Contents

I Basic Principles of Medical Microbiology and Immunology

1 General Aspects of Medical Microbiology 2
F. H. Kayser

The History of Infectious Diseases 2
- The Past 2
- The Henle–Koch Postulates 3
- The Present 3

Pathogens 4
- Subcellular Infectious Entities 4
- Prokaryotic and Eukaryotic Microorganisms 4
- Bacteria 5
- Fungi and Protozoa 6
- Animals 7

Host–Pathogen Interactions 7
- Basic Terminology of Infectiology 8
- Determinants of Bacterial Pathogenicity and Virulence 8
  - Adhesion 11
  - Invasion and Spread 12
  - Strategies against Nonspecific Immunity 12
  - Strategies against Specific Immunity 13
  - Clinical Disease 15
  - Regulation of Bacterial Virulence 18
  - The Genetics of Bacterial Pathogenicity 20
- Defenses against Infection 21
  - Nonspecific Defense Mechanisms 21
  - Specific Defense Mechanisms 23
  - Defects in Immune Defenses 24
- Normal Flora 24

Immune Defects 118
Immunoregulation 118
Immunostimulation 119
Immunosuppression 120
Adaptive Immunotherapy 120

Immunological Test Methods 121
Antigen and Antibody Assays 121
Immunoprecipitation in Liquids and Gels 121
Agglutination Reaction 123
Complement Fixation Test (CFT) 125
Direct and Indirect Immunofluorescence 125
Radioimmunological and Enzyme Immunological Tests 128
In-Vitro Cellular Immunity Reactions 129
Isolation of Lymphocytes 129
Lymphocyte Function Tests 132

II Bacteriology

3 General Bacteriology 146
F. H. Kayser

The Morphology and Fine Structure of Bacteria 146
Bacterial Forms 146
Fine Structures of Bacteria 148
Nucleoid (Nucleus Equivalent) and Plasmids 148
Cytoplasm 151
The Cytoplasmic Membrane 151
Cell Wall 152
Capsule 157
Flagella 157
Attachment Pili (Fimbriae), Conjugation Pili 158
Biofilm 158
Bacterial Spores 159

The Physiology of Metabolism and Growth in Bacteria 160
Bacterial Metabolism 160
Types of Metabolism 160
Catabolic Reactions 161
Anabolic Reactions 163
Metabolic Regulation 164

B-Cell Epitopes and B-Cell Proliferation 67
Monoclonal Antibodies 69
T-Independent B Cell Responses 69
T Cells 71
T-Cell Activation 71
T-Cell Activation by Superantigens 72
Interactions between Cells of the Immune System 72
T Helper Cells ($CD4^+$ T Cells) and T-B Cell Collaboration 72
Subpopulations of T Helper Cells 75
Cytotoxic T Cells ($CD8^+$ T Cells) 75
Cytokines (Interleukins) and Adhesion 77
Antibody-Dependent Cellular Immunity and Natural Killer Cells 85
Humoral, Antibody-Dependent Effector Mechanisms 85
The Complement System 86
Immunological Cell Death 90

Immunological Tolerance 90
T-Cell Tolerance 90
B-Cell Tolerance 93

Immunological Memory 94
B-Cell Memory 96
T-Cell Memory 98

Immune Defenses against Infection and Tumor Immunity 99
General Rules Applying to Infection Defenses 100
Immune Protection and Immunopathology 103
Influence of Prophylactic Immunization on the Immune Defenses 106
Tumor Immunity 107

The Pathological Immune Response 108
Type I: IgE-Triggered Anaphylaxis 108
Type II: Cytotoxic Humoral Immune Responses 109
Autoantibody Responses 110
Anti-blood Group Antibody Reactions 111
Type III: Diseases Caused by Immune Complexes 113
Type IV: Cell-mediated Immunopathology 114

Transplantation Immunity 115

Immune Defects and Immune Response Modulation 117
Immune Defects 118

Immunoregulation 118
Immunostimulation 119
Immunosuppression 120
Adaptive Immunotherapy 120

Immunological Test Methods 121
Antigen and Antibody Assays 121
Immunoprecipitation in Liquids and Gels 121
Agglutination Reactions 123
Complement Fixation Test (CFT) 125
Direct and Indirect Immunofluorescence 125
Radioimmunological and Enzyme Immunological Tests 128
In-Vitro Cellular Immunity Reactions 129
Isolation of Lymphocytes 129
Lymphocyte Function Tests 132

