Preface to the Second Edition xix

Preface to the First Edition xx

Acknowledgments to the Second Edition xxii

Acknowledgments to the First Edition xxiii

Contributors xxiv

1. Nerve Surgery: Historical Perspectives 1
Thomas H. Tung, Erica B. Lee, Kitty Y. Wu, and Thomas M. Brushart

1.1 Introduction 1
1.2 Ancient Theories: From Animal Spirits to Electricity 1
1.3 Nerve Injury and Regeneration 2
1.4 Primary Nerve Repairs 4
1.5 Nerve Grafting 5
1.6 Nerve Entrapment 6
1.7 Nerve Transfers 7
1.8 Conclusion 8

2. Anatomy and Physiology for the Nerve Surgeon 12
Matthew D. Wood and Albina Jablonka-Shariff

2.1 Introduction 12
2.2 Nerve Fiber Anatomy 12
2.2.1 Fascicular Anatomy 12
2.3 The Basics of Nerve Injury 15
2.3.1 Mechanisms of Nerve Injury Level of Injury 17
2.3.2 Classifying Nerve Injury 17
2.4 Injection Nerve Injury 19
2.5 Mechanisms of Neurodegeneration 20
2.6 Transcriptional Control of Nerve Regeneration 23
2.7 Schwann Cell–Based Signaling in Peripheral Nerve Injury 24
2.8 Regeneration across a Nerve Gap 25
2.9 Extracellular Matrix Molecules in Nerve Regeneration 26
2.10 Neurotrophins and Neurotrophic Factors in Nerve Regeneration 28
2.11 Preferential Motor Reinnervation 29
2.12 Axonal Transport 30
2.13 Nerve Blood Supply 32
2.14 Accelerated Nerve Regeneration and FK-506 (Tacrolimus) 32
2.15 Electrical Stimulation and Nerve Regeneration 34
2.16 End-to-Side and Supercharge End-to-Side Nerve Transfer 38
2.17 Neuromuscular Anatomy and Physiology at the Neuromuscular Junction 40
2.17.1 Pathophysiology of Compression Neuropathy 43
2.17.2 Transcutaneous Peripheral Nerve Imaging 47

from: Mackinnon E. Nerve Surgery (9781684204700)

3. Evaluation of the Patient with Nerve Injury or Nerve Compression 60
Christine B. Novak

3.1 Introduction 60
3.2 Sensory and Motor Nerve Assessment 60
3.2.1 Sensory Evaluation 60
3.2.2 Motor Evaluation 70
3.2.3 Grading Systems 71
3.3 Test Selection 71
3.4 Evaluation of Muscle Imbalance and Neural Mobility 71
3.5 Patient-Reported Assessment 72
3.5.1 Pain Evaluation 72
3.5.2 Self-Report Questionnaires 73
3.6 Conclusion 74

4. The Electrodiagnostic Examination of Nerve Injuries 80
Robert C. Bucelli, Stahs Pripotnev, and Muhammad Al-Lozi

4.1 Introduction 80
4.2 Pertinent Anatomy 81
4.3 Pertinent Pathology and Pathophysiology 81
4.4 The Electrodiagnostic Examination 82
4.4.1 Overview 82
4.4.2 Nerve Conduction Studies 82
4.4.3 Evoked Response Parameters 82
4.4.4 Amplitude 83
4.4.5 Area 83
4.4.6 Latency 83
4.4.7 Conduction Velocity 84
4.4.8 Duration 84
4.4.9 Sensory Nerve Conduction Studies 84
4.4.10 Motor Nerve Conduction Studies 84
4.4.11 Mixed Nerve Conduction Studies 85
4.4.12 Electromyography (Needle Electrode Examination) 85
4.5 Important Limitations of the Electrodiagnostic Examination 87
4.6 The Electrodiagnostic Manifestations of Peripheral Nerve Injuries 88
4.6.1 Axon Loss 88
4.6.2 Focal Demyelination 90
4.7 Electrodiagnostic–Clinical Correlations 92
4.8 The Differences between Lesions of Varying Onset and Severity 92
4.8.1 The Proper Application of Electrodiagnostic Studies 93
4.9 Prognosis 95
4.10 Clinical Comments 96
4.11 Conclusion 97

