Contents

1 Clinical Characteristics of Breast Cancer 1
Th. Wobbes

Physiological Lumps and Tenderness 2
Mastalgia 2
Nodularity 2
Dominant Lumps 3
Breast Cancer 3
Nipple Discharge 3
Fibroadenoma 3
Cysts 3
Inflammation and Infections 4
Skin and Nipple Changes 4

2 Anatomy 5
J. H. C. L. Hendriks, D. J. Dronkers, and G. Rosenbusch

Mammary Gland 7
Fasciae and Connective Tissue 9
Parenchymal Pattern and Skin Pattern 9
Arteries, Veins, Lymphatics 10
Physiological Changes of the Breast 12
Embryology and Anomalies 12

3 Benign and Malignant Disorders of the Breast 15
R. Holland, G. Rosenbusch, J. H. C. L. Hendriks, and D. J. Dronkers

Benign Disorders 16
Fibrocystic Disease 16
Cysts 16
Epitheliosis 18
Adenosis 18
Radial Scar 19
Benign Tumors 20
Fibroadenoma 20
Phyllodes Tumor 20
Intraductal Papilloma 20
Juvenile Multiple Intraductal Papilloma 21
Lipoma 21
Fibroadenolipoma 21
Rare Benign Tumors 21
Inflammation and Abscesses 21
Duct Ectasia 22
Mondor Disease 22
Hematoma 22
Fat necrosis 22
Carcinoma in Situ and Invasive Carcinoma 22
Carcinoma in Situ 22
Ductal Carcinoma in Situ (DCIS) 22
Lobular Carcinoma in Situ (LCIS) 24
Invasive Breast Cancer 25
Invasive Ductal Carcinoma (IDC) 25
Invasive Lobular Carcinoma (ILC) 27
Invasive Tubular Carcinoma 28
Invasive Medullary Carcinoma 29
Invasive Mucinous (Colloid, Gallertous) Carcinoma 31
Rarely Occurring Carcinomas 31
Papillary Carcinoma, Intraductal 31
Intracystic Carcinoma 31
Paget Disease of the Nipple 32
Inflammatory Carcinoma of the Breast 33
Unilateral Multifocality and Multicentricity 33
Bilateral Occurrence 33
Metastases in the Breast 34
Locally and Regionally Recurrent Carcinomas 34
Pregnancy and Breast Cancer 34
Growth Rate of Breast Carcinoma 35
Missed, Mammographically Occult and Interval Cancer 35
Missed Carcinoma 35
Mammographically Occult Carcinoma 36
Interval Cancers 36

4 Epidemiology and Treatment of Breast Cancer 39

Epidemiology and Risk Factors 40
B.-P. Robra, A. L. M. Verbeek, and Natalie McGauran
Epidemiology 40
Risk Factors 41
Other Possibly Causal Factors 44
Prevention 44
Treatment 45
J. Hoogenhout, Th. Wobbes, W. J. Hoogenraad, and L. V. A. M. Beex
Curative Therapy 45
Palliative Therapy 51
Ductal Carcinoma in Situ 53
Lobular Carcinoma in situ 54
Breast Cancer in Older Women 54
Interdisciplinary Cooperation in Diagnostic Procedures and Treatment 54
D. J. Dronkers
Team of Experts ("Breast Team") 54
Sequence of Work-up 54
Cooperation during Surgery 55
Feedback of Histopathological Findings to the Radiologist 55
Quality Assurance and Control 55
Patient Self-help Groups 55

5 Physical and Technical Aspects of Mammography 59

Introduction 60
M. A. O. Thijssen
The Imaging Chain 60
Definitions 61
Image Quality 62
Medical Quality Criteria of X-ray Mammography . 63
M. Säbel
Resulting Demands on Radiological Imaging Systems 64
H. Aichinger
Sharpness 64
Contrast 64
Noise 65
Image Quality Figure 66
Dose 66
The Effect of the Radiographic Imaging System on Dose, Contrast, Resolution, and Noise 66
H. Aichinger
Contrast 66
Dose 68
Compression 69
Antiscatter Grid 69
Sharpness 70
The Effect of the Image Receptor on Dose, Contrast, Resolution, and Noise 71
T. von Volkmann
Composition of Mammography Films 71
Structure of Intensifying Screens 71
Characteristic Curve 71
Speed of the Film–Screen System 71
Density of the Mammogram 73
Radiographic Contrast 74
Image Blur 76
Noise 77
Summary 78
The Importance of Constancy and Reproducibility of the Entire Imaging System .. 80
H. Aichinger
Automatic Exposure Control 80
The Role of the Viewbox and Viewing Conditions 83
T. von Volkmann, M. A. O. Thijssen, and A. Stargardt
European Quality Assurance Guidelines for Mammography Screening 83
Luminance of the Viewbox 84
Illuminance of Ambient Light 84
Masking 85
A New Digital Film-Reading Modality 85
D. J. Dronkers and G. Rosenbusch
Possible Digital Image Receptors 85
H. Aichinger
Digital Detectors (Full-field Mammography) . 86
Image Processing 90
Computer-aided Reading of Mammograms 90
N. Karssemeijer
Radiation Exposure 92
M. Säbel
Quality Assurance 93
H. Aichinger, M. Säbel, and M. A. O. Thijssen
Quality Control Regarding ACR and EPMS 93

