Index

Note: Page numbers set **bold** or *italic* indicate headings or figures, respectively.

A

ACP, *see* Anterior clinoid process (ACP)
AEA, *see* Anterior ethmoidal artery (AEA)
AICA, *see* Anterior inferior cerebellar artery (AICA)
Air embolism 242
Amygdala resection 233
Amygdalohippocampectomy
– anterior selective **226**
– minimally invasive transpalpebral endoscopically assisted **229**
– paramedian supracerebellar transtentorial approach for **237**
––approach selection **239**
––common disease indications for the approach and area of exposure **238**
––description of the case **239**
––key steps of the procedure **242**
––operative setup **240**
––pertinent anatomy **238**
––pertinent risks and keys to their avoidance **242**
– surgical approaches and considerations **228**
– transtemporal **229**
Anterior clinoid process (ACP) 14, 22, 81, *83*
Anterior clinoid, endoscopic transorbital approach to **13**
– approach selection **14**
– common disease indications for technique/approach **13**
– description of the case **14**
– key steps of the procedure **15**
– operative setup **15**
– pertinent anatomy **13**
– pertinent risks and keys to their avoidance **15**
Anterior ethmoidal artery (AEA) *52*
Anterior inferior cerebellar artery (AICA) 170, 181
AR, *see* Augmented reality (AR)
Arachnoid opening 114
Area postrema syndrome 211
Arterial bleeding 194, 211
Arterial injury 41
Augmented reality (AR) 1–2

B

Basilar artery **118**
Betadine-soaked Gelfoam 10
Bipolar electrocautery 28
Bone opening 241
BRAF mutations 91
Brain relaxation, neuronavigation failure with 107
Brain retraction 234
Brainstem damage 234

C

Cadaveric dissection *170*
Caldwell–Luc approach 164–165
Callosotomy 105
Callosotomy laterality 102
Caroticoclinoid ligament (CCLi) *199*
Cavernous sinus (CS) 81
Cavernous sinus and Meckel's cave, endoscopic transorbital approach to **17**
– approach selection **19**
– common disease indications **17**
– description of the case **18**
– exposure of **17**
– operative setup **20**
– pertinent anatomy **17**
– pertinent risks and keys to their avoidance **23**
––endo-orbital phase **23**
––intracranial phase **23**
––skin phase **23**
– SMILE technique, key steps of **21**
––epineurium dissection **23**
––interdural dissection of the cavernous sinus **21**
––lateral wall of the cavernous sinus exposure **22**
––meningoorbital band cutting **21**
––sagittal crest (SC) resection **21**
Cavernous sinus exposure, lateral wall of **22**
Cavernous sinus, endoscopic endonasal transpterygoid approaches to **135–136**
– approach selection **136**
– common disease indications for the technique/approach, area of exposure **135**
– key steps of the procedure **138**
– neurologic examination **136**
– operative setup **138**
––necessary equipment: **138**
––positioning: **138**
– pertinent anatomy **136**
– pertinent risks and keys to their avoidance **138**
Cavernous sinus, endoscopic transsphenoidal approach/medial wall of **37**
– approach selection **40**
– common disease indications for the technique and area of exposure **38**
– description of the case **38**
– key steps of the procedure **40**
– operative setup **40**
– pertinent anatomy **38**
– pertinent risks and keys to their avoidance **41**
Cavitron ultrasonic surgical aspirator (CUSA) 179
CCLi, *see* Caroticoclinoid ligament (CCLi)
Cerebellar contusion 179
Cerebellar mutism syndrome (CMS) 211
Cerebellopontine angle (CPA) 182