5. Nerve Repair and Grafting 102
David M. Brogan, Anna Rose Johnson, and Christopher J. Dy

5.1 Introduction 102
5.2 Nerve Injuries 102
5.2.1 Degree of Nerve Injury 102
5.2.2 Mechanism of Nerve Injury 103
5.2.3 Level of Nerve Injury 108
5.2.4 Patient Factors Affecting Outcomes 108
5.3 Evaluation of Nerve Injury 109
5.4 Nerve Repair 109
5.4.1 Timing of Nerve Repair 109
5.4.2 Type of Nerve Repair 109
5.4.3 Effect of Tension on Nerve Repair 114
5.4.4 Addressing a Nerve Gap 114
5.5 Nerve Conduits 114
5.6 Nerve Grafting 115
5.6.1 Autograft 115
5.6.2 Allograft 117
5.6.3 Acellularized Nerve Allograft 118
5.7 Specific Examples of Upper Extremity Nerve Repair and Grafting 119
5.7.1 High Ulnar Nerve Injury 119

from: Mackinnon E. Nerve Surgery (9781684204700)
© 2026. Thieme. All rights reserved.

5.7.2 High Median Nerve Injury 120
5.7.3 Radial Nerve Injury 125

5.8 Postoperative Rehabilitation 125

5.9 Conclusion 128

6. Nerve Transfers for the Forearm and Hand 132
Hollie A. Power and J. Megan M. Patterson

6.1 Introduction 132

6.2 Nerve Transfers for the Forearm and Hand . . 133

6.2.1 Principles and Indications for Nerve Transfers 133
6.2.2 Perioperative Assessment and Pearls 137

6.3 Radial Nerve Injury: Lack of Wrist and Finger Extension 138

6.3.1 Median-to-Radial Nerve Transfer: Technique . . . 143
6.3.2 Sensory Restoration in the Radial Nerve Distribution: Technique 151

6.4 Median Nerve Injury: Lack of Forearm Pronation, Thumb Opposition, and Finger Flexion 151

6.4.1 Thumb Opposition 152
6.4.2 Median Nerve Sensory Restoration 154
6.4.3 Forearm Pronation and Wrist/Finger Flexion . . . 159

6.5 Ulnar Nerve Injury: Lack of Intrinsic Muscle Function and Ulnar Sensory Loss 175

6.5.1 Ulnar Intrinsic Reinnervation 176
6.5.2 Ulnar Nerve Sensory Restoration 184

6.6 Postoperative Care 190

6.7 Conclusion 191

7. Nerve Transfer Procedures for Tetraplegia 194
Ida K. Fox, Jana Dengler, and Emily M. Krauss

7.1 Introduction 194

7.2 Historical Perspective 194

7.3 Pathophysiology 200

7.4 Surgical Anatomy 201

7.4.1 Nerve to the Deltoid Muscle Anatomy 202
7.4.2 Nerve to the Brachialis Muscle Anatomy 202
7.4.3 Nerve to the Supinator and ECRB Muscles Anatomy 202
7.4.4 Nerve to the Triceps Muscles Anatomy 202
7.4.5 Relevant Median Nerve Anatomy 202
7.4.6 Posterior Interosseous Nerve Anatomy 202

7.5 Evaluation and Management 202

7.5.1 History 202
7.5.2 Physical Examination 206
7.5.3 Electrodiagnostic Testing and Imaging 206
7.5.4 Perioperative and Anesthetic Considerations . . . 209
7.5.5 Options for Novel Nerve Transfer Treatment . . . 209

7.6 Surgical Techniques 210

7.6.1 General Principles and Positioning 210
7.6.2 Nerves of Teres Minor to Triceps Transfer to Restore Elbow Extension (Anterior Approach) . . . 211
7.6.3 Nerves of Posterior Deltoid to Triceps Transfer to Restore Elbow Extension (Posterior Approach) 213
7.6.4 Nerve of Supinator to PIN Transfer to Restore Hand Opening 213
7.6.5 Nerves of Brachialis to Median Motor Transfer to Restore Hand Closing 214
7.6.6 Postoperative Care 214

7.7 Conclusion 215

8. Nerve Autograft Substitutes: Processed Allografts and Conduits 218
Blair R. Peters, Matthew D. Wood, and Sami Tuffaha

8.1 Introduction 218

8.2 Nerve Conduits: Ideal Characteristics and Physiology 218

8.3 Nerve Conduits: Experimental and Clinical Evidence 219

8.3.1 Polyglycolic Acid (PGA) Conduit 219
8.3.2 Poly(DL-lactide-ε-caprolactone) Conduit 224

from: Mackinnon E. Nerve Surgery (9781684204700)
© 2026. Thieme. All rights reserved.