II Bacteriology

3 General Bacteriology 146
F. H. Kayser

The Morphology and Fine Structure of Bacteria 146
Bacterial Forms 146
Fine Structures of Bacteria 148
Nucleoid (Nucleus Equivalent) and Plasmids 148
Cytoplasm 151
The Cytoplasmic Membrane 151
Cell Wall 152
Capsule 157
Flagella 157
Attachment Pili (Fimbriae), Conjugation Pili 158
Biofilm 158
Bacterial Spores 159

The Physiology of Metabolism and Growth in Bacteria 160
Bacterial Metabolism 160
Types of Metabolism 160
Catabolic Reactions 161
Anabolic Reactions 163
Metabolic Regulation 164

Growth and Culturing of Bacteria 164
Nutrients 164
Growth and Cell Death 165

The Molecular Basis of Bacterial Genetics 166
The Structure of Bacterial DNA 167
DNA Replication 168
Transcription and Translation 168
Regulation of Gene Expression 169

The Genetic Variability of Bacteria 170
Molecular Mechanisms of Genetic Variability 171
Spontaneous Mutation 171
Recombination 171
Intercellular Mechanisms of Genetic Variability 174
Transformation 174
Transduction 174
Conjugation 175
Restriction, Modification, and Gene Cloning 177

Bacteriophages 182
Definition 182
Morphology 182
Composition 183
Reproduction 184
Lysogeny 186

The Principles of Antibiotic Therapy 187
Definitions 187
Spectrum of Action 196
Efficacy 196
Mechanisms of Action 197
Pharmacokinetics 200
Side Effects 200
The Problem of Resistance 201
Definitions 201
Incidence, Significance 201
Resistance Mechanisms 202
Evolution of Resistance to Anti-Infective Agents 203
Resistance Tests 204
Combination Therapy 205
Chemoprophylaxis 206
Immunomodulators 207

Laboratory Diagnosis 207

Preconditions, General Methods, Evaluation 208
Preconditions 208
General Methods and Evaluation 208
Sampling and Transport of Test Material 208
Microscopy 211
Culturing Methods 212
Identification of Bacteria 214
Molecular Methods 216
Direct Detection of Bacterial Antigens 217
Diagnostic Animal Tests 217
Bacteriological Laboratory Safety 217

Taxonomy and Overview of Human Pathogenic Bacteria 218
Classification 218
Nomenclature 228

4 Bacteria as Human Pathogens 229
F. H. Kayser

Staphylococcus 229
Staphylococcus aureus 230
Coagulase-Negative Staphylococci (CNS) 234

Streptococcus and Enterococcus 234
Streptococcus pyogenes (A Streptococci) 237
Streptococcus pneumoniae (Pneumococci) 240
Streptococcus agalactiae (B Streptococci) 242
Oral Streptococci 242
Enterococcus (Enterococci) 243

Gram-Positive, Anaerobic Cocci 244

Bacillus 244
Bacillus anthracis (Anthrax) 245

Clostridium 246
The Pathogens That Cause Gas Gangrene (Clostridial Myonecrosis) and Anaerobic Cellulitis 246
Clostridium tetani (Tetanus) 248
Clostridium botulinum (Botulism) 250
Clostridium difficile (Pseudomembranous Colitis) 251

Listeria, Erysipelothrix, and Gardnerella 251
Listeria monocytogenes 252
Erysipelothrix rhusiopathiae 253
Gardnerella vaginalis 254

Corynebacterium, Actinomyces, Other Gram-Positive Rod Bacteria 254
Corynebacterium diphtheriae (Diphtheria) 255
Actinomyces 258
Other Gram-Positive Rod Bacteria 260

Mycobacterium 262
Tuberculosis Bacteria (TB) 263
Leprosy Bacteria (LB) 269
Nontuberculous Mycobacteria (NTM) 271

Nocardia 272

Neisseria, Moraxella, and Acinetobacter 273
Neisseria gonorrheae (Gonorrhea) 274
Neisseria meningitidis (Meningitis, Sepsis) 276
Moraxella and Acinetobacter 278

Enterobacteriaceae, Overview 278

Salmonella (Gastroenteritis, Typhoid Fever, Paratyphoid Fever) 282

Shigella (Bacterial Dysentery) 287

Yersinia (Plague, Enteritis) 289
Yersinia pestis 289
Yersinia enterocolitica and Yersinia pseudotuberculosis 290

Escherichia coli 292

Opportunistic Enterobacteriaceae 295

Vibrio, Aeromonas, and Plesiomonas 296
Vibrio cholerae (Cholera) 297
Other Vibrio Bacteria 300
Aeromonas and Plesiomonas 300