Cerebral relaxation and preparation **217**
Cerebrospinal fluid (CSF) leak 8, 25, 41, 59, 71, 86, 114, 146, 154, 156, 173, 179, 185, 194, 199, 203, 211
Cerebrospinal fluid leak repair, endoscopic approach for **25**
– approach selection **28**
– clinical evaluation **26**
– common indications **26**
– description of the case **27**
– key steps of the procedure **28**
– operative setup **28**
– pertinent anatomy **26**
– risks and keys to their avoidance **29**
CG, *see* Crista galli (CG)
Cholesteatomas 128
Chondromas 128
Chondrosarcomas 128
Choroid plexus 96, **118**
Chronic emesis 211
CISS, *see* Constructive interference in steady state (CISS)
Clinoidectomy **81**, **84**
– approach selection **84**
– common disease indications for the technique and area of exposure **81**
– key steps of the procedure **85**
– operative setup **84**
– pertinent anatomy **82**
– pertinent risks and keys to their avoidance **86**
Clivus 197
– lower clivus 198
– middle clivus 198
CLTFA, *see* Contralateral transfalcine approach (CLTFA)
CMS, *see* Cerebellar mutism syndrome (CMS)
CNs, *see* Cranial nerves (CNs)
Colloid cyst, endoscopic resection of **95**, *96*
– common indications for endoscopic resection **95**
– description of the case **97**
– key steps of the procedure **97**
– operative setup **97**
– perioperative risks and complication avoidance **99**
– pertinent anatomy **96**
– steps, summary of **98**
– surgical approach, selection of **96**
Combined transpetrosal approach (CTPA) **149**
– approach selection **153**
– common disease indications for the technique/approach, area of exposure **150**
– description of the case **150**
– key steps of the procedure **154**
– – closure **156**
– – dural opening and tentorium cut **154**
– – mastoidectomy and combined petrosectomy **154**
– operative setup **154**
– pertinent anatomy **150**
– pertinent risks and keys to their avoidance **156**
Computed tomography (CT) 118, 176, 191, 209
Computed tomography angiogram (CTA) 84
Constructive interference in steady state (CISS) 178
Contralateral transfalcine approach (CLTFA) 215, **215**
– approach selection **217**
– common disease indications for the technique/approach: area of exposure **215**
– description of the case **216**
– key steps of the procedure **217**
– – cerebral relaxation and preparation **217**
– – craniotomy and superior sagittal sinus management **217**
– – durotomy and exposure **218**
– – falx transection **218**
– – lesion-specific surgical strategy **219**
– operative setup **217**
– pertinent anatomy **216**
– pertinent risks and keys to their avoidance **219**
– – falx transection and protection of neurovascular structures **219**
– – falx transection, surgical considerations for **219**
Corticospinal tract (CST) 215–216
CPA, *see* Cerebellopontine angle (CPA)
CPs, *see* Craniopharyngiomas (CPs)
Cranial entry 71
Cranial nerve injury 41, 146
Cranial nerves (CNs) 175, 181
Craniocervical instability 194
Craniopharyngioma, endoscopic endonasal approach for **91**
– approach selection **92–93**
– common disease indications for the technique and area of exposure **91**
– description of the case **92–93**
– key steps of the procedure **92–93**
– operative setup **92–93**
– pertinent anatomy **92–93**
– pertinent risks and keys to their avoidance **93–94**
Craniopharyngiomas (CPs) 56
Craniotomy 10, *105*, 154
– and superior sagittal sinus management **217**
Crista galli (CG) *52*
CS, *see* Cavernous sinus (CS)
CSF leak, *see* Cerebrospinal fluid (CSF) leak
CST, *see* Corticospinal tract (CST)
CT, *see* Computed tomography (CT)
CTA, *see* Computed tomography angiogram (CTA)
CTPA, *see* Combined transpetrosal approach (CTPA)
CUSA, *see* Cavitron ultrasonic surgical aspirator (CUSA)

D

Dandy's theory 181
Dandy's vein 179
DAPT, *see* Dual antiplatelet therapy (DAPT)

from: Jean C. Walter et al, The Art of Refractive Cataract Surgery (9781684206391)

Doppler ultrasound 165
Dorello's canal 170
Draf classification for frontal sinus dissection *27*
Dual antiplatelet therapy (DAPT) 78
Duraplasty 71
Durotomy 173, 185
– and exposure **218**