8.3.3 Collagen Conduits . . . 224

8.4 Direct Comparisons of Conduits . . . 225

8.5 Acellularized Nerve Allografts . . . 226

8.6 Expanding the Indications of Nerve Substitute Use . . . 233

8.7 Future Directions . . . 241

8.8 Conclusion: Recommendations for Conduit and ANA Use . . . 244

9. Median Nerve Entrapment and Injury . . . 252
Stephanie A. Russo and J. Megan M. Patterson

9.1 Introduction . . . 252

9.2 Anatomy of the Median Nerve . . . 252

9.3 Carpal Tunnel Syndrome . . . 255

9.3.1 Introduction . . . 255
9.3.2 Clinical Presentation and Diagnosis . . . 255
9.3.3 Etiology . . . 261
9.3.4 Nonsurgical Treatment . . . 262
9.3.5 Open versus Endoscopic Carpal Tunnel Release . . . 263
9.3.6 The Advantages of Open Carpal Tunnel Release . . . 265
9.3.7 Outcomes . . . 266
9.3.8 Complications . . . 268
9.3.9 Revision Surgery . . . 269
9.3.10 Operative Procedure . . . 273

9.4 Median Nerve Compression in the Proximal Forearm . . . 277

9.5 Anterior Interosseous Nerve Palsy . . . 280

9.6 Conclusion . . . 292

10. Ulnar Nerve Entrapment and Injury . . . 297
J. Megan M. Patterson and Hollie A. Power

10.1 Introduction . . . 297

10.2 Ulnar Nerve Anatomy . . . 297

10.2.1 Course and Internal Topography . . . 297
10.2.2 Blood Supply . . . 299
10.2.3 Anatomical Variations . . . 300

10.3 Etiology and Pathophysiology of Ulnar Nerve Compression . . . 301

10.3.1 Ulnar Nerve Compression Proximal to the Elbow (Arcade of Struthers) . . . 301
10.3.2 Cubital Tunnel Syndrome . . . 302
10.3.3 Ulnar Nerve Compression at the Forearm and Wrist . . . 303

10.4 Evaluation of a Patient with Ulnar Nerve Compression . . . 305

10.4.1 History . . . 305
10.4.2 Pain Questionnaire . . . 307
10.4.3 Physical Examination . . . 307
10.4.4 Provocative Testing . . . 309
10.4.5 Electrodiagnostic Studies . . . 309
10.4.6 Imaging . . . 310
10.4.7 Classification of Disease Severity . . . 310

10.5 Management of Cubital Tunnel Syndrome . . . 310

10.5.1 Nonoperative Management . . . 310
10.5.2 Operative Management . . . 311
10.5.3 Complications . . . 319
10.5.4 Outcomes and Comparative Studies . . . 319

10.6 Management of Compression at the Guyon Canal . . . 321

10.6.1 Nonoperative Management . . . 321
10.6.2 Operative Management . . . 321
10.6.3 Complications . . . 322
10.6.4 Outcomes and Comparative Studies . . . 322

10.7 Ulnar Nerve Compression at Multiple Sites . . . 323

10.8 Failed Decompression . . . 323

10.8.1 Recurrent Cubital Tunnel Syndrome . . . 326
10.8.2 Recurrent Guyon Canal Release . . . 329

10.9 Nerve Transfers to Supercharge Recovery . . . 329

10.10 Electrical Stimulation to Enhance Nerve Recovery . . . 331

10.11 Conclusion . . . 332

from: Mackinnon E. Nerve Surgery (9781684204700)

11. Radial Nerve and Axillary Nerve Entrapment and Injury 343
Elspeth J.R. Hill, J. Megan M. Patterson, and Brendan M. Patterson