Haemophilus and Pasteurella 300
Haemophilus influenzae 301
Haemophilus ducreyi and Haemophilus aegyptius 303
Pasteurella 303

Gram-Negative Rod Bacteria with Low Pathogenic Potential 304

Campylobacter, Helicobacter, Spirillum 306
Campylobacter 306
Helicobacter pylori 307
Spirillum minus 308

Pseudomonas, Stenotrophomonas, Burkholderia 308

Pseudomonas aeruginosa 309
Other Pseudomonas species, Stenotrophomonas and Burkholderia 310

Legionella (Legionnaire's Disease) 311

Brucella, Bordetella, Francisella 313
Brucella (Brucellosis, Bang's Disease) 313
Bordetella (Whooping Cough, Pertussis) 315
Francisella tularensis (Tularemia) 316

Gram-Negative Anaerobes 317

Treponema (Syphilis, Yaws, Pinta) 320
Treponema pallidum, subsp. pallidum (Syphilis) 320
Treponema pallidum, subsp. endemicum (Nonvenereal Syphilis) 323
Treponema pallidum, subsp. pertenue (Yaws) 323
Treponema carateum (Pinta) 323

Borrelia (Relapsing Fever, Lyme Disease) 324
Borrelia That Cause Relapsing Fevers 324
Borrelia burgdorferi (Lyme Disease) 326

Leptospira (Leptospirosis, Weil Disease) 328

Rickettsia, Coxiella, Orientia, and Ehrlichia (Typhus, Spotted Fever, Q Fever, Ehrlichioses) 330

Bartonella and Afipia 334
Bartonella 334
Afipia felis 335

Chlamydia 335
Overview and General Characteristics of Chlamydiae 336
Chlamydia psittaci (Ornithosis, Psittacosis) 337
Chlamydia trachomatis (Trachoma, Lymphogranuloma venereum) 338
Chlamydia pneumoniae 339

Mycoplasma 340

Nosocomial Infections 342
Definition 342
Pathogens, Infections, Frequency 342
Sources of Infection, Transmission Pathways 345
Control 345

III Mycology

5 General Mycology 348
F. H. Kayser

General Characteristics of Fungi 348
Definition and Taxonomy 348
Morphology 349
Metabolism 351
Reproduction in Fungi 351

General Aspects of Fungal Disease 352
Fungal Allergies and Fungal Toxicoses 352
Mycogenic Allergies 352
Mycotoxicoses 353
Mycoses 353
Host-Pathogen Interactions 353
Diagnosis 356
Therapy 356

6 Fungi as Human Pathogens 358
F. H. Kayser

Primary Mycoses 358
Histoplasma capsulatum (Histoplasmosis) 358
Coccidioides immitis (Coccidioidomycosis) 360
Blastomyces dermatitidis (North American Blastomycosis) 361
Paracoccidioides brasiliensis (South American Blastomycosis) 361

Opportunistic Mycoses 362
Candida (Soor) 362
Aspergillus (Aspergillosis) 364
Cryptococcus neoformans (Cryptococcosis) 366
Mucor, Absidia, Rhizopus (Mucormycoses) 367
Phaeohyphomycetes, Hyalohyphomycetes, Opportunistic Yeasts, Penicillium marneffei 369
Pneumocystis carinii (Pneumocystosis) 370

Subcutaneous Mycoses 372

Cutaneous Mycoses 372
Dermatophytes (Dermatomycoses or Dermatophytoses) 372
Other Cutaneous Mycoses 374

IV Virology

7 **General Virology** 376
K. A. Bienz

Definition 376
Morphology and Structure 377
Classification 380
Replication 381
Viral Protein Synthesis 387
Genetics 389
Host-Cell Reactions 392
Cell Destruction (Cytocidal Infection, Necrosis) 392
Virus Replication without Cell Destruction (Noncytocidal Infection) 393
Latent Infection 394
Tumor Transformation 394
Carcinogenic Retroviruses (“Oncoviruses”) 394
DNA Tumor Viruses 396
Pathogenesis 396
Defense Mechanisms 399
Nonspecific Immune Defenses 400
Specific Immune Defenses 401
Prevention 402
Chemotherapy 404
Laboratory Diagnosis 405
Virus Isolation by Culturing 406
Direct Virus Detection 408
Virus Detection Following Biochemical Amplification 409
Serodiagnosis 411

8 **Viruses as Human Pathogens** 412
K. A. Bienz

DNA Viruses 412
Viruses with Single-Stranded DNA Genomes 412
Parvoviruses 412
Viruses with Double-Stranded DNA Genomes 413
Papillomaviruses 413
Polyomaviruses 415
Adenoviruses 416
Herpesviruses 418
Poxviruses 426
Hepadnaviruses: Hepatitis B Virus and Hepatitis D Virus 429

