Index

Note: Illustrations are comprehensively referred to in the text. Therefore, significant material in illustrations has usually been given a page reference only in the absence of its concomitant mention in the text referring to that figure. Page references to tables are in bold and those to figures are in italics. Abbreviations are listed at the beginning of the book (pp. VII–IX).

A

a-wave *102*, 102–103
  abnormalities **104**
    constrictive pericarditis 205
    restrictive cardiomyopathy 175
    RV infarction 196
abciximab 328, 329, 331
abdominal aorta, angiography 94
Absorb Stent 281
absorbable/bioabsorbable materials
  scaffolds 281–284
  stents 270
    drug-eluting 281
ACC/AHA criteria, coronary lesion morphology **186**
access (vascular) 25–37
  in aortic dissection 215, 216
  in aortic valve implantation 374
  arterial *see* arterial access
  venous *see* venous access
  see also puncture
Accunet filter system 320
acetylcholine in provocation test, vasospastic angina 66
acetylsalicylic acid (ASA) *see* aspirin
AcuNav ultrasound catheter 342
acute coronary syndromes 192–194, 289–295, 330–331
  antithrombotic drugs 291, 330–331
  coronary angiography 192–194, 292
  PCI *see* percutaneous coronary interventions
  Takotsubo cardiomyopathy vs. 180
adenosine in assessment of functional severity of stenosis 338–339, **339**
advancer (drive unit) of rotablator 300
afterload reduction with intra-aortic balloon pump 346, 347, 348
AHA *see* American Heart Association
air injection (and embolism)
  in coronary angiography 62
  in ventriculography 75–76
akinesis 76, 77
alcohol septal ablation (ASA; TASH; PTSMA) 170, 170–172
allergic reactions to contrast media 20–21
American Heart Association, coronary segments classification *187*
American Heart Association/American College of Cardiology, coronary lesion morphology **186**
amidotrizoate, structure 19
Amplatz catheter 41, 45–46
  in aortic stenosis 140–141
    in valvuloplasty 369
  in PCI guidance 247
Amplatz GooseNeck snare 398
Amplatz technique 45–46
Amplatz thrombectomy 237
Amplatzer ASD septal occluder 381
  with ventricular septal rupture 199
Amplatzer Cardiac Plug 389–390, 391, 392
Amplatzer PFO occluder 384, 386
Amplatzer VSD septal occluder 199
amyloidosis 122, 173, 175
anacrotic notch and wave, pronounced **105**
anaphylactoid reactions to contrast media 20–21, 21
anatomy and anatomical variants *see specific vessel*
anesthesia
  general *see* general anesthesia
  local, for arterial access 26
aneurysm
  thoracic aorta 217–219
    coronary angiography before surgery 39
  ventricular, wall motion with 76
angina
  stable
    angiography 39
    antithrombotics in PCI for 330
  unstable 330
    angiography 39, 192–194
    antithrombotics 327, 330
  vasospastic 65–66
angioedema with contrast media 22
angiography 8–15
  aortic *see* aortography
  atrial septal defect 223
  chambers of heart 71–92
  coronary *see* coronary angiography
  projections *see* projections
  pulmonary artery *see* pulmonary angiography
  shunts 119
  system/equipment 8–15
  valvular regurgitation quantification
    aortic 150
    mitral 136
    tricuspid 157–159
  ventricular septal defect 227
Angioguard filter system 321
Angiojet 315–316
Angiolink 35
angioplasty
  balloon *see* balloon angioplasty
  laser 307–310
AngioSculpt balloon 298–299
Angio-Seal 34–35
annulus
  in aortic valve implantation, diameter assessment 374
  in mitral annuloplasty 361
  in pulmonary valvuloplasty, diameter measurement 366
anodes, rotating 13, 14
antegrade coronary collaterals 188
anterior oblique projections *see* left anterior oblique projection; right anterior oblique projection
anteroposterior (AO) projection 51
  engagement of left coronary artery 43
  pulmonary angiography *98*
antibody-coated stents 270, 281
anticoagulants 327
  in acute coronary syndromes 289
  in left atrial appendage occlusion 392
  oral *see* oral anticoagulants