11.1 Radial Nerve Entrapment and Injury: Introduction 343

11.1.1 Historical Perspective 343
11.1.2 Etiology of Radial Neuropathy 343
11.1.3 Surgical Anatomy 345
11.1.4 Diagnosis and Physical Examination 345
11.1.5 Posterior Interosseous Nerve Compression (Radial Tunnel Syndrome) 347
11.1.6 Management of Radial Nerve Palsy 347
11.1.7 Surgical Options 348
11.1.8 Surgical Techniques for Decompression 348
11.1.9 Surgical Techniques for Radial Nerve Repair 351
11.1.10 Postoperative Care for Radial Nerve Decompression 356
11.1.11 Results 356
11.1.12 Conclusion 362

11.2 Axillary Nerve Entrapment and Injury: Introduction 362

11.2.1 Key Surgical Anatomy 363
11.2.2 Etiology of Axillary Neuropathy 363
11.2.3 Diagnosis and Physical Examination 365
11.2.4 Management of Axillary Nerve Palsy 365
11.2.5 Open Axillary Nerve Injury 365
11.2.6 Closed Axillary Nerve Injury 366
11.2.7 Surgical Management of Axillary Nerve Injury 367
11.2.8 Postoperative Care for Axillary Nerve Transfers 367
11.2.9 Results 367
11.2.10 Conclusion 369

12. Thoracic Outlet Syndrome 373
Renee Ivens and Amy M. Moore

12.1 Introduction 373

12.2 History 373

12.3 Anatomy and Pathophysiology 374

12.4 Diagnosis 376

12.4.1 Neurogenic Thoracic Outlet Syndrome 376
12.4.2 Vascular Thoracic Outlet Syndrome 384

12.5 Management 385

12.5.1 Physical Therapy 385
12.5.2 Surgical Treatment 387

12.6 Conclusion 395

13. Lower Extremity Nerve Injury, Compression, and Transfers 399
Stephanie A. Russo and Thomas H. Tung

13.1 Introduction 399

13.2 Historical Review 399

13.3 Surgical Anatomy of the Lumbosacral Plexus 399

13.4 Etiology of Lumbosacral Plexopathy 401

13.5 Nonsurgical Etiologies 401

13.6 Vascular Etiologies 402

13.7 Neoplastic Processes 402

13.8 Lumbosacral Trauma 402

13.9 The "Border Nerves": Iliohypogastric, Ilioinguinal, and Genitofemoral 403

13.9.1 Historical Review 403
13.9.2 Surgical Anatomy 403
13.9.3 Diagnosis 404
13.9.4 Surgical Technique 404
13.9.5 Results 406

13.10 Meralgia Paresthetica 406

13.10.1 Historical Review 406
13.10.2 Surgical Anatomy 406
13.10.3 Diagnosis 406
13.10.4 Surgical Technique 406
13.10.5 Results 407

13.11 Femoral Nerve 407

13.11.1 Historical Review 407
13.11.2 Surgical Anatomy 408
13.11.3 Diagnosis 408

from: Mackinnon E. Nerve Surgery (9781684204700)
© 2026. Thieme. All rights reserved.

13.11.4 Surgery . . . 408
13.11.5 Results . . . 408

13.12 Saphenous Nerve . . . 408

13.12.1 Historical . . . 408
13.12.2 Surgical Anatomy . . . 408
13.12.3 Diagnosis . . . 409
13.12.4 Surgery . . . 409
13.12.5 Results . . . 410

13.13 Obturator Nerve . . . 410

13.13.1 Historical Review . . . 410
13.13.2 Surgical Anatomy . . . 411
13.13.3 Diagnosis . . . 412
13.13.4 Surgery . . . 412
13.13.5 Results . . . 413

13.14 Common Peroneal Nerve . . . 413

13.14.1 Historical Review . . . 413
13.14.2 Surgical Anatomy . . . 414
13.14.3 Diagnosis . . . 416
13.14.4 Surgical Technique . . . 416
13.14.5 Results . . . 422

13.15 Superficial Peroneal Entrapment . . . 422

13.15.1 Historical Review . . . 422
13.15.2 Surgical Anatomy . . . 422
13.15.3 Diagnosis . . . 422
13.15.4 Surgical Technique . . . 423
13.15.5 Results . . . 429

13.16 Deep Peroneal Nerve . . . 429

13.16.1 Historical Review . . . 429
13.16.2 Surgical Anatomy . . . 429
13.16.3 Diagnosis . . . 429
13.16.4 Surgical Technique . . . 429
13.16.5 Results . . . 430