E

E-MVD, *see* Endoscopic microvascular decompression (E-MVD)
EAC, *see* Extradural anterior clinoidectomy (EAC)
EAFV, *see* Endoscopic approach to the fourth ventricle (EAFV)
EASOA, *see* Endoscope-assisted supraorbital approach (EASOA)
EBV–negative, *see* Epstein–Barr virus (EBV)–negative
EEA, *see* Endoscopic endonasal approach (EEA)
EETPA, *see* Endoscopic endonasal transpterygoid approach (EETPA)
ELITE procedure, *see* Extreme Lateral Infrajugular Transcondylar Transtubercular (ELITE) procedure
Encephalocele 28
Endocrine dysfunction 60
Endocrinopathy 41
Endonasal Doppler 41
Endoscope-assisted supraorbital approach (EASOA) 7
– approach selection **8**
– common disease indications for the technique/approach **7**
– description of the case **8**
– key steps of the procedure **9**
– operative setup **9**
– pertinent anatomy **8**
– pertinent risks **10**
Endoscopes 1
Endoscopic approach
– for cerebrospinal fluid leak repair **25**
– to Meckel's cave **43**
Endoscopic approach to the fourth ventricle (EAFV) 205, **205**, 209
– approach selection **209**
– common disease indications and area of exposure **205**
– description of the case **209**
– key steps of the procedure **210**
– operative setup **210**
– pertinent anatomy **206**
– pertinent risks and keys to their avoidance **211**
Endoscopic endonasal approach (EEA) 33, 55, 127, 131, 197
– for craniopharyngioma **91**
– for optic nerve decompression **61**
– to infratemporal fossa **161**
– to sella turcica **33**
Endoscopic endonasal transcribriform/transplanum approach **51**
– approach selection **53**
– common disease indications for the technique/approach **51**
– description of the case **53**
– key steps of the procedure **53**
– operative setup **53**
– pertinent anatomy **52**
– pertinent risks and keys to their avoidance **54**
Endoscopic endonasal transpterygoid approach (EETPA) 135
– for tuberculum sellae meningioma **55**
– to cavernous sinus **135**
Endoscopic far-medial approach **189**
Endoscopic microvascular decompression (E-MVD) 181, **181**
– approach selection **183**
– common disease indications and area of exposure **181**
– description of the cases **182**
––hemifacial spasm **182**
––trigeminal neuralgia **182**
– key steps of the procedure **184**
– operative setup **184**
– pertinent anatomy **182**
– pertinent risks, keys to their avoidance, and limitations **185**
Endoscopic paramedian supracerebellar infratentorial approach **111**
Endoscopic resection of colloid cyst **95**
Endoscopic third ventriculostomy (ETV) 117
Endoscopic transorbital approach (ETOA) 17, **197**
– to anterior clinoid **13**
– to cavernous sinus and Meckel's cave **17**
Endoscopic transpterygoid translacerum approach to petrous apex **127**
Endoscopic transsphenoidal approach/medial wall of cavernous sinus **37**
Endoscopic visualization 210
Endoscopic-assisted retrosigmoid transmeatal approach for vestibular schwannoma **175**
Epineurium dissection **23**
Epstein–Barr virus (EBV)–negative 164
ETOA, *see* Endoscopic transorbital approach (ETOA)
ETV, *see* Endoscopic third ventriculostomy (ETV)
EVD, *see* External ventricular drain (EVD)
External ventricular drain (EVD) 209
Extradural anterior clinoidectomy (EAC) 81–82
Extreme Lateral Infrajugular Transcondylar Transtubercular (ELITE) procedure 192

F

Facial palsy 156
Falx transection **218**
– and protection of neurovascular structures **219**
– surgical considerations for **219**
Far-medial approach, endoscopic **189**
– approach selection **192**

from: Jean C. Walter et al, The Art of Refractive Cataract Surgery (9781684206391)
© 2022. Thieme. All rights reserved.

– common disease indications and area of exposure **189**
– description of the cases **191**
– key steps of the procedure **193**
– operative setup **193**
– pertinent anatomy **190**
– pertinent risks and keys to their avoidance **194**
FLAIR image, *see* Fluid-attenuated inversion recovery (FLAIR) image
Flexible fiberoptic endoscopes 121
Fluid-attenuated inversion recovery (FLAIR) image 92–93, 103, *209*
FO, *see* Foramen ovale (FO)
Foramen of Monro *96*, **118**
Foramen ovale (FO) 150, 154
Foramen rotundum (FR) 21, 150
Foramen spinosum (FS) 150, 154
FOTZ approach, *see* Fronto-orbito-temporal zygomatic (FOTZ) approach
Fourth ventricle, endoscopic approach to, *see* Endoscopic approach to the fourth ventricle (EAFV)
FR, *see* Foramen rotundum (FR)
Frazier's point 209
Frontal sinus (FS) *52*
Frontal sinus dissection, Draf classification for *27*
Frontal Sinus Entry 71
Fronto-orbito-temporal zygomatic (FOTZ) approach 81
FS, *see* Foramen spinosum (FS); Frontal sinus (FS)