in PCI
balloon angioplasty 251
stenting, postprocedural **273**
stenting, preprocedural 271
antiplatelet agents (platelet inhibitors) 327
in acute coronary syndromes 289
with concomitant PCI 292
in atrial fibrillation, in patent foramen ovale occlusion, postprocedural 386
in atrial septal occlusion, postprocedural 382
in cardiogenic shock 331
in left atrial appendage occlusion 392
most important principles *325*
in non-cardiac surgeries after stent implantation 331–332
in PCI 264, 274
post-stenting 273
preprocedural 251
preprocedural, in vein graft PCI 264
antiproliferative drugs
balloons 248
restenosis prevention 279
scaffolds 281
stents 269, 270, 281
antithrombotic drugs 324–332
specific clinical syndromes 330–331
in acute coronary syndromes concomitant to PCI 291, 330–331
types 326–330
aorta
anatomy 95
anomalies/variants 95
angiography *see* aortography
ascending *see* ascending aorta
coarctation 228–230
dilated root 44
dissection (thoracoabdominal) 214–220
acute aortic regurgitation due to 149
coronary angiography before surgery for 39, 215
intra-aortic balloon pump 346–349
laser ablation *307*
pressure 105
in aortic regurgitation **149**
in hypertrophic cardiomyopathy 169
with intra-aortic balloon pump 346, 348
in pericardial tamponade 211
thoracic *see* thoracic aorta
vein graft inserted on 47
aortic sinus *see* sinus of Valsalva
aortic valve 139–153, 368–377
crossing of 124, 140–141, 369
regurgitation 147–153
concomitant stenosis and 142
stenosis 139–147
assessing degree of 140, 374
concomitant regurgitation and 142
degenerative 368, 372
effective valve flow calculation 114
therapy **152**, 368–377
transseptal left heart catheterization 82
transcatheter implantation 372–377
aorto-coronary vein grafts *see* venous grafts
aortography (aortic angiography) 94–96
aortic coarctation 229
aortic dissection 216
aortic valve regurgitation 149, 152
sinus of Valsalva ruptured aneurysm 220
ventricular septal defect 227
aorto-ostial stenoses 260, 261, 261–262, 276, 304
area–length method
LV mass measurement 81–82
LV volume measurement 80
argatroban 327
arrhythmias
as complication
of coronary angiography 62–63
of left ventriculography 75
of pulmonary valvuloplasty 366
of right heart catheterization 91
as indication for diagnostic catheterization 4
see also specific types of arrhythmia
arrhythmogenic RV cardiomyopathy 178–179
arterial access/puncture/puncture site 26–30
in aortic dissection 215, 216
in aortic valve implantation 374
catheter selection (for coronary angiography) based on site of 47
coronary angiography 40
specific sites
brachial artery 30
femoral artery 27
radial artery 29–30
see also intra-arterial catheter fragments; puncture
arterial blood
oxygen content calculation 111
systemic *see* systemic circulation
arteriotomy 31
arteriovenous fistula 32
arteriovenous oxygen difference, calculation 111
ascending aorta
angiography 94
aortic dissection 214, 216, 217
catheter kinking 44
asepsis 7
aspiration catheters (with thrombus) 274, 311–314
vein graft 263–264
aspirin (acetylsalicylic acid; ASA) 273
left atrial appendage occlusion 392
PCI 273, 327, 330, 331
preprocedural 251, 271
stenting 271, 273, 331
asystole
in coronary angiography 63
in rotational atherectomy 304
atherectomy, rotational 262, 299–306
atheroma and atherosclerosis
longitudinal incision with cutting balloon 296
plaque
intravascular ultrasound 335
platelet activation and thrombus formation at 324
proximal, dissection risk in PCI 266
atria
angiogram, right 91
appendage occlusion, left 389–393
fibrillation 389
in aortic stenosis 142
left atrial appendage occlusion in 389–393
in patent foramen ovale occlusion 387
foreign bodies 398, 399
pressure curves/waves 102–103
constrictive pericarditis 205
mitral stenosis 128
pericardial tamponade 211, **213**
restrictive cardiomyopathy 175, **177**
RV infarction 196
tricuspid regurgitation 157, 159
septal defect 221–225, 380–383
shunt 117–118, 221, 222, 223, **225**
therapy 225, 380–383
see also chambers
Atriasept system 385

atrioventricular conduction block *see* conduction block
awake patients 7
axis method of LV volume measurement 78
Axxess stent 280, *284*

