A

Abbe-McIndoe vaginoplasty *259*, *261*, 262
Abdominal donor site 191–192
Abdominal flaps 107, 115, 117
Abdominal wall reconstruction (AWR) **223**
– clinical decision-making **224**
– complications **232**
– defect classification **224**
– full-thickness defects **232**
– incisional hernias **224**
–– contaminated/infected field **229**
–– enterocutaneous fistulas **231**
–– failed approximation despite component separation **229**
–– flank hernia **231**
–– midline rectus approximation with retrorectus mesh **224**
–– non-approximated rectus complex at midline **228**
– regional anatomy **223**
–– abdominal wall, layers of **223**
–– innervation **223**
–– vasculature **223**
Abdominal wall reconstruction (AWR), pedicled and free flaps in **234**
– anatomical boundaries **234**
– defect classification **239**
– flap selection **240**
– free tissue transfer in **246**
– innervation **236**
– integumentary system **234**
– musculoaponeurotic girdle **234**
– preoperative evaluation **237**
–– clinical history **237**
–– patient selection **237**
–– physical examination **237**
–– reconstructive algorithm **237**
–– timing of reconstruction **239**
–– wound etiology **237**
– regional pedicled flaps for **240**
–– anterolateral thigh/vastus lateralis flap **242**
–– latissimus dorsi flap **245**
–– rectus abdominis flap **244**
–– rectus femoris flap **240**
–– subtotal thigh flap **243**
–– tensor fascia latae (TFL) flap **242**
– zones of perfusion **236**
Abdominal wall, musculature of 235
Abdominal wall/donor site weakness **190**
– prevention **191**
– problem **190**
– treatment **191**
Abdominal-based breast reconstruction, autologous, complications following **187**
– aesthetic dissatisfaction **192**
–– management **193**
–– prevention **193**
–– problem **192**
– donor site complications **189**
–– abdominal wall or donor site weakness **190**
–– hernia **189**
–– wound-healing problems **191**
– flap complications **187**
–– flap thrombosis **187**
–– partial flap loss and fat necrosis **189**
– hematoma **192**
– postoperative infection **192**
– seroma **192**
Abdominal-based flaps (ABFs) **124**, 125, **133**, 162
Abductor pollicis brevis (APB) tendon 339
Abductor pollicis longus (APL) 338
ABFs, *see* Abdominal-based flaps (ABFs)
Acellular dermal matrix (ADM) coverage 145
Adam's apple 276
Adhesions 397
Adipose deposition **444**
Adipose-derived stem cells (ASCs) 163
Adjunctive prosthetic device placement **141**
ADM coverage, *see* Acellular dermal matrix (ADM) coverage
Aesthetic dissatisfaction **192**
– management **193**
– prevention **193**
– problem **192**
AFG, *see* Autologous fat grafting (AFG)
AICAP flap, *see* Anterior intercostal artery perforator (AICAP) flap
ALCL, *see* Anaplastic large cell lymphoma (ALCL)
Allen's test 268
Allograft **14**, **320**
Alloplastic grafts 18
Alloplastic material **218**
Alloplastic reconstruction **147**
– immediate **148**
Allotransplantation, vascularized composite **17**
ALND, *see* Axillary lymph node dissection (ALND)
ALT flap, *see* Anterolateral thigh (ALT) flap
Ambiguous genitalia 265
Amputated part(s), evaluation and preparation of **377**
– artery and vein **377**
– digital nerves **377**
– flexor and extensor tendons **377**
– osteosynthesis **377**
Amputations
– distal third amputations **362**
–– with bone or tendon exposure **362**
–– with no bone or tendon exposure **362**
– indications for **419**
– middle third amputations **366**
–– borderline bone loss **366**
–– significant bone loss **366**
AMSTERDAM classification, *see* Assiduous Mediastinal Sternal Debridement and Aimed Management (AMSTERDAM) classification
AMT free flap, *see* Anteromedial thigh (AMT) free flap
Anaplastic large cell lymphoma (ALCL) 119
Anastomotic strictures **38**
Anesthesia **382**
Animation deformity **172**
Anterior intercostal artery perforator (AICAP) flap 156
Anterior superior iliac spine (ASIS) 236