G

Gelfoam, betadine-soaked 10
Glossopharyngeal neuralgia (GN) 181
GN, *see* Glossopharyngeal neuralgia (GN)
Greater sphenoid wing (GSW) 18
Greater superior petrosal nerve (GSPN) 23, 142, 145, 154
GSPN, *see* Greater superior petrosal nerve (GSPN)
GSW, *see* Greater sphenoid wing (GSW)
Gull wing incision, transfrontal sinus keyhole approach with **67–68**
– approach selection **70**
– key steps of the procedure **71**
– operative setup **70**
– pertinent anatomy **68**
– pertinent risks and keys to their avoidance **71**
– planum sphenoidale meningioma **68–69**

H

Hearing impairment 156
Hearing loss 146
Hemifacial spasm (HFS) 181, **182**
HFS, *see* Hemifacial spasm (HFS)
HPV–positive, *see* Human papillomavirus (HPV)–positive
Human papillomavirus (HPV)–positive 164
Hydrocephalus 107

I

IAC, *see* Internal auditory canal (IAC)
Iatrogenic injury 243
ICA, *see* Internal carotid artery (ICA)
ICRi, *see* Inferior carotid ring (ICRi)
IGF-1, *see* Insulin-like growth factor-1 (IGF-1)
IHF, *see* Interhemispheric fissure (IHF)
ILIHA, *see* Ipsilateral interhemispheric approach (ILIHA)
Inferior carotid ring (ICRi) *199*
Inferior petrosal sinus (IPS) 150
Infratemporal fossa (ITF), endoscopic endonasal approach to **161**, *162*
– approach selection **164**
– common disease indications for the technique/approach and area of exposure **161**
– description of the case **164**
– infratemporal fossa access and internal carotid artery exposure **165**
– key steps of the procedure **164**
– operative setup **164**
– pertinent anatomy **162**
– pertinent risks and keys to their avoidance **165**
Initial ventricular exploration **121**
Inner ear structures and Jugular Bulb, Injury to 179
Insulin-like growth factor-1 (IGF-1) 38
Interdural dissection of cavernous sinus **21**
Interhemispheric dissection 105
Interhemispheric fissure (IHF) 215
Internal auditory canal (IAC) 175–176
Internal carotid artery (ICA) 55, 62, 81, 135–136, 142, 156, 161, 197
Internal cerebral veins and vein of galen **118**
Intracisternal tumor 179
Intracranial exposure 185
IPS, *see* Inferior petrosal sinus (IPS)
Ipsilateral interhemispheric approach (ILIHA) 215
ITF, *see* Infratemporal fossa (ITF)

J

JB, *see* Jugular bulb (JB)
JNA, *see* Juvenile nasopharyngeal angiofibroma (JNA)
Jugular bulb (JB) 150
Juvenile nasopharyngeal angiofibroma (JNA) 161

K

Kawase quadrilateral 142, *143*
Knosp–Steiner grade 2 lesion 38

L

Lamina papyracea (LP) *52*
Lateral opticocarotid recess (LOCR) 38, 56
Lateral orbital rim (LOR) exposure *18*
Lateral supraorbital (LSO) approach **75**, **78**
– approach selection **78**
– background to the keyhole and endoscopic approach **75**
– common disease indications for the approach and area of exposure **76**
– description of the cases **76**
– extended LSO (mini-pretemporal) approach **80**
– key steps of the procedure **78**
– operative setup **78**
– pertinent anatomy **76**
– pertinent risks and keys to their avoidance **80**
Lesion-specific surgical strategy **219**
Lipoma 161
LOCR, *see* Lateral opticocarotid recess (LOCR)
LOR exposure, *see* Lateral orbital rim (LOR) exposure
LP, *see* Lamina papyracea (LP)
LSO approach, *see* Lateral supraorbital (LSO) approach