B

balanced-dominant coronary circulation 51
balloon
  carrier, for stent delivery 270
  cutting 247, 296–298
  double, in percutaneous mitral commissurotomy 360
  drug-eluting *see* drug-eluting balloons
  Inoue *see* Inoue balloon
  kissing 257, 259, 260
  materials 248–249
  scoring 247
  sizing, atrial septal defect measurement 381
balloon angioplasty, plain old (percutaneous transluminal coronary angioplasty; PTCA) 244, 245–250, 251–254
  antithrombotics during and after 329
  cutting 247, 296–298
  dilatation in *see* dilatation
  procedure 251–254
  repeat following restenosis 279
  and stent implantation
    laser angioplasty combined with 309
    rotablation combined with 301, 304
balloon catheters 247–249
  Berman angiography, in right ventriculography 90
  flow-directed, in right heart catheterization 88, 89
  in percutaneous coronary interventions (PCI) 247–249
    with intra-aortic balloon pump 348
    tortuous vessel anatomy 266
  in percutaneous valve interventions
    aortic valvuloplasty 369
    mitral commissurotomy 353, 354, 356, *357*, 358, 360
    pulmonary valvuloplasty 366
balloon-expandable stents 270, 280
balloon occlusion systems (in PCI) 318–319
  distal 318, 319, 321–322, 322
  proximal 318, 319, 322
  stenosed vein graft 263
balloon valvuloplasty *see* valvuloplasty
bare-metal stents 269, **273**, **282–283**
  antithrombotics and 331
  balloon-expandable 280
  drug-eluting balloon combined with 281
  in restenosis rate reduction 268
baskets (foreign body retrieval) 398, 399
Berman angiography balloon catheter in right ventriculography 90
β-blockers
  hypertrophic nonobstructive cardiomyopathy 169
  hypertrophic obstructive cardiomyopathy 170
bifurcation stenoses 188, 257–260
  rotablation 304
  stents 280
bioabsorbable materials *see* absorbable/bioabsorbable materials
biolimus-eluting stent 281, **287**
Biomatrix stent 281, **287**
bioprosthesis
  aortic 372–377
  tricuspid *155*, 156
biopsy, endomyocardial 122–124
  myocarditis 241
    sampling error 241
  restrictive cardiomyopathy 175
biplanar LV volume calculation 81
biplane catheterization lab 8, *9*
bivalirudin 327, 330, 331
Bland–White–Garland syndrome 64–65
bleeding prevention *see* anticoagulants
blood
  flow *see* flow
  pressure *see* pressure
  sampling in cardiac output measurement 111
    incorrect 111
blood vessels (in general), *see entries under* vascular
Bois equation and nomogram 110
brachial artery access 30
bradycardia in coronary angiography 63
Braunwald classification of unstable angina 192
Brockenbrough needle 83, 86, 87
  mitral commissurotomy 355, 356
Brockenbrough phenomenon 168
bronchospasm with contrast media 21–22
burr, rotational atherectomy 299, 300
  size 301–302
bypass graft, coronary artery *see* coronary artery bypass graft

C

c-wave 102
C7-XR OCT Intravascular imaging system 343
calcification
  coronary 68
    stenoses (= calcified or hard stenoses) 262, 272
  mitral valve 126
    commissurotomy and **353**, 362
calcium antagonists, hypertrophic obstructive cardiomyopathy 170
calibration for LV volume calculation 81
cardiac index 110
  pericardial effusion/tamponade and 207–208, 208
  pressure gradient at mitral valve dependent on 128–131
