Index

A

activation patterns 55
activity
– lack 39
– physical 46
allergy 112, 138–139
analgesics 186
analogy, functional 18
anamnesis 79
antebrachiocarpal joint 142
antebrachium 103
anti-gravity muscle 52
anti-gravity muscles 21
apophysis 52
architectural index 38
arthritic diseases 193
arthrocentesis 194
asynchronous growth, radius and ulna 145
– carpal joint 102

B

back muscles 60
Bardens test 135
behavior 161
– disorder 161
biceps
– avulsion 153
– tendinitis 106–108, 153, 230
biceps tendinitis 154
biceps tendon
– assessment 154
– avulsion 154
bite wound 121
blindness 163, 171–172
blood test 48
body condition scoring 40, 46
bone
– feeding 43
– formation 191
– – reactive 199
– formation, delayed 192
– increased density 190
– layer, subchondral 33
– lysis 190
– proliferation 226
– remodeling 29
– resorption 47
– tumors 196
brachial plexus trauma 157
brachial plexus tumors 157
brachium 106
brain lesion 160
brain stem lesion 162, 165–166, 171, 173

C

Ca/P ratio 43
calcaneal cap 203
– luxation 89, 117, 202
calcaneal fracture 87, 89, 114, 117
Calcium 43, 47–48, 187
– -excess 43, 47
– calcium/phosphorus ratio 48
– deficiency 47
– requirement 40
carpal joint 102
– collateral ligament rupture 102
– fracture 102
– ligament damage, chronic 102
carpus 99, 101, 138, 140, 142
cartilage cones, retained 145, 192
cauda equina compression 96
– syndrome 80, 131, 234
cerebellum
– degenerative and storage disorders 162
– inflammation 162
– lesion 161, 165–166
– neoplasia 162
cerebrospinal fluid, impaired outflow 160
cerebrum
– lesion 162, 165
– malformation 162
– tumor 162
cervical spondylotic myelopathy 160
chondroitin 187
chondrosarcoma 196
common calcaneal tendon 89, 117
– partial rupture 89
– rupture 89, 201
– – partial 117
compartment syndrome 90, 103
– medial 149
compression 160
computed tomography (CT) 188, 226
connective tissue 45
constraint linkage 18
contraction, isometric 21
copper 45
coronoid
– fracture 149
– ostectomy 230
cortical lesion 165, 171
corticosteroids 186
cotton ball test 172
cranial drawer test 124, 198, 204
cranial nerves 171
cross-section, physiological 38
cruciate ligament rupture 79, 82, 91, 121–122, 124–125, 196, 203, 205
– anterior 203
– partial 121
cruciate ligaments 68
crus 119
– examination 90
– fracture 90
– malalignment 90

D

degenerative lumbosacral stenosis (DLSS) 160, 234–235
degenerative myelopathy (DM) 160, 162, 236
demineralization 47
dermoid sinus 160
developmental orthopedic diseases 39
diagnostic procedure 78
digits 85, 99, 112, 138
– flexors, rupture 86, 100
– fracture 86, 100
– joint swelling 86, 100
– joints, examination 113, 139
distemper 161
diverticulum, subarachnoid 160
duty factor 24
dynamic stability 30

E

edema 191, 199, 212
Ehmer sling 222
elbow
– -region, examination 104
– dysplasia (ED) 79, 104, 145, 147, 149, 226–227
– incongruity 149
– luxation 148
– osteoarthritis 104, 147, 149
elbow joint 147
– collateral ligaments 105
– – assessment 148
– compartment, medial, assessment 149
– incongruity (INC) 226
– palpation 104
electromyogram (EMG) 55
encephalomyelitis 161
encephalopathy 161
energy
– -sparing mechanisms 13
– consumption 15
– excess, chronic 45
– supply 45
entheses 34
epicondylus lateralis, fracture 147
epiphyses 52
evaluation, overall 112, 138
examination
– general 83
– brief neurological 83
– neurological 160
– – anamnesis 160
– – history 160
– – signalment 160
– preliminary 83
– recumbency 111
– standing position 83–84
exercise restriction 187
extensor postural thrust 163
external fixateur 195
eye injury 176
eye movement 175

F

facial expression 174
femoral head
– necrosis, aseptic 79, 212
– resection 206, 217, 221
femoral neck fracture 131
femur 129
fibrocartilaginous embolism (spinal cord infarction) 160, 236
fibrosarcoma 196
fibula, head, fracture 122
fistula, metatarsal 114
forelimb 99, 138
fracture 195
– metacarpus 100
fractures, spontaneous 47

G

gait analysis 80, 162
– from the back, from the front, from the side 80
– jumping 81
– rising 80
– stairs 81
– uneven terrain 81
gastrocnemius, avulsion 80
generalized fibrous osteodystrophy 43
glucosamine 187

green-lipped mussels 187
ground reaction forces 16
growth
– curve 40–41
– rate 40
– disorder 79, 145
– forelimbs 79
growth plate
– closure, premature 80, 103, 145, 192
– fracture 119
– trauma 79