M

Magnetic resonance imaging (MRI) 25, 44, 62, 96, 142, 191, 209, 216, 222
Massa intermedia (interthalamic adhesion) **118**
MC, *see* Meckel's cave (MC)
Meckel's cave (MC) 135–136, 150, 169, 171
– defined 43
– endoscopic approach to **43**
–– approach selection **45**
–– common disease indications for the technique/approach, area of exposure **43**
–– description of the case **44**
–– key steps of the procedure **46**
–– operative setup **45**
–– pertinent anatomy **43**
–– pertinent risks and keys to their avoidance **46**
Meckel's cave, endoscopic transorbital approach to **17**
– approach selection **19**
– common disease indications **17**
– description of the case **18**
– exposure of **17**
– operative setup **20**
– pertinent anatomy **17**
– pertinent risks and keys to their avoidance **23**
–– endo-orbital phase **23**
–– intracranial phase **23**
–– skin phase **23**
– SMILE technique, key steps of **21**
–– epineurium dissection **23**
–– interdural dissection of the cavernous sinus **21**
–– lateral wall of the cavernous sinus exposure **22**
–– meningoorbital band cutting **21**
–– sagittal crest (SC) resection **21**
Medial clivectomy 194
Medial maxillectomy 165
Medial opticocarotid recess (MOCR) 38, 56
Meningioma 56, 161
Meningo-orbital band (MOB) 13, 18, 21, *22*
Meningoorbital band cutting **21**
MEP, *see* Motor evoked potential (MEP)
Microscopy and endoscopy **231**
Microsurgical transcortical-transventricular 96
Microvascular decompression (MVD) 181
Middle cerebral artery 232
Mini-anterior petrosectomy **141**
– approach selection **143**
– common diseases and area of exposure **141**
– description of the case **142**
– key steps of the procedure **146**
– operative setup **144**
– pertinent anatomy **142**
– pertinent risks and keys to their avoidance **146**
Mini-pterional approach and clinoidectomy **81**, **84**
– approach selection **84**
– common disease indications for the technique and area of exposure **81**
– key steps of the procedure **85**
– operative setup **84**
– pertinent anatomy **82**
– pertinent risks and keys to their avoidance **86**
Mini-transcallosal approach to the third ventricle **101**
– approach selection **104**
– common disease indications for the technique/approach and area of exposure **101**
– description of the case(s) **103**
– key steps of the procedure **105**
– operative setup **104**
– pertinent anatomy **102**
– pertinent risks and keys to their avoidance **106**
Minimally invasive neurosurgery (MINS) 1
Minimally invasive retrosigmoid intradural suprameatal approach **169**
– approach selection **171**
– common disease indications for the technique/approach **169**
– description of the case **171**
– key steps of the procedure **173**
– operative setup **171**
– pertinent anatomy **170**
–– neural structures **170**
–– osseous and dural relationships **170**
–– vascular structures **170**
– pertinent risks and keys to their avoidance **173**
Minimally invasive selective amygdalohippocampectomy for epilepsy **225**
– alternative approaches **229**
–– microscopy and endoscopy **231**

from: Jean C. Walter et al, The Art of Refractive Cataract Surgery (9781684206391)

––minimally invasive transpalpebral endoscopically assisted amygdalohippo campectomy **229**
––one-piece fronto-orbital approach **231**
––transtemporal amygdalohippo campectomy **229**
– anterior selective amygdalohippo campectomy **226**
– approach selection **228**
––amygdalohippo campectomy **228**
– common disease indications and area of exposure **225**
– description of the case **226**
– key steps of the procedure **232**
– operative setup **231**
– pertinent anatomy **226**
– pertinent risks and keys to their avoidance **234**
Minimally invasive transpalpebral endoscopically assisted amygdalohippo campectomy **229**
Minimally invasiveness 2
MINS, *see* Minimally invasive neurosurgery (MINS)
MOB, *see* Meningo-orbital band (MOB)
MOCR, *see* Medial opticocarotid recess (MOCR)
Motor evoked potential (MEP) 178
MRI, *see* Magnetic resonance imaging (MRI)
MVD, *see* Microvascular decompression (MVD)

N

Nasofrontal duct *72*
Nasoseptal flap 164
Nerve injury 86, 132, 165
Neural structures **170**
Neuronavigation failure with brain relaxation 107
Neurovascular compression (NVC) syndromes 181–182
Neurovascular injury 185
Nontraumatic optic neuropathy 61
NVC syndromes, *see* Neurovascular compression (NVC) syndromes

O

Oculomotor nerve injury 234
Oculomotor triangle, anatomy of *84*
Olfactory dysfunction 71
One-piece fronto-orbital approach **231**
OOM, *see* Orbicularis oculi muscle (OOM)
Ophthalmic artery 62
Optic nerve decompression, endoscopic endonasal approach for **61–62**
– approach selection **63**
– common disease indications for the technique/approach and area of exposure **61**
– key steps of the procedure **64**
––closure **64**
––dissection/microdrilling **64**
––exposure **64**
– operative setup **64**
––patient positioning **64**
––room layout **64**
– pertinent anatomy **62**
– pertinent risks and keys to their avoidance **65**
Optic strut (OS) 14
Orbicularis oculi muscle (OOM) *18*
OS, *see* Optic strut (OS)
Osseous and dural relationships **170**