13.17 Sural Nerve . . . 430

13.17.1 Historical Review . . . 430
13.17.2 Surgical Anatomy . . . 431
13.17.3 Diagnosis . . . 432
13.17.4 Surgical Technique . . . 432
13.17.5 Results . . . 432

13.18 Tibial Nerve . . . 432

13.18.1 Historical Review . . . 432
13.18.2 Surgical Anatomy . . . 433
13.18.3 Surgical Technique . . . 433

13.19 Tarsal Tunnel Syndrome . . . 433

13.19.1 Historical Review . . . 433
13.19.2 Surgical Anatomy . . . 435
13.19.3 Diagnosis . . . 436
13.19.4 Surgical Technique . . . 438

13.20 Morton Neuroma . . . 439

13.20.1 Historical Review . . . 439
13.20.2 Surgical Anatomy . . . 439
13.20.3 Diagnosis . . . 440
13.20.4 Surgical Technique . . . 447

13.21 Nerve Transfers . . . 447

13.21.1 Restoration of Femoral Nerve Function . . . 449
13.21.2 Restoration of Tibial Nerve Function . . . 452
13.21.3 Other Lower Extremity Reconstructive Procedures . . . 452

13.22 Conclusion . . . 453

14. Brachial Plexus Injuries . . . 456
Stahs Pripotnev and Thomas H. Tung

14.1 Introduction . . . 456

14.2 Historical Review . . . 456

14.3 Surgical Anatomy . . . 457

14.4 Epidemiology and Classification . . . 463

14.4.1 Epidemiology . . . 463
14.4.2 Diagnosis . . . 465
14.4.3 Principles of Management . . . 468
14.4.4 Shoulder Function . . . 486
14.4.5 Triceps Function . . . 499
14.4.6 Hand Function . . . 499
14.4.7 Other Specific Procedures to Restore Hand Function . . . 501
14.4.8 Postoperative Management . . . 508
14.4.9 Outcomes . . . 509

14.5 Conclusion . . . 530

from: Mackinnon E. Nerve Surgery (9781684204700)
© 2026. Thieme. All rights reserved.

15. Brachial Plexus Birth Injury 535
Kristen Davidge and Alison K. Snyder-Warwick

15.1 Introduction 535
15.2 Etiology 535
15.3 Nomenclature 536
15.4 Evaluation 536
15.4.1 Perinatal History 536
15.4.2 Physical Examination 537
15.5 Preoperative Planning 538
15.6 Indications for Primary Brachial Plexus Exploration 538
15.6.1 Preoperative Radiologic Evaluation 539
15.7 Operative Management: Brachial Plexus Exploration, Nerve Grafting, and Nerve Transfers 539
15.7.1 Operative Preparations 539
15.7.2 Sural Nerve Harvest 539
15.7.3 Exposure of the Brachial Plexus 539
15.7.4 Neuroma Resection 540
15.7.5 Reconstruction of the Brachial Plexus 540
15.7.6 Postoperative Management 543
15.8 Adjunctive Management 543
15.9 Outcomes 544
15.9.1 Outcome Assessment 544
15.9.2 Outcomes of Neurolysis versus Neuroma Resection and Interpositional Nerve Grafting 544
15.9.3 Outcomes of Nerve Transfers 546
15.9.4 Sensory Outcomes 547
15.9.5 Global Functioning and Patient-Reported Outcomes 548
15.10 Conclusion 548

16. Facial Nerve Injury 552
Alison K. Snyder-Warwick and Johnny Chueing-Yi Lu

16.1 Introduction 552
16.2 Etiology 552
16.3 Anatomical Considerations 552
16.3.1 Facial Nerve 552
16.3.2 Facial Muscles 554
16.4 Evaluation 556
16.5 Management 558
16.5.1 Technique 559
16.5.2 Regional Considerations 560
16.5.3 The Nasolabial Fold 563
16.6 Rehabilitation 570
16.6.1 Neuromuscular Reeducation 571
16.6.2 Patient Treatment 571
16.6.3 Postoperative Neuromuscular Retraining 572
16.7 Conclusion 573

17. Postoperative Rehabilitation of Nerve Transfers 576
Amy M. Young and Christine B. Novak

17.1 Introduction 576
17.1.1 Role of Neuroplasticity 576
17.2 Nerve Transfer Rehabilitation 576
17.2.1 Preoperative Phase 576
17.2.2 Acute Postoperative Phase 577
17.3 Sensorimotor Re-education Strategies 577
17.3.1 Early Phase 577
17.3.2 Middle Phase 582
17.3.3 Late Phase 583
17.3.4 Psychosocial Aspects of Care 584
17.4 Conclusion 584

from: Mackinnon E. Nerve Surgery (9781684204700)
© 2026. Thieme. All rights reserved.