H

hamstring fibrosis 211
head, sensation 172
hemangiosarcoma 196
hemiwalking 165
hindlimb 85, 112
– toe-touching 82
hip joint 131
– dysplasia (HD) 79, 94, 96, 131, 134–135, 214–215, 222
– luxation 95–96, 132, 220
– manipulation 96, 131
– osteoarthritis 94, 96–97, 131–132, 134, 214, 216, 222
– position 95
– replacement 217, 219
hip region, examination 95
history (anamnesis) 79
hobbles 222
hopping 165
Horner's syndrome 176
humerus 151
hyaluronic acids 187
hydrocephalus 160
hyperextension 45, 223–224
– trauma 101, 223
– antebrachiocarpal joint 142
hyperparathyroidism 43
– renal 48
hypothalamic lesion 174, 176

I

idiomotion 12
iliopsoas strain 131, 222
iliopsoas tenotomy 219
infection 161
infraspinatus contracture 108, 153
inner ear, inflammation 162
insertional tendinitis 121
instability, tarsometatarsal 160, 199–200
intervertebral disc, disease 80, 96, 160–161
– cervical 238
– lumbar vertebral column 131
– thoracolumbar 237
intervertebral discs 49
intoxication 161
iodine 45
ischiocrural muscles, fibrosis 129

J

jaw tone 173
joint
– cartilage 32
– -erosion 121
– capsule 31
– dilation 193
– capsule tear 113
– capsule,fibrosis 125
– effusion 205
– tumors 198
joint capsule tear 139
joint capsule/ligament trauma 139
joints, incongruent 33

L

lameness 234
– temporary, after rest 188, 216
– grading 81
– intermittent 207
Legg-Perthes disease 131–132, 212
lesion localization 178
ligament ruptures 224
limb length, functional 13
limb, distal, pain testing 100
limb, distal, pain testing 86
load-altering osteotomy 229
loading 29
luxation 231
– testing 133

M

m.
– abductor pollicis longus
– assessment of tendon 143
– tendovaginitis 225
– biceps brachii
– avulsion 153
– tendinitis 153
– biceps femoris 55
– extensor digitorum longus, avulsion 211
– gastrocnemius 38
– iliopsoas, examination 97
– latissimus dorsi 55
– triceps brachii 18
maintenance requirement 45
malleolus fracture 88, 119
matched motion 18
mechanics, intelligent 16
meningeal irritation 177
meniscus 68
– assessment 126
– injury 91
– lesion 121
mentation 161
metabolic disorder 161
metacarpus 99, 138
metatarsus 85, 112
– fracture 86
microfractures 196
midbrain injury 176
midbrain lesion 161, 163
middle ear lesion 174, 176
minerals 47
mm. gastrocnemii 18
Moeller-Barlow disease 191
motor function of the tongue 173
motor neuron, lower, lesion 162, 167–168
motor neuron, upper, lesion 162, 167–169
muscle
– -fascicles 36
– -fibers 37
– atrophy 196
– injury 168
– volume 38
muscle score 47
myasthenia 173
myelopathy 160, 162
myokines 39

N

neoplasia 162, 226
nerve damage 177
nerve irritation 177
nerve lesion 113, 139, 168–169, 171–172, 174, 177
nerve paralysis 175–176
nerve root trauma 174, 176
nerve trauma 173
NSAID 186
nystagmus 175

O

olecranon, fracture 106
opiates 186
opioids 186
orbital injury 176
Ortolani test 134
Osgood-Schlatter disease 119, 121, 211
ossification 43
ossification defect 187
osteoarthritis 79
osteoarthropathy, hypertrophic 199
osteocalcin 29
osteochondrosis 88, 91, 107–108, 116, 187, 192, 211, 226
– humeral condyle 149
– lesion 121, 153, 228–229
– femoral condyles 121
– tarsus 199
– trochlea of talus 116
osteoclast 44, 190
osteodystrophy
– hypertrophic 79, 83, 103, 119, 129, 191
– idiopathic 191
osteolysis 195
osteomyelitis 191, 195
osteopathy
– hypertrophic 145, 198
– metaphyseal 191
osteosarcoma 145, 196–197
– distal femur 92
– distal radius 143
– proximal tibia 92

P

pace 24
pain testing 177
– distal limb 86, 100
panosteitis 79, 82–83, 90, 103, 119, 129, 145, 151, 190
paralysis 234
patella position 93
patellar fracture 121
patellar luxation 79, 82, 91, 93, 121, 202, 206, 209
– grading 207
– testing 123
patellar reflex 167
pathway, sensory lesion 163
pectineus myectomy 218–219
pelvic osteotomy 217
pentosan polysulfate 187
periosteal reactions 199
phosphorus 43–44, 47–48
– deficiency 44
– secondary 43
– excess 47
– utilization 44
physiotherapy 187
pivot point, scapula 17
placing response 163
plexus brachialis, lesion 166
plexus injury, brachial 239
polyarthritis 79, 83, 88, 93, 102, 113, 121, 139, 193
postural reactions and proprioceptive testing 163
posture 161
processus
– anconaeus 53
– fracture 104
– ununited (UAP) 104, 147, 226

Koch/Fischer, Diagnosing Canine Lameness (ISBN 9783132432833) © 2020 Georg Thieme Verlag KG

– coronoideus medialis 53, 228
– fracture 149
– fragmented (FMCP) 226
– fragmented (FPCM) 149
proprioceptive positioning 164
protein 42

R

rabies 173
radial nerve injury 151
radius 145
ration calculation 48–49
reduction 221
reflex
– flexor, forelimb 169
– flexor (withdrawal), hindlimb 168
– m. extensor carpi radialis 168
– m.tibialis cranialis 167
– palpebral 171
– panniculus 170
– perineal 169
– pupillary light 176
– swallowing 173