P

Paraclival ICA, identification of 193
Parahippocampal gyrus 228
Paramedian supracerebellar transtentorial (PST) approach 237
– for selective amygdalohippo campectomy **237**
––approach selection **239**
––brief description of the case **239**
––common disease indications for the approach and area of exposure **238**
––key steps of the procedure **242**
––operative setup **240**
––pertinent anatomy **238**
––pertinent risks and keys to their avoidance **242**
Paranasal sinus cavities 28
Parenchymal injury 106
Parinaud's syndrome 117
PCA aneurysm, *see* Posterior cerebral artery (PCA) aneurysm
Perneczky's principles 1
Petrosphenoidal (Gruber's) ligament 170, 197
Petrous apex, endoscopic transpterygoid translacerum approach to **127**
– approach selection **131**
– case description **131**
– common disease indications and area of exposure **128**
– key steps of the procedure **132**
– operative setup **132**
– pertinent anatomy **128**
– pertinent risks and keys to their avoidance **132**
PICA, *see* Posterior inferior cerebellar artery (PICA)
Pineal biopsy **121**
Pineal biopsy and third ventriculostomy, keyhole for **117**
– approach selection **118**
– common disease indications and area of exposure **117**
– description of the case **118**
– key steps of the procedure **121**
––initial ventricular exploration **121**
––pineal biopsy **121**
––third ventriculostomy **121**
– operative setup **119**
– pertinent anatomy **118**
––basilar artery **118**
––choroid plexus **118**
––foramen of Monro *96*, **118**

from: Jean C. Walter et al, The Art of Refractive Cataract Surgery (9781684206391)

– – internal cerebral veins and vein of galen **118**
– – massa intermedia (interthalamic adhesion) **118**
– – pineal gland and recesses **118**
– – quadrigeminal plate **118**
– – third ventricle floor **118**
– pertinent risks and keys to their avoidance **121**
Pineal gland and recesses **118**
Planum sphenoidale (PS) *52*
Posterior cerebral artery (PCA) aneurysm 78
Posterior ethmoidal artery 62
Posterior fossa swelling/ cerebellar infarction 179
Posterior hippocampus 233
Posterior inferior cerebellar artery (PICA) 181
PPF, *see* Pterygopalatine fossa (PPF)
PS, *see* Planum sphenoidale (PS)
PST approach, *see* Paramedian supracerebellar transtentorial (PST) approach
Pterygopalatine fossa (PPF) 135, 161

Q

Quadrigeminal plate **118**

R

Rathke's cleft cysts (RCCs) 51, 56
RCCs, *see* Rathke's cleft cysts (RCCs)

S

Sagittal crest (SC) *21*, **21**
SC, *see* Sagittal crest (SC)
SCA, *see* Superior cerebellar artery (SCA)
Schwannoma 161
SCIT, *see* Supracerebellar infratentorial approach (SCIT)
Sella turcica, endoscopic endonasal approach to **33**
– approach selection **34**
– common disease indications for the technique/approach **33**
– description of the case **33**
– key steps of the procedure **34**
– operative setup **34**
– pertinent anatomy **33**
– pertinent risks and keys to their avoidance **35**
Sigmoid sinus (SS) 150, 154
Sinus/venous injury 243
Skin incision and soft tissue dissection 154
SMILE technique, key steps of 18, **21**
– cavernous sinus exposure, lateral wall of **22**
– epineurium dissection **23**
– interdural dissection of cavernous sinus **21**
– meningoorbital band cutting **21**
– sagittal crest (SC) resection **21**
SOA, *see* Supraorbital approach (SOA)
SOF, *see* Superior orbital fissure (SOF)
Sphenoidotomy 59
SPS, *see* Superior petrosal sinus (SPS)
SPV, *see* Superior petrosal vein (SPV)
Squamous cell carcinoma 164
SS, *see* Sigmoid sinus (SS)
SSS, *see* Superior sagittal sinus (SSS)
Superior cerebellar artery (SCA) 181
Superior orbital fissure (SOF) *18*
Superior petrosal sinus (SPS) 142, 150
Superior petrosal vein (SPV) 182, 185
Superior sagittal sinus (SSS) 68, 215, **217**
Supracerebellar infratentorial approach (SCIT), endoscopic paramedian **111**, *113*
– approach selection **112**
– common disease indications for the technique/approach and area of exposure **111**
– description of the case **112**
– key steps of the procedure **113**
– operative setup **113**
– pertinent anatomy **111**
– pertinent risks and keys to their avoidance **114**
Supraorbital approach (SOA) 7–8, *8*, 9, *9*