Anterolateral thigh (ALT) flap 24–26, 33, 242, 267, 269
Anterolateral thigh (ALT) free flap 4, *4*, 6, 51
Anterolateral thigh/vastus lateralis flap **242**
Anteromedial thigh (AMT) free flap 6, *7*
Anteromedial thigh (AMT) perforator 33
Anticardiolipin antibodies 3
Anticoagulation protocol **375**
Antithymocyte globulin (ATG) 384
APB tendon, *see* Abductor pollicis brevis (APB) tendon
APL, *see* Abductor pollicis longus (APL)
ARM, *see* Axillary reverse mapping (ARM)
Arm transplantation 380
– *See also* Hand transplantation
Arterial compromise **195**
– acute **195**
– delayed **195**
Arteriovenous (AV) loop 246
Artery and vein **377**
ASCs, *see* Adipose-derived stem cells (ASCs)
ASIS, *see* Anterior superior iliac spine (ASIS)
Assiduous Mediastinal Sternal Debridement and Aimed Management (AMSTERDAM) classification
– mediastinitis reconstruction based on **207**
–– stable sternum **207**
–– unstable sternum **208**
– of sternal mediastinitis and management **206**
Atasoy, tranquilli-leali and **363**
ATG, *see* Antithymocyte globulin (ATG)
Attempted implant salvage **163**
Auricular cartilage grafts **65**
Auriculotemporal nerve 13
Autograft **320**
Autograft alternatives **347**
Autologous bone graft 320
Autologous breast reconstruction
– algorithm for **115**
–– DIEP flap **116**
–– free TRAM **116**
–– gluteal perforator flaps **117**
–– latissimus dorsi flap **116**
–– SIEA flap **116**
–– thigh-based perforator flaps **118**
–– thoracodorsal artery perforator flap **117**
–– TRAM flap **116**
– in high-BMI patient **123**
–– abdominal-based flaps **124**
–– alternatives **130**
–– goldilocks procedure **124**
–– intraoperative safety **123**
–– latissimus dorsi myocutaneous flap **125**
–– massive weight loss (MWL) patient **123**
–– oncoplastic breast reduction **124**
–– preoperative evaluation **123**
–– reconstructive options **124**
–– risk factors of obesity **123**
–– thigh-based flaps **126**
– in low-BMI patient **132**
–– abdominally based flaps **133**
–– adjunctive prosthetic device placement **141**
–– adjunctive techniques and considerations **140**
–– autologous fat grafting **141**
–– clinical decision-making **135**
–– complications **141**
–– lateral thigh perforator flap **134**
–– profunda artery perforator flap **133**
–– recipient site preparation **140**
–– regional anatomy **132**
–– stacked flap autologous breast reconstruction **140**
–– superior/inferior gluteal artery perforator flaps **133**
–– transverse upper gracilis flap **135**
– venous and arterial compromise in **194**
–– arterial compromise **195**
–– soft tissue management in partial flap compromise **196**
–– total flap failure **198**
–– vascular compromise for autologous tissue, classification of **195**
–– venous compromise **195**
Autologous fat grafting (AFG) 9, **141**, **163**
Autologous nerve graft harvest, complications related to **101**
Autologous reconstruction 18, 145, **147**, **149**
Autologous-based breast reconstruction, unsatisfactory, correction of **174**
– defects, classification of **174**
– preoperative planning **174**
– secondary revisions **174**
–– breast footprint **174**
–– fat necrosis **179**
–– nipple-areolar complex **183**
–– volume and projection **177**
AV loop, *see* Arteriovenous (AV) loop
Avulsion fractures from proximal phalanx base **399**
AWR, *see* Abdominal wall reconstruction (AWR)
Axillary lymph node dissection (ALND) 474
Axillary reverse mapping (ARM) 474
Axonotmesis **344**

B

Babysitter procedures, complications related to **101**
Back, pedicled flaps from **46**
Banner flap *60*, **60**
Basic hand 426
BCRL, *see* Breast cancer–related lymphedema (BCRL)
BCT, *see* Breast conservation therapy (BCT)
BIA-ALCL, *see* Breast implant–associated anaplastic large cell lymphoma (BIA-ALCL)
Bilateral palatomaxillectomy 53
Bilateral upper gracilis (BUG) flaps **126**, 129
Bilobed flap **60**, *61*
Bioimpedance spectroscopy (BIS) **440**
Biologics **321**
Bipedicled flap 147