RNA Viruses 434
Viruses with Single-Stranded RNA Genomes, Sense-Strand Orientation 434
Picornaviruses 434
Astrovirus and Calicivirus; Hepatitis E 438
Astroviruses 439
Caliciviruses 439
Hepatitis E Virus 440
Togaviruses 440
Flaviviruses 442
Coronaviruses 446
Retroviruses 448
Human Immune Deficiency Virus (HIV) 451
Viruses with Double-Stranded RNA Genomes 455
Reoviruses 455
Viruses with Single-Stranded RNA Genomes, Antisense-Strand Orientation 457
Orthomyxoviruses 458
Bunyaviruses 460
Arenaviruses 462
Paramyxoviruses 464
Rhabdoviruses 467
Filoviruses (Marburg and Ebola Viruses) 471

Subviral Pathogens: Viroids and Prions 472
Viroids 472
Prions 473

V Parasitology

9 Protozoa 476
J. Eckert

Giardia intestinalis 478
Trichomonas vaginalis 481
Trypanosoma 483
Leishmania 493
Entamoeba histolytica and Other Intestinal Amebas 499
Naegleria, Acanthamoeba, and Balamuthia 507
Toxoplasma gondii 508
Isospora 515
Cyclospora cayetanensis 515
Sarcocystis 516
Cryptosporidium 517
Plasmodium 520
Babesia 538
Microspora 538
Balantidium coli 542

10 Helminths 543
J. Eckert

Plathelmintha (syn. Platyhelminthes) 546
Trematoda (Flukes) 546
Schistosoma (Blood Flukes) 546
Fasciola species 555
Dicrocoelium 557
Opisthorchis and Clonorchis (Cat Liver Fluke and Chinese Liver Fluke) 557
Paragonimus (Lung Flukes) 558
Cestoda (Tapeworms) 560
Taenia Species 560

Echinococcus ... 565
Hymenolepis ... 575
Diphyllobothrium ... 575

Nematoda (Roundworms) ... 576
Intestinal Nematodes ... 576
Ascaris lumbricoides (Large Roundworm) ... 577
Trichuris trichiura (Whipworm) ... 579
Ancylostoma and Necator (Hookworms) ... 580
Strongyloides ... 582
Enterobius ... 585
Nematodal Infections of Tissues and the Vascular System 587
Filarioidea (Filariae) ... 587
Wuchereria bancrofti and Brugia Species ... 588
Loa ... 593
Mansonella Species ... 593
Onchocerca ... 594
Trichinella ... 597
Infections Caused by Nematodal Larvae ... 601
Larva Migrans Externa or Cutaneous Larva Migrans ("Creeping Eruption") ... 602
Larva Migrans Interna or Visceral Larva Migrans ... 602

11 Arthropods ... 606
J. Eckert

Arachnida ... 607
Ticks (Ixodida) ... 607
Mites ... 610

Insects ... 612
Lice (Anoplura) ... 612
Bugs (Heteroptera) ... 616
Mosquitoes and Flies (Diptera: Nematocera and Brachycera) ... 616
Fleas (Siphonatera) ... 618

Appendix to Chapters 9–11 ... 621

Shipment of Materials ... 621
Stool ... 621
Blood ... 622

Serum ... 623
Cerebrospinal Fluid ... 623
Bronchial Specimens ... 623
Urine ... 623

Cultivation ... 623

Material for Polymerase Chain Reaction ... 624
Tissue Specimens and Parasites ... 624

Immunodiagnostic and Molecular Techniques ... 624

VI Organ System Infections

12 Etiological and Laboratory Diagnostic Summaries in Tabular Form ... 630
F. H. Kayser, J. Eckert, K. A. Bienz

Upper Respiratory Tract ... 630

Lower Respiratory Tract ... 632

Urogenital Tract ... 635

Genital Tract (Venereal Diseases) ... 637

Gastrointestinal Tract ... 638

Digestive Glands and Peritoneum ... 641

Nervous System ... 644

Cardiovascular system ... 647

Hematopoietic and Lymphoreticular System ... 648

Skin and Subcutaneous Connective Tissue (Local or Systemic Infections with Mainly Cutaneous Manifestation) ... 650

Bone, Joints, and Muscles ... 653

Eyes and ears ... 655

Literature ... 659

Medical Microbiology and the Internet ... 661

Index ... 663
