
Canaliculitis 259
Candida (candidiasis) 354, 362 – 364
albicans 354, 362 – 364
culture 363
morphology 363
pathogenesis 363 – 364
clinical pictures 363 – 364
diagnosis 364
cardiovascular system 647
cutaneous infection 652
ear infection 658
eye infections 655, 656, 657
nervous system 644, 646
respiratory tract 633, 634
urogenital tract 636
therapy 364
Candidiasis *see Candida* (candidiasis)
Capnocytophaga spp. 305
Capping 139

Tularemia 313, 316
diagnosis 648
Tumor immunity 107–108
Tumor necrosis factor (TNF) 82
in malaria 528–529
Tumor transformation 392, 394
carcinogenic retroviruses 394–396
DNA tumor viruses 396
Tunga penetrans (tungaosis) 618, 619–620
biology 619
clinical manifestations 620
diagnosis 620, 653
morphology 619
prevention 620
therapy 620
Turicella otitidis 261
Typhoid fever 280, 282, 286
clinical picture 285
diagnosis 285, 639
epidemiology 287
therapy 285–287
see also Salmonellae
Typhus 330, 332, 613
epidemiology 331
Tyroglyphus 612
Tyrophagus 612

U

Ulcers
acute necrotic ulcerous gingivostomatitis 631
duodenal 307, 638
gastric 307, 638
Ulcus molle 303
diagnosis 637
Ureaplasma urealyticum 228, 340, 341, 342
diagnosis 635
Urethral syndrome 635
Urethritis 292, 338, 339, 482
diagnosis 635
non-gonococcal (NGU) 339
Urethrocystitis 292, 635
Urinary tract infection *see* Urogenital infections
Urine sampling 210, 623
Urogenital infections 295
cervicitis 636
chlamydiae 336, 339
diagnosis 210, 623, 635–637
E. coli 292–293
endometritis 636
listeriosis 636
microsporidiosis 635
mycoplasmas 341
nephropathica epidemica 461, 635
nosocomial infections 344
oophoritis 636
pelveoperitonitis 636
prostatitis 635
pyelonephritis 292, 635
salpingitis 636
schistosomiasis 636
tuberculosis 635
urethritis 292, 339, 482, 635
urethrocystitis 292, 635
vaginitis (vaginosis) 252, 254, 482, 636
venereal diseases 637
see also specific diseases
vulvovaginitis 364, 636
see also specific infections