BIS, *see* Bioimpedance spectroscopy (BIS)
Blunt trauma/crush injury leading to FP **94**
BMI, *see* Body mass index (BMI)
Body mass index (BMI) 461
– autologous breast reconstruction in high-BMI patient **123**
–– abdominal-based flaps **124**
–– alternatives **130**
–– goldilocks procedure **124**
–– intraoperative safety **123**
–– latissimus dorsi myocutaneous flap **125**
–– massive weight loss (MWL) patient **123**
–– oncoplastic breast reduction **124**
–– preoperative evaluation **123**
–– reconstructive options **124**
–– risk factors of obesity **123**
–– thigh-based flaps **126**
– autologous breast reconstruction in low-BMI patient **132**
–– abdominally based flaps **133**
–– adjunctive prosthetic device placement **141**
–– adjunctive techniques and considerations **140**
–– autologous fat grafting **141**
–– clinical decision-making **135**
–– complications **141**
–– lateral thigh perforator flap **134**
–– profunda artery perforator flap **133**
–– recipient site preparation **140**
–– regional anatomy **132**
–– stacked flap autologous breast reconstruction **140**
–– superior/inferior gluteal artery perforator flaps **133**
–– transverse upper gracilis flap **135**
Bone defect < 5 cm **320**
– autograft **320**
– allograft **320**
– biologics **321**
Bone defects < 5 cm **321**
– bone transport and distraction osteogenesis **322**
– induced membrane **322**
– vascularized bone grafting **322**
–– Capanna technique **324**
–– free fibula **323**
–– medial femoral condyle flap **327**
–– scapula bone **325**
–– vascularized physeal transfer **325**
–– vascularized rib **325**
Bone graft **65**
– autologous 320
– nonautologous 320
Bone loss
– borderline **366**
– requiring free tissue transfer **299**
– significant **366**
–– metacarpal distraction **366**
–– metacarpal phalangization **366**
–– microvascular toe transfer **367**
–– osteoplastic reconstruction **367**
Bone loss in lower extremity **303**
– clinical decision-making **303**
– femur, reconstruction of **304**
–– double barrel fibula **304**
–– vascularized fibula plus allograft **304**
– foot, reconstruction of **307**
–– iliac crest **309**
–– medial condyle flap **309**
– regional anatomy **303**
– tibia, reconstruction of **305**
–– vascularized fibula **305**
–– vascularized fibula plus allograft **307**
Botox 391
"Bottom" surgery **276**
– pedicled intestinal transfer **281**
– penile inversion vaginoplasty **277**
–– ischiorectal dissection and neovaginal space creation **278**
–– neoclitoris dissection **279**
–– neovaginal inset **279**
–– orchiectomy **278**
–– penile degloving and neoclitoris elevation **278**

–– testicular anatomy **277**
–– vascular supply **277**
Botulinum toxin injection versus sympathectomy **390**
Botulinum toxin, treatment with **390**
– approach **390**
– clinical outcomes **390**
– rationale **390**
BRCA mutation 137, *137*
Breast anatomic landmarks *167*
Breast augmentation
– clinical decision-making **276**
– regional anatomy **276**
Breast cancer–related lymphedema (BCRL) 459, 474
Breast conservation therapy (BCT) 154
Breast flap advancement technique 155
Breast footprint **174**
Breast implant–associated anaplastic large cell lymphoma (BIA-ALCL) **170**, *171*
Breast reconstruction and radiation **145**
– alloplastic reconstruction **147**
– autologous reconstruction **147**
Breast reconstruction in irradiated patient **144**
– balancing procedures **152**
– clinical decision-making **144**
– complications **152**
–– fat necrosis **152**
–– skin necrosis **152**
– delayed breast reconstruction, after radiation therapy **151**
– immediate breast reconstruction, prior to radiation therapy **147**
–– immediate alloplastic reconstruction **148**
–– immediate autologous reconstruction **149**
– radiation **144**
–– acute effects of **145**
–– alloplastic reconstruction **147**
–– autologous reconstruction **147**
–– chronic effects of **145**
–– timing of surgery after **145**