6 Positioning in Mammography 97
Henny Rijken

Technical Aspects 98
Equipment 98
Ergonomics 98
Film processing 98
Tasks of the Radiologic Technologist (Radiographer) within the Breast Imaging Team . 98
Technical Quality Control 98
Social Skills 99
Introduction to the Examination 99
Positioning 100
Compression 100
Placement of Automatic Exposure Control (AEC) Detector 100
Anatomical Basis for Mammographic Projections 100
Positioning 101
Standard Projections 101
Craniocaudal (CC) View 101
Mediolateral Oblique (MLO) View 109
Most Important Additional Projections 116
Lateral Projections (Mediolateral, Lateromedial) 116
Spot and Magnification Views 118
Extended CC View ("Cleopatra View") 120
Less Frequently Used Additional Projections ... 121
Axillary View 121
Tangential View 121
Caudocranial View 121
Views with Recumbent Patients 121
Mammographic Positioning in Males 121
Mammography in Women with Breast Implants 121
General Quality Criteria for Mammograms 122
Final Remarks 123

7 Supplemental and Advanced Examinations 125

Magnification Mammography 126
J. H. C. L. Hendriks and G. Rosenbusch
Percutaneous Diagnostic Procedures, Preoperative Localization, and Specimen Radiography 130
D. J. Dronkers
Percutaneous Diagnostic Procedures 130
Diagnostic Puncture of Cysts 130
Fine-Needle Aspiration (FNA) for Cytology .. 130
Histological Core-Needle Biopsy 132
Image Guidance Modalities in Nonpalpable Lesions 137
Sonographic Guidance 137
Stereotactic Mammographic Guidance 138
Radiology Support for Surgical Excisional Biopsy 142
Preoperative Localization (Marking) 142
Specimen Radiography 145
Galactography 147
J. H. C. L. Hendriks and G. Rosenbusch
Pneumocystography 148
J. H. C. L. Hendriks and G. Rosenbusch
Computed Tomography 149
J. H. C. L. Hendriks and G. Rosenbusch
Sonography of the Breast 151
Harmine M. Zonderland
Technical Considerations and Imaging Technique 151
Technical Considerations 151
Imaging Technique 151
Interpretation of Sonographic Images 153
Normal Anatomy 153
Lesion Characteristics 153
Cystic Lesions 155
Solid Lesions, Benign and Malignant Characteristics 156
Doppler Sonography 160
Indications for Sonography 162
Differentiation between Cystic and Solid Lesions 162
Indeterminate Mammographic Results 163
Palpable Lesion Not Visible with Mammography 163
Nonpalpable Lesion Visible with Mammography 167
Evaluation of Benign Lesions 167
Young Patients and Pregnancy 167
Puerperal and Nonpuerperal Mastitis 168
The Contribution of Sonography 168
Summary 169
Magnetic Resonance Imaging 170
Sylvia H. Heywang-Köbrunner and Carla Boetes
Obsolete Methods 180
J. H. C. L. Hendriks
Transillumination 180
Thermography 180

8 Mammographic Findings and Their Interpretation 183

Strategy for Viewing the Mammogram 184
Petra A. M. Bun
Circumscribed Lesions 187
J. W. Th. Muller
Nodular Lesions 187
Nodular Lesions with Well-defined Margins . 188
Nodular Lesions with Ill-defined Margin 191
Stellate Lesions 193
Mammographically Occult Cancers 194
Calcifications 199
Petra A. M. Bun
Analysis of Calcifications 199
Benign Macrocalcifications 200
Benign Microcalcifications 201
Malignant Microcalcifications 207
Architectural Distortion and Asymmetry 209
D. J. Dronkers
Changes of the Skin 215
D. J. Dronkers
Lymph Nodes 217
D. J. Dronkers
Axillary Lymph Nodes 217
Intramammary Lymph Nodes 219
Mammographic Findings after Surgery and Radiation Therapy 219
Harmine M. Zonderland
Excisional Biopsy and Breast-conservation Therapy 219
Skin Thickening and Edema 220
Scar 222
Hematoma and Seroma 222
Fat Necrosis and Fibrosis 222
Radiotherapy 224
Locoregional Recurrence 224
Breast Reduction 225
Breast Augmentation 225

9 Breast Cancer Screening 235
D. J. Dronkers, J. H. C. L. Hendriks, B.-P. Robra, and A. L. M. Verbeek

Results of Breast Cancer Screening Programs 236
European Guidelines 237
Theoretical Basis for Screening Programs 238
Operational Models of Mammography Screening 242
Practical Advice on the Execution of a Screening Program 242
Interpretation, Double Reading 243
Radiation Risk 244
Analysis of Cost–Benefit and Cost-Effectiveness .. 244
Interval Cancers 245
Conclusion 250

10 Diagnosis of Breast Diseases in Males 251

Benign and Malignant Changes of the Male Breast 252
Th. Wobbes and L. V. A. M. Beex
Gynecomastia 252
Breast Cancer 252
Mammography of the Male Breast 253
D. J. Dronkers

11 Retrospective View of Diagnostic Radiology of the Breast 255
J. H. C. L. Hendriks and G. Rosenbusch

Index 259