T

TD, *see* Temporal dura (TD)
Temporal cortical damage to eloquent areas 234
Temporal dura (TD) *19*, *21*
Temporal fossa (TF) *19*
Temporal lobe injury 156
Temporal lobe resection 233
TF, *see* Temporal fossa (TF)
Thalamostriate vein (TSV) *103*
Thermal injury 146
Third ventricle floor **118**
Third ventricle, approach into 102
Third ventricle, "mini"- transcallosal approach to **101**
– approach selection **104**
– common disease indications for the technique/approach and area of exposure **101**
– description of the case(s) **103**
– key steps of the procedure **105**
– operative setup **104**
– pertinent anatomy **102**
– pertinent risks and keys to their avoidance **106**
Third ventriculostomy **121**
Tic douloureux 181
TN, *see* Trigeminal neuralgia (TN)
Transclival approach, endoscopic **197**, **199**
– approach selection **201**
– common disease indications for the technique/approach and area of exposure **197**
– key steps of the procedure **202**
– operative setup **202**
– pertinent anatomy **197**
– pertinent risks and keys to their avoidance **203**
Transfrontal sinus keyhole approach with gull wing incision **67–68**
– approach selection **70**

– key steps of the procedure **71**
– operative setup **70**
– pertinent anatomy **68**
– pertinent risks and keys to their avoidance **71**
– planum sphenoidale meningioma **68–69**
Transplanum–transtubercular anatomical step *57*
Transtemporal amygdalohippo campectomy **229**
Transverse sinus (TS) 150
Transverse–sigmoid sinus junction (TSSJ) 149, 154
Traumatic optic neuropathy 61
Trigeminal neuralgia (TN) 181, **182**
Trigeminal schwannomas 161
TS, *see* Transverse sinus (TS)
TSSJ, *see* Transverse–sigmoid sinus junction (TSSJ)
TSV, *see* Thalamostriate vein (TSV)
Tubercular drilling 173
Tuberculum sellae meningioma, endoscopic endonasal approach for **61–62**
– approach selection **63**
– common disease indications for the technique/approach and area of exposure **61**
– key steps of the procedure **64**
––closure **64**
––dissection/microdrilling **64**
––exposure **64**
– operative setup **64**
––patient positioning **64**
––room layout **64**
– pertinent anatomy **62**
– pertinent risks and keys to their avoidance **65**
Tuberculum sellae meningioma, endoscopic endonasal transtuberculum approach for **55**
– approach selection **58**
– common disease indications and area of exposure **55**
– description of the case(s) **58**
– key steps of the procedure **59**
– operative setup **58**
– pertinent anatomy **56**
– pertinent risks and keys to their avoidance **59**
Tübingen line 176, *177*, 178
Tubular transcortical approaches **221**
– approach selection **223**
– common disease indications for the technique and area of exposure **221**
– description of the case **222**
– key steps of the procedure **223**
– operative setup **223**
– pertinent anatomy **222**
– pertinent risks and keys to their avoidance **224**
Tumor resection 173, 203

V

Vascular compression, identification and treatment of 185
Vascular injury 60, 86, 132, 146, 165, 203, 234
Vascular structures **170**
Vascularized pedicled nasoseptal flap 28
Venous bleeding 195
Venous injury 156
Venous sinus injuries 114
Vestibular schwannoma (VSs), endoscopic-assisted retrosigmoid transmeatal approach for **175**
– approach selection **177**
– description of the case **176**
– key steps of the procedure **178**
– operative setup **178**
– pertinent anatomy **175**
– pertinent risks and keys to their avoidance **179**
Virtual reality (VR) 1–2, *145*
Visual deficits 60
Visual pathway injury 234
VR, *see* Virtual reality (VR)
VSs, *see* Vestibular schwannoma (VSs)