– regional anatomy **144**
– revisions **152**
Breast reconstruction, autologous
– algorithm for **115**
–– DIEP flap **116**
–– free TRAM **116**
–– gluteal perforator flaps **117**
–– latissimus dorsi flap **116**
–– SIEA flap **116**
–– thigh-based perforator flaps **118**

Cloacal exstrophy 265
Collagen–glycosaminoglycan layer 14
Colles' fascia 257, 264
Common pressure sores, strategies for **252**
– sacral pressure ulcers **252**
– total thigh flap **254**
Comorbidities, patient selection based on **114**
Complete decongestive therapy (CDT) 455
Complex decongestive therapy (CDT) 446
Complex regional pain syndrome (CRPS) 420
Components separation 228
Composite auricular grafts **60**
Composite ear concha skin/cartilage grafts **66**
Computed tomography (CT) 5, 18, 382, 414
Computed tomography angiography (CTA) 5, *5*, 124
Condyle of F1 and F2, fractures of **404**
COPD, *see* Chronic obstructive pulmonary disease (COPD)
Coronary artery bypass graft (CABG) *212*
Corpora cavernosa 263
Corpus spongiosum 263
Cosmesis 425
Cranial base 91
Craniofacial surgery 89, 105
Cranioplasty **19**, **21**
– secondary, after infection of graft material **18**
Creeping substitution 303
Crohn's disease 259
Cross-face nerve graft (CFNG) 94, **95**
– weak smile following babysitter procedure and connection of **102**
CRPS, *see* Complex regional pain syndrome (CRPS)
CS artery, *see* Circumflex scapular (CS) artery
CSF leaks, *see* Cerebrospinal fluid (CSF) leaks
CT, *see* Computed tomography (CT)
CTA, *see* Computed tomography angiography (CTA)
Cutaneous perforators *5*
Cutaneous/myocutaneous flaps 6
Cutler-Beard flap **82**

D

DAO, *see* Depressor anguli oris (DAO)
DAP flap, *see* Deltoacromial perforator (DAP) flap
DBM, *see* Demineralized bone matrix (DBM)
DCIA, *see* Deep circumflex iliac artery (DCIA)
Deep circumflex iliac artery (DCIA) 149
Deep inferior epigastric perforator (DIEP) flap 115, **116**, 124, **124**, *126–127*, 133, *137*, 144, 149, 162, *164*, *176*, *179*, 189–190, 194, 196
– tertiary reconstruction with **164**
Deep temporal fascia flap 42
Delayed bony reconstruction 10
Delayed breast reconstruction, considerations for, after radiation therapy **151**
Deltoacromial perforator (DAP) flap *47*
Deltopectoral (DP) flap 44, **217**
Demineralized bone matrix (DBM) 321
Depression 433
Depressor anguli oris (DAO) 101, 453
Depressor labii inferioris (DLI) 99, 453
DIEP flap, *see* Deep inferior epigastric perforator (DIEP) flap
Digital nerves **377**
Digital replantation **372**, **376**
– amputated part(s), evaluation and preparation of **377**
–– artery and vein **377**
–– digital nerves **377**
–– flexor and extensor tendons **377**
–– osteosynthesis **377**
– clinical decision-making **376**
– complications **378**
– indications for replantation **376**
– proximal stump, evaluation and preparation of **378**
–– anticoagulation and postoperative monitoring **378**
–– replantation **378**
– regional anatomy and defect/disease classification **376**
Direct nerve repair **346**
Direct-supported repair 224
Direct-to-implant (DTI) **120**
DISI, *see* Dorsal intercarpal segmental instability (DISI)
Distal amputations 430
Distal radioulnar joint (DRUJ) 411, 414–415, 418
Distal radius and ulna **411**, **418**
– classification **412**

Scalp defects, treatment algorithm for *17*
Scalp flap *21*
Scalp reconstruction **14**
– allografts **14**
– clinical decision-making **14**
– complications **21**
– free tissue transfer **15**
– local/regional flaps **14**
– primary closure **14**
– regional anatomy and defect classification **13**
– skin grafts **14**
– tissue expansion **15**
Scalp wound *14*
Scaphoid **412**, **416**
– classification **412**
– operative intervention, indications for **417**
– operative techniques **417**
– pertinent anatomy **412**
– scaphoid and distal radius fracture **418**
Scaphoid and distal radius fracture **418**
Scaphoid fractures, Herbert classification of 413