18. Tendon Transfers for Functional Reconstruction 586
Mitchell A. Pet, J. Megan M. Patterson, and Christopher J. Dy

18.1 Introduction 586
18.2 History 586
18.3 Principles of Tendon Transfer 586
18.3.1 Tendon Transfers for Ulnar Nerve Palsy 589
18.3.2 Tendon Transfers for Median Nerve Palsy 592
18.3.3 Tendon Transfers for Radial Nerve Palsy 598
18.3.4 Tendon Transfers for Elbow Function 611
18.4 Conclusion 613

19. Tumors of the Peripheral Nervous System 615
Damiano Giuseppe Barone and Robert J. Spinner

19.1 Introduction 615
19.2 Neoplasms of Nerve Sheath Origin 616
19.2.1 Historical Background 616
19.2.2 Schwannoma 616
19.2.3 Neurofibromatoses 621
19.2.4 Neurofibroma 627
19.2.5 Granular Cell Tumors 630
19.2.6 Malignant Peripheral Nerve Sheath Tumors 630
19.3 Neoplasms of Nonneural Origin 643
19.3.1 Adipose Lesions of Nerve 643
19.3.2 Intraneural Ganglion Cysts 654
19.3.3 Intraneural Perineuriomas 654
19.3.4 Extrinsic Tumors Compressing Nerve 658
19.4 Conclusion 662

20. Surgical Management of Chronic Headaches, Migraines, and Neuralgias 665
Ivica Ducic, Lisa Gfrerer, and John M. Felder

20.1 Introduction 665
20.1.1 Migraine Headache 666
20.1.2 Frontotemporal Trigeminal Neuralgia 667
20.1.3 Occipital Neuralgia 667
20.2 Anatomy 667
20.2.1 Supraorbital, Supratrochlear, and Infratrochlear Nerves 667
20.2.2 Zygomaticotemporal and Auriculotemporal Nerves 668
20.2.3 Greater, Lesser, and Dorsal Occipital Nerves 669
20.3 Pathophysiology 670
20.3.1 Peripheral and Central Sensitization Role in Triggering and Maintaining Chronic Headaches and Migraine Headaches 670
20.4 Diagnostic Evaluation and Workup 671
20.5 Surgical Technique 673
20.5.1 Patients with Frontal or Temporal Neuralgia-Related *Chronic Headaches* 673
20.5.2 Patients with Occipital Neuralgia-Related Chronic Headaches 675
20.6 Discussion 677
20.7 Conclusion 682

21. Painful Sequelae of Nerve Injuries 686
Sami Tuffaha, John M. Felder, Jason H. Ko, and Emily M. Krauss

21.1 Introduction 686
21.2 Normal Pain Response 686
21.2.1 Physiology 686
21.2.2 Treatment 688
21.3 Approach to the Abnormal Pain Response 688
21.3.1 Neuromatous Pain Overview 689
21.3.2 Pain Syndromes 698
21.3.3 Diagnosis of Complex Regional Pain Syndrome 706
21.3.4 Treatment of Complex Regional Pain Syndrome 711
21.4 Controversy 715
21.5 Conclusion 716

22. Dissemination and Implementation Science in Nerve Surgery 720
William M. Padovano, Andrew Yee, Jana Dengler, and Kristen Davidge

22.1 Introduction 720
22.2 Definitions 721
22.3 Importance of Dissemination and Implementation Science to Nerve Surgery ... 721
22.4 Historical Roots 722
22.5 Elements of a Dissemination and Implementation Study 723
22.6 Example of Dissemination and Implementation in Nerve Surgery: Increasing Access to Nerve Transfer Surgery in Spinal Cord Injury 724
22.6.1 Background 724
22.6.2 Contextual Assessment: Provider Barriers to Nerve Transfer Surgery in SCI 724
22.6.3 Implementation Strategies 726
22.7 Dissemination and Implementation Using Educational Approaches 727
22.8 Conclusions 729
