Index

Note: Page numbers set **bold** or *italic* indicate headings or figures, respectively.

A

Abductor digiti minimi (ADM) 120, 299
– to recurrent motor branch transfer **153**, *154*
Abductor digiti quinti (ADQ) 595
Abductor pollicis brevis (APB) 254, 587
Abductor pollicis longus (APL) 345
Accelerated nerve regeneration and FK-506 (tacrolimus) **32**, *33–34*
Accessory nerve
– in partial middle trunk nerve transfer 490
– in thoracic outlet syndrome surgery *383*
– injury **471**
– palsy 494, *512*
– to musculocutaneous nerve transfer **485**
– to suprascapular nerve transfer 134, 486
Acellularized nerve allograft (ANA) **118**, *127–129*, 220, **226**, *227–229*, *231–233*, 235, 241, 243, **244**, 245, *247*
Acetylcholine receptor 40
Action potentials, *see* Compound muscle action potentials (CMAPs); Motor unit action potentials (MUAPs); Sensory nerve action potentials (SNAPs)
Activator protein 1 (AP-1) transcription factor 23
Adenosine triphosphate (ATP) 30
Adipose lesions of nerve **643**
– lipomas **643**
– lipomatosis of nerve **644**, *646–655*
ADM, *see* Abductor digiti minimi (ADM)
ADQ, *see* Abductor digiti quinti (ADQ)
Adson test 377, 380, 385
AIN, *see* Anterior interosseous nerve (AIN)
Allograft, nerve **117**, *126–127*
– *See also* Conduits, nerve; Grafting, nerve
– acellularized nerve allografts 220, **226**, *227–229*, *231–233*
– Schwann cell migration in *127*
Amplitude of evoked response *83*, **83**
ANA, *see* Acellularized nerve allograft (ANA)
Anatomical variations **300**
Ancient theories of nerve surgery **1**
Anesthesia dolorosa 689
Animal electricity 2
Anterior interosseous motor nerve graft *121*
Anterior interosseous nerve (AIN) 103, 153, 173, **280**, *291–292*
– restoration of AIN function *144*, *147–148*, **165**, *168–172*
Anterior interosseous-to-ulnar motor nerve transfer **176**, *179–183*
Anterior tarsal tunnel syndrome 429
– *See also* Tarsal tunnel syndrome
Anterior transmuscular transposition **311**, *313–324*
Anterior transposition, alternative techniques for **315**
Anterosuperior iliac spine (ASIS) 403
AP-1 transcription factor, *see* Activator protein 1 (AP-1) transcription factor
APB, *see* Abductor pollicis brevis (APB)
APL, *see* Abductor pollicis longus (APL)
Arcade of Frohse 68, 345, *352*, *354*
Arcade of Struthers **301**, *302*
Area of evoked response *83*, **83**
Arginase-1 23, *23*
Arrhenius, Svante 2
Artemin (ARTN) 28
Arterial graft 218
ARTN, *see* Artemin (ARTN)
ASIS, *see* Anterosuperior iliac spine (ASIS)
ATN, *see* Auriculotemporal nerve (ATN)
ATP, *see* Adenosine triphosphate (ATP)
Auriculotemporal nerve (ATN) *668*, **668**
Autograft **115**, *116–126*
– *See also* Grafting, nerve
Avance 226
– *See also* Acellularized nerve allograft (ANA)
Axillary branch recipients, choice of **366**
Axillary nerve entrapment and injury: introduction **362**
– diagnosis and physical examination **365**
– key surgical anatomy **363**, *364*
Axillary nerve injury
– closed **366**
–– axillary branch recipients, choice of **366**
–– electrodiagnostic studies, use of *366*, **366**
–– medial triceps to axillary nerve transfer **366**
–– triceps branch donor, choice of **366**
– diagnosis and physical examination **365**
– key surgical anatomy **363**, *364*
– open **365**
– surgical management of **367**
–– sensory reconstruction **367**
–– surgical technique **367**, 368, *368–369*
Axillary nerve palsy, management of **365**
Axillary nerve transfers, postoperative care for **367**
Axillary neuropathy, etiology of **363**
– brachial plexus–associated axillary palsy **365**
– compression neuropathy **365**
– fractures **364**
– shoulder dislocation **363**
– shoulder surgery **365**
Axon discontinuity conduction block 89
Axon loss **88**, *89–90*
– *See also* Wallerian degeneration
Axonal transport **30**
Axonopathy/axonotmetic injury 81
Axonotmesis 102–103

Botox (onabotulinumtoxinA) 679
BPBI, *see* Brachial plexus birth injury (BPBI)
Brachial neuritis, *see* Neuralgic amyotrophy; Parsonage–Turner syndrome
Brachial plexopathy, radiation-induced **470**
Brachial plexus 67
– exploration of *472*, **472**, *473–478*
– exposure of **539**
Brachial plexus birth injury (BPBI) **535**
– adjunctive management **543**
– etiology **535**
– evaluation **536**
–– perinatal history **536**
–– physical examination *537*, **537**, 538
– global functioning and patient-reported outcomes **548**
– nerve transfers **546**
–– as a complete treatment for C5–C6 injuries **547**
–– contralateral C7 transfer **547**
–– for elbow flexion **546**
–– for shoulder abduction and external rotation **546**
– neurolysis versus neuroma resection and interpositional nerve grafting, outcomes of **544**
– nomenclature **536**
– operative management **539**
–– neuroma resection **540**
–– operative preparations **539**
–– postoperative management **543**
–– sural nerve harvest **539**
– outcome assessment **544**, *545*
– preoperative planning **538**
– primary brachial plexus exploration, indications for 538, **538**
–– preoperative radiologic evaluation **539**
– sensory outcomes **547**
Brachial plexus injuries **456**
– diagnosis of **465**
–– CT myelography **467**
–– electrodiagnostic studies **467**
–– history **465**
–– magnetic resonance imaging **467**
–– physical examination **465**
–– radiographic studies **467**
– epidemiology of **463**
–– root avulsion *464*, **464**, *466*
– hand function **499**
–– complete pan plexus injuries **499**
–– lower plexus injuries **500**, *524*
– hand function, specific procedures to restore **501**
–– contralateral partial C7–to-median nerve transfer with vascularized ulnar nerve graft **501**, *525*
–– intercostal nerve(s)-to-sural nerve graft **503**
–– muscle transfers **507**
–– secondary procedures **508**
–– sensory nerve transfers **504**, *526–528*
– historical review of **456**
– management principles of **468**
–– accessory nerve injury **471**
–– closed injuries **472**
–– complete plexus injuries **479**