Scapula 29
Scapula bone **325**
Scarpa's fascia 234, 264
Schirmer test 78
Scratch collapse test (SCT) 351
Scrotal and perineal reconstruction **269**
SCT, *see* Scratch collapse test (SCT)
SEAP flap, *see* Superior epigastric artery perforator (SEAP) flap
Second toe transfer 366, *367*, 368–369
Second-degree injury **344**
Second-stage preparation of microsurgical lining flap **71**
Secondary cranioplasty after infection of graft material **18**
Segmental bone loss 317, 322
Selective neurectomy 101
Sentinel lymph node biopsy (SLNB) 474
Seroma **192**
Serratus muscle flap **218**, 325
SGA, *see* Superior gluteal artery (SGA)
SGAP flap, *see* Superior gluteal artery perforator (SGAP) flap
Shaft, management of fractures of 403
Shaped versus round implants **119**
SIEA flap **116**
– *See also* Superficial inferior epigastric artery (SIEA) flap
Single positron emission computed tomography (SPECT/CT) 440
Sixth-degree injury **345**
Skeletal defects and classification **105**, 107
Skeletal tissue defect reconstruction **105**
Skin envelope **171**
Skin flaps 286
Skin grafts **14**, **251**
– for nasal lining **66**
Skin necrosis **152**
Skin paddle 261
Skull base reconstruction **89**
– clinical decision-making **90**
– complications **91**
– endoscopic reconstruction **90**
– regional anatomy and defect classification **89**
SLNB, *see* Sentinel lymph node biopsy (SLNB)
Small soft tissue defects **297**
Smile **96**
Snapback test 80
Soft tissue coverage, muscle flap options for **209**
– pectoralis major flap **209**
– pedicled omental flap **210**
– rectus abdominis flap **210**
Soft tissue defect reconstruction **105**
Soft tissue defects
– and classification **105**
– requiring free tissue transfer **299**
Soft tissue management in partial flap compromise **196**
Solumedrol infusion 384
SOOF, *see* Suborbicularis oculi fat (SOOF)
SPECT/CT, *see* Single positron emission computed tomography (SPECT/CT)
Split-rib grafts 18
Squamous cell carcinoma 266
SRY gene 277
SSOs, *see* Surgical site occurrences (SSOs)
STA, *see* Superficial temporal artery (STA)
Stacked flap autologous breast reconstruction **140**
Static reanimation **99**
– middle and lower face **99**
– upper face **99**
Sterile nonunion **207**
Sternal mediastinitis and management, AMSTERDAM classification of **206**
Sternal nonunion **213**
Sternal plates 208
Sternal stability 208–209
Sternal wound reconstruction **205**
– AMSTERDAM classification
–– mediastinitis reconstruction based on **207**
–– of sternal mediastinitis and management **206**
– clinical decision-making **206**
– complications **213**
– early sternal dehiscence **207**
– regional anatomy and defect/disease classification **205**
–– chest, functions of **205**
–– poststernotomy wounds, classification of **205**
–– relevant anatomical considerations **205**
– soft tissue coverage, muscle flap options for **209**
–– pectoralis major flap **209**
–– pedicled omental flap **210**
–– rectus abdominis flap **210**
– sterile nonunion **207**
Sternocleidomastoid flap 44, *44*
Sternotomy wounds 215
Sternum **218**
– stable **207**
– unstable **208**
Subacute presentation (6–27 months) **96**
Submental artery **453**
Submental flap 42
Suborbicularis oculi fat (SOOF) 275
Subscapular artery, flaps based on **217**
Subtotal thigh flap **243**
Superficial inferior epigastric artery (SIEA) flap 115, **115**, 124, **124**, 133, 144, 149, 162, 194
Superficial temporal artery (STA) 40, 42
Superficial temporal blood vessels *8*
Superior epigastric artery perforator (SEAP) flap 156
Superior gluteal artery (SGA) 252
Superior gluteal artery perforator (SGAP) flap **133**, *135*, 149
Supraclavicular flap 44, *45*
Supraorbital nerve 13
Supratrochlear nerve 13
Sural nerve harvest, technical tips for **95**
Surgical site occurrences (SSOs) 224
Suspension techniques **83**
– lateral canthal reconstruction **84**
– medial canthal reconstruction **83**
Synergism **333**
